SAFETY MESSAGE

Incident:

Harvey Team 3 – Jefferson County Operations

Date: 9/7/2017

Time: 0700–2100

Major Hazard and Risks:

- **Vehicle Traffic/Roads**
- **Contamination(Flood Waters) and Personal Hygiene**
- **Heat, Humidity, and Sun Related Risks**
- **Public**
- **Thunder Storms**

Narrative:

- Take time and drive at a safe speed. Also, keep vehicles on paved surfaces. The ground is very soft and may not hold vehicle up. More and more traffic is on the road. Take precautions when parking, turning around, and working on roads and in parking lots. Also many roads have been flooded, watch out for roads that may be washed out or undercut that are not safe for travel.
- Avoid direct skin contact with contaminated water to prevent possible illness or infections. Stay out of contaminated water if at all possible. If you must get in the water, wash as soon as possible after any contamination. If no water use Clorox wipes and antibacterial liquid. Avoid hand to mouth contact during field operations. While doing assessments in the county, wear rubber boots and latex/rubber gloves to avoid contact with contaminated water, debris, or structures.
- Problems with heat and the sun can sneak up on you. Be sure to keep hydrated and use sunscreen and wear you cover (hat). Each of us is a field safety officer. Keep an eye on others and watch for signs of any heat /sun problems. **Remember to drink three waters per one sports drink!**
- Do not take matter in your own hands, if you encounter disgruntled citizens notify Law Enforcement.
- Thunderstorms can move quickly in affected area. Observe the 30 minute rule. If you hear thunder, lightning danger persist for 30 minutes after. Move to a designated area.
- Adhere to the 2 to 1 work/rest ratio
- Maintain Situation Awareness!

Hurricane Harvey made landfall on Friday August 25th at 10 pm as a Category 4 hurricane. The South Carolina Forestry Commission's (SCFC) Type 3 Incident Management Team (IMT) was requested to provide support and assistance to Jefferson County for logistical needs of life sustainability (food, water, and facilities). The IMT is working under the jurisdiction of the Texas A&M Forest Service with Jefferson County officials.

SCFC's Incident Management Team works regularly with various organizations on training events and real-world disasters helping them to apply the principles of the Incident Command System framework. ICS is now widely adopted as the most effective organizational structure for both emergency situations and planned events. The only Type 2 IMT in the state, the Forestry Commission's team is the most highly qualified in the state. The team is currently deployed as a Type3 IMT as an out of state deployment.
