40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. A full suppression strategy has currently contained much of the fire spread. Spotting and extremely dry conditions make overall control difficult. Highly political fire due to its proximity to Austin and because it is burning next to the 2011 Bastrop fire scar that destroyed hundreds of homes. Additional safety concerns with high volume of traffic on Hwy 71 bordering fire edge.										
41. Planned Actions for Next Operational Period: Continue direct suppression operations; limit structure loss; continue to monitor and recheck structures within the burned area; continue to improve control line; patrolling.										
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):										
43. Anticipated Incident Containment or Completion Date: 10/23/2015										
44. Projected Significant Resource Demobilization Start Date:										
45. Estimated Incident Costs to Date: \$0.00										
46. Projected Final Incident Cost Estimate: \$0.00										
47. Remarks (or continuation of any blocks above – list block number in notation): Evacuation numbers for homes are estimates only.
