Jefferson County Supported Shelters & Distribution Sites Support Information: Current support available:

- Water
- Ice
- MRE (Meals Ready to Eat)

###

Hurricane Harvey made landfall on Friday August 25th at 10 pm as a Category 4 hurricane. The South Carolina Forestry Commission's (SCFC) Type 3 Incident Management Team (IMT) was requested to provide support and assistance to Jefferson County for logistical needs of life sustainability (food, water, and facilities). The IMT is working under the jurisdiction of the Texas A&M Forest Service with Jefferson County officials.

SCFC's Incident Management Team works regularly with various organizations on training events and real-world disasters helping them to apply the principles of the Incident Command System framework. ICS is now widely adopted as the most effective organizational structure for both emergency situations and planned events. The only Type 2 IMT in the state, the Forestry Commission's team is the most highly qualified in the state. The team is currently deployed as a Type3 IMT as an out of state deployment.
