To: All Incident Personnel, Mallard Fire 2018

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

Incident Commander

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 4	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Mallard Complex	<b>OPERATIONAL PERIOD:</b> May 12 Night Shift
<b>DATE ISSUED:</b> May 12 2018	<b>TIME ISSUED:</b> 1500
<b>UNIT:</b> TX-TFS	<b>SIGNED:</b> <u>Alison Coons</u> / <i>Alison Coons</i>

### **WEATHER SUMMARY:**

Mostly clear and breezy with south winds 15-20 and gusts to 25. RH recovery of 65-75% expected to be the highest from midnight to near 5 A.M. Temperatures will drop into the low 60.

## OUTPUTS

### **FIRE BEHAVIOR**

#### **GENERAL:**

High winds with gusts to 25 will continue to support extreme fire behavior throughout the night.

Expect ROS up to 400 chains per hour ( 5 miles per hour) where juniper with grass understory are continuous, and near 300 chains per hour in grass and shrub fields. Flame lengths near 35 feet through early evening.  
Some reduction in spread and flame length may occur when winds drop slightly and RH increases early AM.  
Slight shifts in wind direction may cause sudden change in fire direction.

Spotting distances up to 1.3 miles. Probability of Ignition of 70%

#### **SPECIFIC:**

Division C: Active fire remains mostly in the Gip Creek drainage, however, flanking fire is likely if/when the fire is able to establish on high ground.

Division G: South winds will support flanking and head fire across the division.

Division N: Expect continued extreme fire behavior and fire spread to the north and northeast across the division.

Division U: Flanking and head fire will continue to move north and northeast across the division

#### **AIR OPERATIONS:**

\*\* Special instructions for Emergency Communications: If you are unable to contact Comms on radio call 601-331-6597 OR 911 \*\*

\*\*Medical person providing care must request type of transportation as early as possible (ie:air or ground)\*\*

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, Fish Meadows medical, Highway 21 accident.
- Assign or begin patient assessment and first aid. Request additional medical resources on division/branch or across incident as early as possible Transmit patient information to Communications using Medical Incident Report on back
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

## HEALTH AND SAFETY MESSAGE

*“We don’t plan on luck to be safe, we plan on sound risk management and good decisions”....the Red Team*

<b>INCIDENT:</b> Mallard Fire	<b>DATE:</b> Saturday May 12, 2018 - Night
<b>Major Hazards &amp; Risks:</b> Driving, Fire Behavior, IWI, Power lines	
<p><b>Driving:</b> <i>Distracted driving causes approximately 400,000 accidents per year. Driving distracted on these roads could be your greatest hazard today. Make sure to <b>buckle your seat belts, clear dashes, clear windshields, and turn on your lights.</b> Plan for sufficient time to drive safely and watch for wildlife.</i></p> <p><b>Fire Behavior:</b> <i>Fuels are continuous, heavy and very dry because of recent high temperatures and low relative humidities. Do not expect night weather to slow fire activity. <b>This fire is burning very active and growing aggressively at night.</b> Identify escape routes, safety zones and lookouts as you move around the fire; check communications frequently with other resources and lookouts.</i></p> <p><b>Incident Within An Incident:</b> <i>Take time to make a plan to respond to a medical emergency tonight. Follow the steps in your IRPG or the IAP medical plan. If you can’t reach Mallard ICP communications on the radio, call them at 601 331-6597.</i></p> <p><b>Power lines:</b> <i>Power lines are numerous in parts of the fire area. After yesterday and today they may be down or compromised and difficult to see at night. For more information about power line safety, consult your IRPG.</i></p>

## HAVE A RENTAL CAR?

Please remember to call and extend your rental if you will be staying past your original return date/time.

Also, ask the rental company if there is a return fee to Amarillo or Lubbock instead of your original location so you can do a cost comparison before you demob and fly home. Be sure to break out the return fee from the additional cost of extending your rental period. Do not commit to doing so until you get the okay from demob.

This only applies to non-RSVP rental vehicles. We are checking on RSVP vehicles so will let you know about those when that information is confirmed.

Give demob your information at least 4 days before you plan to fly so we can get a decision made on a rental return location and plan your trip home accordingly. Thank you!
