HEALTH AND SAFETY MESSAGE

INCIDENT: NCFS Summer 24 Fire Support

DATE: 06/28/24

Time: 0700-1900

Major Hazards and Risks:

Driving & Traffic: Driving during or after a rain event, whether a sprinkle or a heavy downpour, can be one of the most difficult driving situations a driver encounters. Rainy conditions are directly associated with higher collision rates. Watch out for slicker conditions on forest and paved roads. Increase your following distance to 5 plus seconds. **When backing up, ALWAYS USE A SPOTTER.**

TRAFFIC HEADS UP! It's Friday and beach traffic can easily double the number of vehicles on the roads!!

Heat Related Illness (HRI) & Dehydration: Acclimate to your environment. Stay ahead of the hydration curve. Hydrate throughout and following each shift. Maintain a water/electrolyte ratio of at least 3:1. Listen to your body and acknowledge any symptoms of heat related illness.

SITUATIONAL AWARENESS -

- **Look Up:** Check the sky for any weather changes such as building or approaching thunderstorms, wind shifts or increasing in speed. Look for snags.
- **Look Down:** Watch your footing in ash pits when working in the black.
- **Look Around:** Keep an eye on fellow firefighters for signs of heat stress and smoke inhalation.

Accidents: *Identify on scene IC and CALL 911, follow 8 Line, make sure patient is secure and in a safe place. Contact your fire line supervisor and inform him/her.*

Just because you always did it that way, doesn't make it right.

Don't Get Complacent

How do we get complacent? By successfully completing shift after shift, doing the same thing over and over without an accident or injury. When complacency sets in, hazards get overlooked, people take risks that they normally wouldn't, and injuries start to increase.

- Stay focused! Maintain situational awareness all day every day!
- Take your assignment seriously.
- Look out for each other. You may recognize complacency in your co-worker far before they recognize it themselves.

Lightning Activity Level (LAL)

Is a scale which describes lightning activity. Values are labeled 1-6:

LAL 1	No thunderstorms
LAL 2	Isolated thunderstorms. Light rain will occasionally reach the ground. Lightning is very infrequent, 1 to 5 cloud to ground strikes in a five minute period.
LAL 3	Widely scattered thunderstorms. Light to moderate rain will reach the ground. Lightning is infrequent, 6 to 10 cloud to ground strikes in a 5 minute period.
LAL 4	Scattered thunderstorms. Moderate rain is commonly produced. Lightning is frequent, 11 to 15 cloud to ground strikes in a 5 minute period.
LAL 5	Numerous thunderstorms. Rainfall is moderate to heavy. Lightning is frequent and intense, greater than 15 cloud to ground strikes in a 5 minute period.
LAL 6	Dry lightning (same as LAL 3 but without rain). This type of lightning has the potential for extreme fire activity and is normally highlighted in fire weather forecasts with a Red Flag Warning.

Demobilization Requirements

- Section Chiefs will send general messages to plans and logistics notifying them of demobilization of excess resources with as much advance notice as possible.
- 24hrs prior to the resources expected time of checking out of the hotel, the hotel will be notified to prevent early checkout and/or another night's charges accruing. The resource and Logistics personnel will be responsible for notification.
- **When resources checkout of the hotel they need to request a copy of the final bill to bring to finance for demob. You will not be allowed to demob without this!**
- Resources must obtain a performance evaluation from your incident supervisor.
- Update position task book with your supervisor.
- All resources will return any equipment that was borrowed.
- **All personnel approved to be released from the incident will start their demob at ICP**, where they will receive a Demobilization Checkout sheet (ICS 221) from the DEMOB unit leader.
- Submit final CTR's and Shift Tickets to Finance at ICP.
- Plans will notify the resources' district operations room and the regional operations room of their departure.
- **Travel Route** - State agency personnel returning via their agency's vehicles will plan the most direct, most practical routes to their homes.
- **TRAVEL LIMITATIONS:** All demobilized personnel must arrive at their home before 2200 hours and not exceed 16.0 hours of worktime that shift. If personnel can't reach their home in this timeframe the resource will rest overnight, and resume travel the next day.
- All resources must notify their ops rooms when they arrive back at their home unit.
