Fire Weather Planning Forecast for Texas  
 National Weather Service Fort Worth TX  
 PRODUCED: 406 PM CDT Tue Mar 29 2022

A line of showers and thunderstorms is expected tonight along a dryline with most areas picking up at least some rainfall. The highest rainfall totals will be north of I-20 and east of I-35, with less than 0.25" of rain expected across Western Central Texas.

*The fire threat will pick up again [Today/ Wednesday] across Western Central Texas, where the least rainfall is forecast. Gusty west-northwest winds and humidity falling to between 25-35% is expected in the afternoon. Dry conditions are expected Thursday through the weekend and will continue to support grass fire spread. Moisture and rain chances will increase again early next week.*

### IWI IC Responsibilities:

Use VMED 28 to declare an emergency. Radio ICP Medical on COM1. Phone ICP Medical at 317-730-6653.  
If unable to reach Medical, call 911

1. Take charge of the scene – inform the Supervisor and Division Lead that you are the IWI IC and establish communications (frequency, channel)
2. Assign patient assessment and/or administer first aid. Use the Medical Incident Report in the pink section of the IRPG.
3. Determine the severity of the emergency (Red, Yellow, Green)
4. Request the type of transportation as early as possible, air or ground.
5. Relay exact location of the patient

## SAFETY MESSAGE/PLAN (ICS 208)

<b>1. Incident Name:</b> Eastland Complex	<b>2. Operational Period:</b> Date From: 03/30/22 Time From: 0600	Date To: 03/31/22 Time To: 0600
---	--	------------------------------------

**3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:**

With this incident winding down **driving** home or to new incident driving will be one of the most hazardous things we do. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

Take a good, hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances? Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15 to 20 minutes, we must develop techniques that allow us to refocus our attention on our driving.

Many things can lure our attention away from our driving, such as fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle, and music. Drive only when you are well-rested and alert, avoid driving during the hours from 2200-0600. Take a 10- to 15-minute break after every 2 hours.

Practice situational awareness be aware of what is happening in front, behind, and on both sides of your vehicle. Never drive when taking medications that make you drowsy.

Delegate navigation and communication to a passenger or pull over.

By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.

Avoid eating or drinking while driving.

When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.

Switch off driving with others if multiple people are in the vehicle.

Do not be in a hurry; be patient.

Safe driving starts with a safe vehicle. Something as simple as underinflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

**4. EVACUATION PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
