To: All Incident Personnel, Southeast Texas Fire Complex

As Southern Area National Type II Incident Commander, I am committed to a policy of "zero tolerance" of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of "NO ALCOHOL" from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so as well.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. Finally, we endorse the attitude and work ethic that places "Safety First, every time on every Incident." We expect nothing less.

/s/ Mike Dueitt

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #53	TYPE OF FIRE: Wildland
FIRE NAME: Southeast Texas Fire Complex	OPERATIONAL PERIOD: 10/27 THURSDAY Day Shift
DATE ISSUED: 10/26/2011	TIME ISSUED: 1900
UNIT: Texas Forest Service	SIGNED: <i>Isl Mark Clere</i> Mark Clere, FBAN 352.454.5350 Gary Jarvis, Field FBAN 202.379.6993

FUEL ASSUMPTIONS: The major fuel types found in the SE Texas Complex are fuel model TU3 (moderate timber understory), Fire Behavior Prediction System Fuel model 9 and grass fuel model 1. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy. Young pine plantations may react similar to a brush model due to low live fuel moistures. There are also areas with slash from logging operations.

WEATHER SUMMARY: Also refer to Weather Forecast: Frontal passage today – rain ahead of the front and trailing behind it allows for amounts as much as 0.4 - 0.8” in Linden diminishing to 0 - 0.15” in the South. Friday chance for Precip. in morning and RH 10-25% less than yesterday.

SE Texas Complex General Fire Behavior Forecast: Drought condition still persist across the zone. Live fuel moistures continue to be extremely low making the live scrubs and trees available to burn. Be very cautious when critical fire behavior thresholds are exceeded. When thresholds are exceeded fires will become very resistant to control with ground resources and will require the combination of aerial and ground resources to be effective in controlling fires.

**Critical fire behavior thresholds: (Temp >90°, RH < 30%, Winds > 10 mph).
Threshold for Winds met in all zones**

Specific:

Linden, Henderson, Livingston and Woodville Dispatch Zones

Grass fuels are cured and will support high rates of spread. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy. Fire will easily spread into the canopy when latter fuels are present; expect long range spotting when this occurs.

Fuel Type	Rates of Spread	Flame Length	Max. Spotting Distance	Probability of Ignition	Torching / Crowning Potential / Flame Lengths
Winds at 7-14, G 20 mph @ 20'					
Grass Fuels	0, G 0 ch/hr.	0 feet	zero	26	NA
Southern Rough	5-23, G 44 ch/hr.	1 - 6 feet	100'		Not Likely
Timber Litter	1, G2 ch/hr.	1 - 2 feet	50'		Not Likely
Small Pine Plantation	5-13, G 33 ch/hr.	4 - 7 feet	100'		Not Likely

The above table reflects ZERO rainfall with only cloud cover and RH effects on fuels, As rain occurs values move towards zero in all fuels.

Prior to rain occurring the rise in RH will dampen potential of new starts way down. Once rain occurs potential of spread diminishes greatly once area receives 0.05” of rain.

The far south will have drier fuels into later in the day, so should a fire occur vicinity of HWY 105 or US 90 and southward, it could burn slightly better than table shows above.

One hour fine dead fuel moisture might get down to 13% in north & 12% in the south. 100 & 1000 hour fuels are ranging 13 to 19%. KBDI range: 450 (2 counties) - 730, with only 10 counties over 700; Most of the counties are above 575.

Weather will work with most mop-up needs except in heavies, and the duff layer as you move south. Most spotting today will be less than 10 feet, but could get under rare circumstances up to predicted.

ERCs remain near 90th percentile. Forecasted ERC: Linden ERC 29 (90%-37/97%-40), Conroe ERC 28 (90%-34/97%-38)

AIR OPERATIONS: Low clouds, thunderstorms, wind gusts.

FIRE BEHAVIOR SAFETY: Thunderstorm Safety practices. Muddy conditions on fire lines.

Reference: 80 chains = 1 mile, 120 = 1.5, 160 = 2, 200 = 2.5, 240 = 3, 280 = 3.5, 320 = 4, 360 = 4.5, 400 = 5 miles

HEALTH AND SAFETY MESSAGE

INCIDENT: Southeast TX Fire Complex

DATE: Thursday, October 27, 2011
TIME: Day Shift

Major Hazards and Risks:

Travel and Change

If you are leaving, read this...

Your assignment doesn't stop when you walk away from demob. Your final assignment is to arrive safely at home. The 2-to-1 work-rest policy applies.

- * Drive defensively. Human nature ensures we are less patient when driving home, don't let impatience cause unsafe behavior.
- * No driver will drive more than 10 hours within any duty-day.
- * Multiple drivers in a single vehicle may drive up to the 16 hours limitation provided no driver exceeds the individual driving time limitation of 10 hours.
- * Do not drive past 2200 hours. Do not eat and drive at the same time.
- * Don't use the cell phone while driving, pull off the road or call during your stretch breaks.

If you are staying, read this...

Common Denominators of Fire Behavior on Tragedy Fires: Tragedies have occurred in periods of reduced fire activity, transitions, and mop-up stage. Maintain your situational awareness. Focus on your assignment. Manage distractions.

Communications: As the transition takes place, the need to effectively communicate on the fire is important. Take personal responsibility to ensure that people you interact with know what they need to know. Transition brings new faces and different ways of communicating. Make it work.

We look forward to seeing you on a future assignment with the SAIMT.

Tom Krueger, Mike Cook & Dave Bostic

Southern Area Type II IMT, Safety Officers

DEMOB PROCEDURES FOR THOSE THAT TRAVEL BY AIR

Check the Demob list in the IAP. Verify with your supervisor that your TRAVEL DAY is correct. If not, coordinate with the DEMOB UNIT. Five days prior to your TRAVEL DAY, submit the completed "Air Travel Request" (ATR) to the DEMOB UNIT in person or by FAX (936-632-1372). The ATR is provided in the IAPs or through the DEMOB UNIT. Be sure to provide personal contact information on the ATR so that the DEMOB UNIT can call in order to give you your flight arrangements. It is expensive and time consuming to change flight arrangements once they have been made, so make sure to provide the correct information on the ATR.

IMPORTANT SHUTTLE INFORMATION

Airport shuttle from the ICP leaves at 0800 and 1800.

If your flight departs before Noon on your travel day, you **MUST** start your DEMOB PROCESS by 1600 on your last work day (the day before your travel day). You will then be transported by the 1800 airport shuttle to a motel in the vicinity of the airport, where you will rest overnight.

The motel will provide you a ride to the airport the next morning. You should arrange to be at the airport two hours in advance of your departure time.

If your flight departs after Noon on your travel day, you should start your demob process the evening of your last work day. The next morning, the 0800 airport shuttle will deliver you to the airport in time for your departure flight.

Trainees - If you need assistance in getting your tasks checked off in your PTB, we can help. Our goal is to ensure that you experience a quality training assignment. If you have questions or need assistance, please give us a call.

HAZARDOUS MATERIALS

Items such as fusees, hand thrown igniters, pistol rounds and other firefighting ignition devices have been found in checked bags and carry-on luggage.

Please ensure you remove all ignition devices and any other prohibited items from your bags before arriving at the airport

There have been multiple instances of firefighters being detained at airports this year in various parts of the country.

Serious consequences for violations include possible loss of personal flying privileges and/or jail time.
