To: All Incident Personnel, Mallard Fire 2018

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Cloud cover will provide for some reduction in fire activity, however, weather and fuel conditions will continue to support very active and extreme fire behavior.

Expect ROS up to 120 chains per hour where juniper with grass understory are continuous, with flame lengths near 24 feet and up to 160 chains per hour in grass and shrub fields with flame lengths up to 13 feet.

Spotting distances up to 0.5 miles. Probability of Ignition of 87%

SPECIFIC:

Division G: South winds will support flanking and head fire across the division, where fuels are continuous ROS from above are likely.

Division I: Where there is not good black, continued flanking and some head fire is expected to move northward toward Hwy 287. There is potential for some impacts to the community of Goodnight.

Division N: Expect continued active and extreme fire behavior and fire spread with a combination of flanking and head fire moving to the north and northeast across the division.

Division U: Flanking and head fire will continue to move north and northeast across the division

IWI IC Responsibilities:

** Special instructions for Emergency Communications: If you are unable to contact Comms on radio call 601-331-6597 OR 911 **

Medical person providing care must request type of transportation as early as possible (ie:air or ground)

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, Fish Meadows medical, Highway 21 accident.
- Assign or begin patient assessment and first aid. Request additional medical resources on division/branch or across incident as early as possible Transmit patient information to Communications using Medical Incident Report on back
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

HEALTH AND SAFETY MESSAGE

“We don’t plan on luck to be safe, we plan on sound risk management and good decisions”....the Red Team

INCIDENT: Mallard Fire

DATE: Sunday May 13, 2018

Major Hazards & Risks: Driving, Fire Behavior, Heavy Equipment, Aviation

Driving: *Distracted driving causes approximately 400,000 accidents per year. Driving distracted on these roads could be your greatest hazard. Make sure to **buckle your seat belts, clear dashes, clear windshields, and turn on lights.** Plan for sufficient time to drive safely and watch for wildlife. Just because the speed limit is 75 – 80 MPH doesn’t mean you have to drive that fast.*

Fire Behavior: *Fuels are continuous, heavy and very dry because of recent high temperatures and low relative humidities. Expect more extreme fire behavior today. **This fire is burning very active and growing aggressively.** Beware of possible thunderstorms with down burst winds and dry lightning. Remain diligent to maintain L.C.E.S. as you move around the fire.*

Heavy Equipment: *There is a lot of iron moving around the fire. Drive carefully and defensively. Anticipate encountering heavy equipment when rounding blind corners and driving on the fire line. Follow IRPG pg. 86 “Working around Heavy Equipment”.*

Aviation: *Numerous aircraft (SEATS, air tankers and helicopters) will likely be operating over the fire area. This is a good time to mentor those that will become our future leaders in directing and working around aircraft.*

Life First

- **Everyone goes home**
 - Safely after every assignment
- **Risk Management**
 - Eliminate unnecessary exposure
 - Do not engage without the greatest margin of safety
 - Assure a high probability of success
 - Make sure risk is commensurate with values threatened

Practice - “Stop, Think, Talk before you Act”.

Safety Officers: Brad, Mike, Joe, Chris, Phil, Warren, and Nick

HAVE A RENTAL CAR?

Please remember to call and extend your rental if you will be staying past your original return date/time.

Also, ask the rental company if there is a return fee to Amarillo or Lubbock instead of your original location so you can do a cost comparison before you demob and fly home. Be sure to break out the return fee from the additional cost of extending your rental period. Do not commit to doing so until you get the okay from demob.

This only applies to non-RSVP rental vehicles. We are checking on RSVP vehicles so will let you know about those when that information is confirmed.

Give demob your information at least 4 days before you plan to fly so we can get a decision made on a rental return location and plan your trip home accordingly. Thank you!
