

COPPER BREAKS

FIRE

TX-TXS-190226

VIVIAN FIRE

TX-TXS-190262

Sunday August 25, 2019

08:00 – 20:00

Email: 2019.copperbreaks@firenet.gov

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
COPPER BREAKS / VIVIAN	Date/Time From: 08/25/2019 0800 SUN	Date/Time To: 08/25/2019 2000 SUN
3. Objective(s):		
<p>Provide for firefighter safety through hazard assessments, application of sound risk management decisions, and deliberate mitigation actions. Minimize fire impacts to private lands and ranches around the perimeter, and provide structures protection as need. Operational strategies should include a risk assessment that weighs the values at risk vs. firefighter safety and exposure Manage the human resources assigned in a manner that promotes mutual respect, and is consistent with policy for preventing harassment. Maintain and enhance relationships with the surrounding communities and all cooperators by sustaining inclusive communication strategies and providing timely and accurate information to interested parties.</p>		
4. Operational Period Command Emphasis:		
<p>The overall objective for Copper Breaks and Vivian fire is full suppression of the wildfire. Limit further spread of fire on private lands. Assess and Protect structures as needed. Use suppression tactics that are commensurate with values at risk. Assist with initial response as requested by TFS. Leave Gates as you find them! Either closed or open. Document damage and report damage to fence and gates to Operations immediately, and make hasty repair as soon as possible to do so to prevent loss of livestock and mitigate for safety on roadways.</p>		
General Situational Awareness:		
<p>Elevated chance of extreme fire behavior based on the predicted temps above 100 degrees for the next two days. No chance of moisture until, possibly, Wednesday. In addition to the chance of more active fire, there is an increased chance of medical emergencies for personnel working under these conditions. Be alert to the weather, the fire, and your coworkers.</p>		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located at:		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

To: All Incident Personnel, Copper Breaks and Vivian Fire 2019

As Southern Area National Type I Incident Commander, I am committed to a policy of "zero tolerance" of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of "NO ALCOHOL" from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places "Safety First, every time on every Incident." We expect nothing less.

/s/ Mike Dueitt

Incident Commander

SAIMT 1

Fire Weather Forecast

FORECAST NO: 5
PREDICTION FOR: Sunday
OPERATIONAL PERIOD: August 25 2019
FORECAST ISSUED: 8/24/2019 at 1800

INCIDENT: Copper Breaks and Vivian
UNIT: TAMFS

Greg Murdoch
Incident Meteorologist: Greg Murdoch

**...HEAT ADVISORY IS IN EFFECT TODAY...
...NEAR CRITICAL FIRE WEATHER CONDITIONS...**

Weather Discussion:

Outflow winds are possible early this morning as storms move southeast across areas north of the Red River. High pressure will build back in place today and temperatures will soar to around 105 driving minimum humidity down to near 20 percent. A Heat Advisory is in effect. Low-level instability will be high and the Haines Index will be a 6. This combined sustained winds near 10 mph at times will result in **near critical fire weather today and Monday**. A cold front and associated wind shift is expected Monday evening with a change in weather following Tuesday.

WEATHER FORECAST

Today: **Near Critical Fire Weather Conditions**

Weather: Mostly sunny and much hotter.

High Temperatures: 104-106. Heat Advisory is in effect.

Min RH: 20-25%.

WINDS: SW-S 11-14 mph gusts to 25 mph til around 1 PM, then S-SE 7-10 mph gusts 21 mph. In the breaks there will be terrain driven winds 3-6 mph.

Chance of storms...0% **LAL...**1 **Haines Index...**6 (High)

Tonight:

Weather: Clear.

Low Temperatures: 76-80.

Max RH: 65-71%.

WINDS: SE 10 mph gusts to 18 mph in the evening, then SE-E winds 5 mph.

Chance of storms....0% **LAL...** 1 **Haines Index...**5 (Moderate)

Monday: **Near Critical Fire Weather Conditions**

Weather: Sunny and very hot.

High Temperatures: 105-109.

Min RH: 17-21%.

WINDS: SE 5 mph, increasing E-SE 8-11 with gusts 22 mph. In the breaks there will be terrain driven winds 3-7 mph. Shifting to the NE Monday evening.

Chance of storms...0% **LAL...**1 **Haines Index...**6 (High)

Outlook Tuesday:

Weather: Partly cloudy and cooler. A chance of storms, especially late.

High Temperatures: 87-91.

Min RH: 45%.

WINDS: NE winds 12-15 mph with gusts to 25 mph.

Chance of storms...30% **LAL...**3 **Haines Index...**4 (Low)

FIRE BEHAVIOR FORECAST

Incident Name	Copper Breaks / Vivian	Forecast Number	5
Operational Period	08/25/2019	Date/Time Issued	08/24/2019 1800
Unit	TX-TFS	Forecast by	Alison Coons FBAN Greg Titus FBAN(t)

FIRE BEHAVIOR DISCUSSION

GENERAL:

- Good evening relative humidity recovery last night will give a slow start for fire behavior today. As RH drops and temperature start to rise above 100° expect an increase in fire behavior if established in unburned fuels.
- Sheltered fuels will continue holding heat and may become active as hot and dry conditions return.

Probability of Ignition: 81%	Fuel Type(s)	Rates of Spread	Flame Length
Spotting Distance: Up to 0.3 miles with sustained winds, increase to 0.6 miles with gusts	Juniper and mesquite with grass understory	32 ch/hr with sustained winds, double the rate for predicted gusts	7-10 feet

SPECIFIC:

Copper Break: Minimal fire activity expected across fire area, weather conditions may cause previously undetected hot spots to show themselves.

Vivian: Remaining interior areas of heat are expected to rekindle as the day progresses. Remaining slash piles will continue to consume.

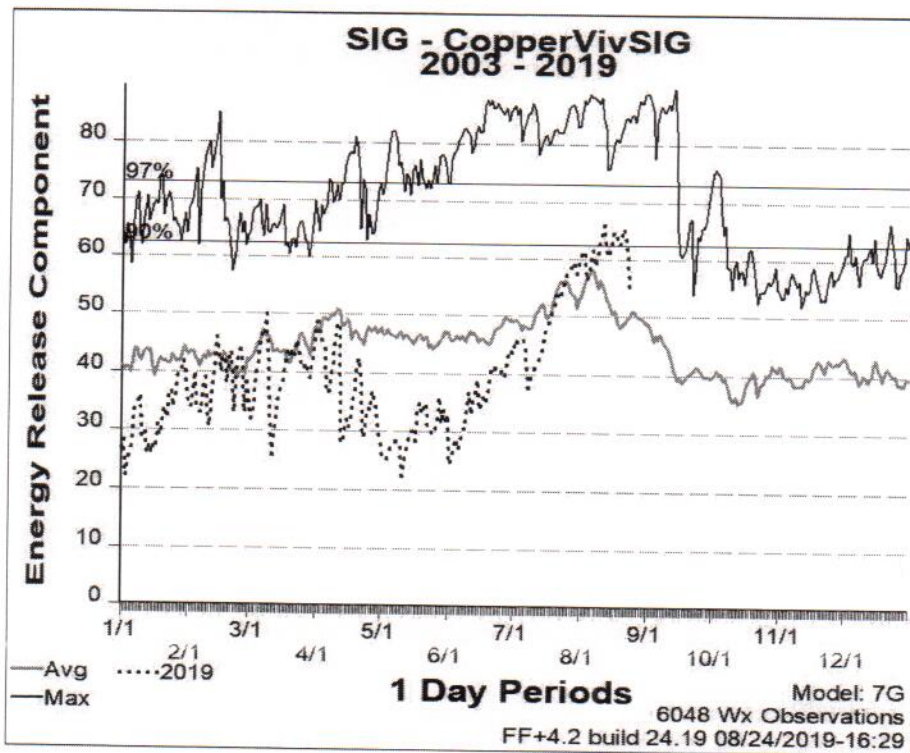

AIR OPERATIONS:

Winds gusting up to 25 mph may hamper air operations.

SAFETY: Keep hand moving when checking for heat in ash by sweeping. Do not place hand in ash and wait to see if there is heat, by the time you feel heat it will be too late and you will be burned.

ENERGY RELEASE COMPONENT GRAPH:

Energy Release Component (ERC) is a number related to the available energy (BTU) per unit area (square foot) within the flaming front at the head of a fire.

“SIG” includes data from the Matador and Miller Creek RAWS units from 2003 through yesterday.

Please send your fire behavior observations to: 2019.CopperBreaks.Situation@firenet.gov

6. Control Operations/Work Assignments:						
Task: Improve containment lines. Mop-up all heat that poses a threat to containment lines. Patrol containment lines.						
Purpose: To ensure fire doesn't escape.						
End State: To have secure line with no patrol.						
7. Special Instructions:						
AST 2-13 Ambulance David Allman (325) 733-7098 at staging.						
REM 2-10 Brant Frazier (940) 733-7882 in DIV S.						
DIVS will ensure that all personnel in their division leave the fire safely every night.						
Operational personnel will use the "Buddy" system to ensure everyone reaches their sleeping destination each night.						
Should an incident/accident occur, the "Buddy" will notify the appropriate supervisors up the chain of command.

IWI IC Responsibilities:

** Special instructions for Emergency Communications: If you are unable to contact Comms on radio call 911 **
 Medical person providing care must request type of transportation as early as possible (ie:air or ground)

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, Copper Breaks Fire medical, Highway 6 accident.
- Assign or begin patient assessment and first aid. Using the eight line in the Incident response pocket guide in the pink section page 118, Request additional medical resources on division/branch or across incident as early as possible Transmit patient information to Communications using Medical Incident Report on back
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move the deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.

HEALTH AND SAFETY MESSAGE

"We don't plan on luck to be safe, we plan on sound risk management and good decisions"the Red Team

INCIDENT: Copper Breaks Fire/Vivian Fire **DATE:** Sunday, August 25, 2019

Major Hazards & Risks: Driving, Heat, Complacency

Driving: Drive Defensively! Always drive at a speed that is appropriate for road conditions. Always use your seat belts. Fatigue is a driving hazard; take a rest break before driving back to staging or hotel.

Heat Advisory: We are expecting a Heat Advisory for the fire area today, with temperatures around 104 to 106. Drink plenty of fluids, and take breaks. **It is easier to recover from heat injuries if you catch the symptoms early. See insert below.**

Complacency: It may only take a day or two for complacency to settle in, but it only takes a minute or two for a fire to bust loose. Fire beats complacency every time. Don't let it settle in! Review the plan, look over your equipment, button up loose ends and be prepared!!!

Watch Out Situation of the Day

17.TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Are your instructions clear and understood?

Safety Officers: Brad Lidell, Tommy Hawkins, Jose Castro, James Ballard, Mike Cook, Ivan Cupp, Larry Connell

FINANCE NOTES

All resources need to check in with finance if you have not previously done so.

TFS has asked us to compile documentation to support the costs that will be charged to the **Copper Breaks** fire, which includes:

- Receipts for lodging, baggage, airfare, rental vehicles, and fuel for rentals.
- Mileage logs for agency vehicles (i.e., USFS, NPS or other non-TFS fleet)
- Rental agreements

Please have copies available when you come through demob. If you'd like to send receipts prior to demob, those can also be submitted via e-mail to:

2019 txtxs copperbreaks finance@firenet.gov. Please include associated request # and name on the submitted receipts.

All resources: **Please** submit shift tickets & CTRs to Finance **daily**, and include the name of the fire you & your equipment worked that day. On the day that you will be coming to **demob**, bring the signed CTRs/shift tickets for your last work day and planned travel.

If you are working with COMP on a claim, please ensure that you **print** your name legibly, include contact information (phone number/email), and provide photos to support the package.

Thank you for all of your continued hard work!

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE

"MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency) Report to Quannah Communications or 940-261-0667

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. <i>(WGS84)</i>
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
