- 26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:
- 12 hours: Moderately slow fire spread to north and east. Continued fire movement to the south.
- 24 hours: Northeast winds will spread fire to the south and southwest. Continued slow fire spread to north, east, and west.
- 48 hours: East winds will spread to the west. Flanking and backing fires will continue to spread fire to north, east and south.
- 72 hours:
- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours: Natural resource values on refuge and Dismal Swamp State Park in North Carolina.
- 24 hours: Natural resource values and State Park property. Corp of Engineers infrastructure.
- 48 hours: Natural resource values and State Park property. Corp of Engineers infrastructure.
- 72 hours: Natural resource values and State Park property. Corp of Engineers infrastructure. Urban interface south of the State Park.
- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: ATGS 24 hours: ATGS 48 hours: 72 hours:

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Fire is reburning in South 1 fire scar from 3 years ago. Ample regrowth of brush and grasses, along with large amount of dead and downed fuel from the 2008 fire is fueling this fire. Fire moved to the south today and entered Dismal Swamp State Park. Fire is burning in areas of deep organic soil and during drought conditions, so dense smoke will likely be a public health and safety concern for the foreseeable future.

30: Observed Weather for Current Operational Period

Peak Gusts (mph): **16** Max. Temperature: **98**

Wind Direction: W Min.

Relative Humidity: 17

31: Fuels/Materials Involved: **4 Chaparral (6 Feet)**

Regrowth of brush and grasses along with large amount of dead and downed fuel from the 2008 fire is currently fueling this fire. Fire will burn into pine pocosin fuels during next burning period. Deep organic soils are present.

32: Today's observed fire behavior (leave blank for non-fire events):

Flame lengths up to 15 feet in brush/regeneration fuel model and up to 6 feet in southern rough. Rate of spread ranging from 4 chains/hour hardwood forest to 20 chains/hour in brush.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Fire moved south into North Carolina and Dismal Swamp State Park.

34: Forecasted Weather for next Operational Period 35: Estimated Wind Speed (mph): 3-8 36: Projected Final 37: Estimated Final Control Size: G16 Temperature: 88 Cost: Date and Time: Wind Direction: **NE** Relative Humidity: **37**

38: Actions planned for next operational period:

Continue water handling operation on Interior Ditch in DIV A. Continue line construction and improvement in DIVs B, C, and D. Conduct burnout operation if conditions permit.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - High

2. Difficulty of Terrain - High

40: Given the current constraints, when will the chosen management strategy succeed?

When the fire receives 6+ inches of rain.

41: Projected demobilization start date:

42: Remarks:

At 1330 hours estimate 4297 acres burned in Virginia and 408 acres burned in North Carolina. Unified command is being established with North Carolina.
