**To: All Incident Personnel, Southeast Texas Fire Complex**

As Southern Area National Type II Incident Commander, I am committed to a policy of "zero tolerance" of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of "NO ALCOHOL" from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so as well.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. Finally, we endorse the attitude and work ethic that places "Safety First, every time on every Incident." We expect nothing less.

/s/ Mike Dueitt

**WEATHER DISCUSSION:**                      **...DRIER TODAY...**

High pressure aloft will return to the region Monday. Expect slightly warmer conditions Monday due to less cloud cover, but a bigger drop in afternoon humidity. Surface high pressure will gradually settle over Arkansas and Louisiana by Monday afternoon, resulting in East to Southeast low-level flow. There will be little change Tuesday, except for a shift to prevailing South to Southwest wind and afternoon humidity values approaching 30 percent. The Northwest section will become locally breezy Tuesday afternoon. Breezy conditions are expected to become more prevalent Wednesday as a developing frontal system over the Central Plains approaches the area. The front sweeps through the area Thursday or Thursday night, bringing showers and thunderstorms, followed by much cooler conditions Friday and Saturday.

**FIRE BEHAVIOR FORECAST**

<b>FORECAST NUMBER:</b> #50	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Southeast Texas Fire Complex	<b>OPERATIONAL PERIOD:</b> 10/24 MONDAY Day Shift
<b>DATE ISSUED:</b> 10/23/2011	<b>TIME ISSUED:</b> 1900
<b>UNIT:</b> Texas Forest Service	<b>SIGNED:</b> <i>Isl/Mark Clere</i> Mark Clere, FBAN 352.454.5350 Gary Jarvis, Field FBAN 202.379.6993

**FUEL ASSUMPTIONS:** The major fuel types found in the SE Texas Complex are fuel model TU3 (moderate timber understory), Fire Behavior Prediction System Fuel model 9 and grass fuel model 1. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy. Young pine plantations may react similar to a brush model due to low live fuel moistures. There are also areas with slash from logging operations.

**WEATHER SUMMARY: Also refer to Weather Forecast:** High Pressure returns, slightly warmer conditions today, with less clouds and lower RHs compared to yesterday. Primarily East to Southeast wind flow. Tuesday will be breezier, especially in Linden and Henderson zones, but temps and RHs remain similar. Red Flag conditions possible on Wednesday as frontal system in Great Plains approaches.

**SE Texas Complex General Fire Behavior Forecast:** Drought condition still persist across the zone. Live fuel moistures continue to be extremely low making the live scrubs and trees available to burn. Be very cautious when critical fire behavior thresholds are exceeded. When thresholds are exceeded fires will become very resistant to control with ground resources and will require the combination of aerial and ground resources to be effective in controlling fires.

**Critical fire behavior thresholds: (Temp >90°, RH < 30%, Winds > 10 mph).**

***No thresholds reached today***

**Specific:**

***Linden, Henderson, Livingston and Woodville Dispatch Zones***

Grass fuels are cured and will support high rates of spread. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy. Fire will easily spread into the canopy when latter fuels are present; expect long range spotting when this occurs.

Fuel Type	Rates of Spread	Flame Length	Max. Spotting Distance	Probability of Ignition	Torching / Crowning Potential / Flame Lengths
Winds at 5-10, G NA mph @ 20'					
<b>Grass Fuels</b>	7-30 ch/hr.	2 - 4 feet	.1 mile	58%	NA
<b>Southern Rough</b>	12-27 ch/hr.	5-8 feet	.1 mile		Not Likely
<b>Timber Litter</b>	2-4 ch/hr.	1 - 3 feet	50 yards		Not Likely
<b>Small Pine Plantation</b>	20-44 ch/hr.	10 - 16 feet	.1 mile		Occasional torching / 50' FL

Fuels in timbered stands, that had over 1/2" of rain will still be drying from the rain, especially in closed canopy areas where both wind and sun have been sheltered. Linden and Henderson zones will have less opportunity to reach the ROS and Flame Lengths for timbered areas than in the Livingston and Woodville Zones.

One hour fine dead fuel moisture down to 6%. 100 & 1000 hour fuels are ranging 12 to 18%. KBDI has dropped due to yesterdays rain, ranges: 450 (2 counties) - 730, with only 10 counties over 700.

Extensive mop up is required, as the 100's and 1000's have still pretty low fuel moistures, as they did not absorb as much from the rainfall.

Most spotting is well less than 100 feet, but could get under rare circumstances up to 0.1 miles.

Forecasted ERC: Linden ERC 33 (90%-37/97%-40), Conroe ERC 37 (90%-34/97%-38)

**AIR OPERATIONS:** Possible fog first thing from Vicinity I-20 southward to TX 105, burning off by 0900-1000. Otherwise no foreseen weather issues for air ops.

**FIRE BEHAVIOR SAFETY:** In Grass fuels don't be complacent with the recent rains- they dry out quickly and will respond favorably to any ignitions.

# HEALTH AND SAFETY MESSAGE

INCIDENT: Southeast TX Fire Complex

DATE: Monday, October 24, 2011

TIME: Day Shift

## **Major Hazards and Risks:**

### **Common Denominators of Tragic Fires**

COMMON DEMONINATOR of a TRAGEDY = I didn't think it would happen to me; the specter of COMPLACENCY says to you: "Hey this is no problem, nothing is happening here, it's just a holding action, or mop-up, you've done it this way 250,000 times before, and it's so much easier." **YOU ARE SETTING YOURSELF UP.**

**Now** (not during an accident review) is the time to review what you are doing, and how you are doing it. Ask yourself (& others):

- \*\*\* What am I doing? Am I involved with high risk/low frequency events (not done often)?  
Have I done a LOOK UP-LOOK DOWN- LOOK AROUND? What is predictable here? How is it preventable?  
Have I done a RISK assessment of where I'm working?
- \*\*\* Have I identified hazards and unsafe behaviors?  
Have I reviewed the 215a?  
What have I done to mitigate or eliminate them?
- \*\*\* Have I reviewed the Fire Orders?  
Have I identified WATCH OUT situations?  
Have I told others what and where they are, and how to avoid or eliminate them?

YOU need to take good care of yourself: drink plenty of water, get adequate rest. YOU are the most valuable resource we have to protect.

Remember OUR GOAL: put the FIRE, Medical Unit, Comps/Claims Unit, and Safety

**OUT-OF-BUSINESS**

Tom Krueger & Dave Bostic

## **DEMOB PROCEDURES FOR THOSE THAT TRAVEL BY AIR**

Check the Demob list in the IAP. Verify with your supervisor that your TRAVEL DAY is correct. If not, coordinate with the DEMOB UNIT. Five days prior to your TRAVEL DAY, submit the completed "Air Travel Request" (ATR) to the DEMOB UNIT in person or by FAX (936-632-1372). The ATR is provided in the IAPs or through the DEMOB UNIT. Be sure to provide personal contact information on the ATR so that the DEMOB UNIT can call in order to give you your flight arrangements. It is expensive and time consuming to change flight arrangements once they have been made, so make sure to provide the correct information on the ATR.

## **IMPORTANT SHUTTLE INFORMATION**

Airport shuttle from the ICP leaves at 0800 and 1800.

If your flight departs before Noon on your travel day, you **MUST** start your DEMOB PROCESS by 1600 on your last work day (the day before your travel day). You will then be transported by the 1800 airport shuttle to a motel in the vicinity of the airport, where you will rest overnight.

The motel will provide you a ride to the airport the next morning. You should arrange to be at the airport two hours in advance of your departure time.

If your flight departs after Noon on your travel day, you should start your demob process the evening of your last work day. The next morning, the 0800 airport shuttle will deliver you to the airport in time for your departure flight.

**Trainees - If you need assistance in getting your tasks checked off in your PTB, we can help. Our goal is to ensure that you experience a quality training assignment. If you have questions or need assistance, please give us a call.**

## **TSA ALERT**

### **HAZARDOUS MATERIALS**

**Items such as fusees, hand thrown igniters, pistol rounds and other firefighting ignition devices have been found in checked bags and carry-on luggage.**

**Please ensure you remove all ignition devices and any other prohibited items from your bags before arriving at the airport**

**There have been multiple instances of firefighters being detained at airports this year in various parts of the country.**

**Serious consequences for violations include possible loss of personal flying privileges and/or jail time.**

**DEMOB PLANNER 10/24/11 - 10/28/11**

AIR TRAVELLERS PLEASE CONTACT DEMOB 5 DAYS PRIOR TO TRAVEL DAY TO SUBMIT AIR TRAVEL REQUEST.

REMOTE DEMOBS MUST SUBMIT A GENERAL MESSAGE TO DEMOB THROUGH YOUR RFC REQUESTING TO REMOTE DEMOB UNIT AT LEAST 3 DAYS PRIOR YOUR RELEASE/DEMOB DATE.

## EXTENSION FORM INSTRUCTIONS

### PLEASE PRINT LEGIBLY ON THE EXTENSION FORM

#### To be completed by the resource who has been asked to extend

1. Write in the Incident you are on (example SE Texas Fire Complex) on the first line AND the TX number beside it.
2. Fill in your name, O or E Number, Position, Assignment location, **your cell phone number**, your first day of work on the line, your 14th day on shift, how many shifts (1-14) you are available to extend, last day on shift if the extension is approved and the date you will demob and travel. Approvals of 8-14 additional working days require two days of R&R before your 22<sup>nd</sup> shift following Section Chief, Regional Fire Coordinator, IC and home unit concurrence.

**Note: If you are filling out an extension form for an engine or dozer crew, you must list the name and the request number for each member of the crew who is requesting an extension.**

3. **Sign the form** on the second line (labeled “Resource Signature”).
4. Fill in the fax number, office number, and name of your supervisor at your home unit on the bottom of the form.
5. Deliver or fax the form to the Demod **fax number at 936-632-1372**
6. At the Lufkin ICP, we will obtain the signature of the Section Chief and the IC and fax it to your home unit. The home unit will get with the resource’s supervisor for approval/disapproval signature and fax it back to Lufkin Demob. As this process will take a day or two, we ask you to start this process five days prior to your 14th day on shift. This is necessary because of the number of approvals required and time needed to order replacement resources if the extension request is denied.
7. After all the required signatures are obtained, we will notify you via your contact phone number and notify the section for which you work.
