Incident Status Summary (ICS-209)

Incident: **Hidden Pines**

Creeping

Narrative:

Given the elevated fine fuel moisture and significant cloud cover today, the Probability of Ignition (PIG) is 40%, so new fire activity is unlikely. Expect continued smoldering of snags, stumps and heavy downed fuels throughout the day.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)
Short Grass (1 foot)
Tall Grass (2.5 feet)**

Narrative:

Clouds and RH are on the rise but winds will increase and overall fuel dryness is extreme.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

36.	Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:
12 hours:	Minimal fire growth is projected outside containment lines; Unburned/partially burned fuels interior will continue to ignite and burn causing potential for surface fire, torching and spotting with forecasted winds.
24 hours:	Minimal fire growth is projected outside containment lines; Unburned/partially burned fuels interior will continue to ignite and burn causing potential for surface fire, torching and spotting with forecasted winds.
48 hours:	
72 hours:	
Anticipated after 72 hours:	

37.	Strategic Objectives (define planned end-state for incident): Ensure public and firefighter safety throughout the incident. Continue suppression operations to limit structure loss and negative impact to environmentally sensitive areas. Continue to establish control lines Convey damage assessment to Bastrop County for analysis of loss. Maintain open communications with public and media. Assess and implement erosion control measures.
-----	---

38.	Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
12 hours:	Continued threat to approximately 95 homes inside burned area. Buesher State Park and MD Anderson Research Facility remain closed to public access.
24 hours:	Continued threat to approximately 95 homes inside burned area. Buesher State Park and MD Anderson Research Facility remain closed to public access.

Incident Status Summary (ICS-209)

Incident: **Hidden Pines**

48 hours:	Continued threat to approximately 95 homes inside burned area. Buesher State Park and MD Anderson Research Facility remain closed to public access.												
72 hours:													
Anticipated after 72 hours:													
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:													
12 hours:	No critical unmet needs at this time.												
24 hours:	No critical unmet needs at this time.												
48 hours:													
72 hours:													
Anticipated after 72 hours:													
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: <ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. A full suppression strategy has currently contained much of the fire spread. Spotting and extremely dry conditions make overall control difficult. Highly sensitive fire due to its proximity to Austin and because it is burning next to the 2011 Bastrop fire scar that destroyed hundreds of homes. Additional safety concerns with high volume of traffic on Hwy 71 bordering fire edge.													
41. Planned Actions for Next Operational Period: Continue direct suppression operations; limit structure loss; continue to monitor and recheck structures within the burned area; continue to improve control line; mop-up around homes and structures; assess and implement erosion control measures; patrolling.													
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): 4,582													
43. Anticipated Incident Containment or Completion Date: 10/23/2015													
44. Projected Significant Resource Demobilization Start Date:													
45. Estimated Incident Costs to Date: \$811,815.00													
46. Projected Final Incident Cost Estimate: \$0.00													
47. Remarks (or continuation of any blocks above – list block number in notation): Fire area has been reopened to residents.													
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
