28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):														

Incident Status Summary (ICS-209)

Incident: **Harvey - Team 2**

Narrative:
Receiving, mobilizing and demobilizing various first responders and other personnel. Facilitating the operations at the Beaumont Resource Staging Area(RSA)and distributing Commodities through Points of Distribution(POD)in Jefferson, Hardin, Orange, Chambers and Liberty Counties in East Texas.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):
 Narrative:
Driving, Hazardous waste, Contaminated flood waters, Storm debris, Heat stress

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): Information not applicable under the scope of the IMT's delegation of authority and associated mission tasking.	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

their habitat due to flooding. Cooler and drier conditions will persist the next few days, however potential for dehydration and heat related illness still exists.		Active?
<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):</p> <p>A strong cold front has passed south through Southeast Texas, cooler and dry weather looks to dominate the weather pattern over the next several days. High temperatures look to top off in the middle 80s, while low temps will be in the lower 60s. Mostly sunny to sunny skies also look to be around, keeping rain chances down as well.</p>	B. Potential Future Threat

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	SA IMT to maintain oversight and management of the Beaumont RSA at the Ford Arena. Provide logistical support (inclusive of catering services, mobile shower units restroom facilities) for numerous first responders and RSA management personnel. Continued inventory of commodities received at the Beaumont RSA and coordination of the shipment of commodities to requesting Points of Delivery (PODs).
24 hours:	Continued management of the Beaumont RSA. Continue to inventory and deploy commodities and provide accounts to the State Operations Center (SOC) upon request. Continue to establish additional logistical support to enhance the safety and efficiency of the operations supported by the RSA.
48 hours:	Continued management of the Beaumont RSA. Continue to inventory and deploy commodities and provide accounts to the State Operations Center (SOC) upon request. Maintain logistical support to enhance the safety and efficiency of the operations supported by the RSA.
72 hours:	Continued management of the Beaumont RSA. Continue to inventory and deploy commodities and provide accounts to the State Operations Center (SOC) upon request. Maintain logistical support to enhance the safety and efficiency of the operations supported by the RSA.
Anticipated after 72 hours:	

37. Strategic Objectives (define planned end-state for incident):
Provide for the continued safety and support of victims in the devastated areas across SE Texas.
Provide guidance for commodity distribution and RSA support.
Provide guidance to jurisdictions concerning POD needs and locations.
Manage operations in a safe, accountable and cost effective fashion.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other

Incident: **Harvey - Team 2**

	critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
12 hours:	Continued flooding will present risks to both responders and the public. Hot and humid conditions will enhance the risk of heat related illness and dehydration. Loss of critical infrastructure will hamper many support functions in the most affected areas.
24 hours:	Continued flooding will present risks to both responders and the public. Hot and humid conditions will enhance the risk of heat related illness and dehydration. Loss of critical infrastructure will hamper many support functions in the most affected areas.
48 hours:	Continued flooding will present risks to both responders and the public. Hot and humid conditions will enhance the risk of heat related illness and dehydration. Loss of critical infrastructure will hamper many support functions in the most affected areas. Potential for additional rainfall may prolong flooding conditions and hamper rescue, recovery and restoration missions.
72 hours:	Continued flooding will present risks to both responders and the public. Hot and humid conditions will enhance the risk of heat related illness and dehydration. Loss of critical infrastructure will hamper many support functions in the most affected areas. Potential for additional rainfall may prolong flooding conditions and hamper rescue, recovery and restoration missions.
Anticipated after 72 hours:	
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	
24 hours:	
48 hours:	
72 hours:	
Anticipated after 72 hours:	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: <ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. In coordination between Texas Forest Service, FEMA, the Texas National Guard, the Southern Area IMT is assuming management and oversight of the Beaumont RSA. Absence of water utilities due to disruptions from the hurricane are creating some constraints for providing optimum logistical support.	
41. Planned Actions for Next Operational Period: Refer to specifics noted in block 36.	
42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):	
43. Anticipated Incident Containment or Completion Date: 09/30/2017	
44. Projected Significant Resource Demobilization Start Date:	
45. Estimated Incident Costs to Date: \$769,000.00	
46. Projected Final Incident Cost Estimate:	
47. Remarks (or continuation of any blocks above – list block number in notation): The Southern Area IMT in cooperation with Texas Forest Service, FEMA, and the Texas National Guard continues to manage and support the functions of the Beaumont RSA and PODs in Southeast Texas. The SA IMT, State, County, Military and	

Incident Status Summary (ICS-209)

Incident: Harvey - Team 2

FEMA representatives and resources are working closely in a coordinated effort to establish efficient support to PODs and first responders. The Southern Area IMT is providing logistical support for the Beaumont RSA which is currently staging approximately 250 persons assigned to EMS Services, 1500 military personnel and several responders and law enforcement officials from the State of Texas. The Beaumont RSA is currently supporting 22 POD locations in Jefferson, Liberty, Chambers, Orange and Hardin Counties in Southeast Texas. For the current reporting period the Beaumont RSA has received the 35 trailers of MREs, 28 trailers of Ice and 55 trailers of water. Commodities processed out to various PODs during the current reporting period consist of 1 trailer of cots, 13 trailers of MREs, 5 trailers of ice and 20 trailers of water. Since the Southern Area IMT assumed command of the Beaumont RSA, cumulative totals of commodities processed to PODs consist of the following numbers of trailers: Blankets 1, Cots 3, MRE's 53, Ice 53 and 78 Water.
