To: All Incident Personnel, Mallard Fire 2018

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Mike Dueitt

Incident Commander

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

Moderate winds, with gusts to 25, will allow the continuation of very active to extreme fire behavior throughout the night. Chance for thunderstorms with extreme outflows creates the opportunity for more wind-driven runs.

If fire remains established in unburned fuels:

Two-fuel model (grass and brush): Expect ROS of 115 chains per hour, up to 1.5 miles per hour with flame lengths near 25 feet at the head of the fire. These numbers are good mostly for the canyon fuels.

Outside canyons, pure grass: Look for ROS near 130 chains per hour. Flame lengths about 20 feet.

Spotting distances up to 0.6 miles. Probability of Ignition near 67%

#### SPECIFIC:

Spotting chances continue through the night. Winds are conducive for channeling fire up-canyon in Mulberry Canyon. Infrastructure concerns continue across the fire area.

#### AIR OPERATIONS:

## SAFETY

Strong down drafts from Thunderstorms call for FAST access to safety zones.

**IWI IC Responsibilities:**

\*\* Special instructions for Emergency Communications: If you are unable to contact Comms on radio call 601-331-6597 OR 911 \*\*

\*\*Medical person providing care must request type of transportation as early as possible (ie:air or ground)\*\*

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, Fish Meadows medical, Highway 21 accident.
- Assign or begin patient assessment and first aid. Request additional medical resources on division/branch or across incident as early as possible Transmit patient information to Communications using Medical Incident Report on back
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.
