Extreme fire behavior with crowning in junipers, extreme rates of spread, spotting, torching and running surface fire.

33: Significant events today (closures, evacuations, significant progress made, etc.):

A spot fire occurred on the north side of the fire and grew significantly due to a wind event today. Rapid fire spread to the North and Northeast along the west side of Highway 377 forced mandatory evacuations of residents in an area north of the fire extending 2 miles west from Highway 377 miles and extending North to Interstate 10.

38: Actions planned for next operational period:

Crews will continue to construct control lines and provide structure protection.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Extreme**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

Suppression activities are being coordinated with the Texas Forest Service and local County resources.
