29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.)
Relate critical resources needs identified above to the Incident Action Plan.

Fire is burning in areas of deep organic soil under severe drought conditions. Dense smoke is likely be a public health and safety concern for the foreseeable future. Virginia DEQ issued a Code Orange air quality alert for particulates in Hampton Roads area for August 15.

30: Observed Weather for Current Operational Period Peak Gusts (mph): 17 Max. Temperature: 86 Wind Direction: NW Min. Relative Humidity: 38	31: Fuels/Materials Involved: 4 Chaparral (6 Feet) Pockets of brush and grass regrowth along with large a amount of dead and downed fuel from the 2008 fire is fueling this fire. Fire is slowly spreading into drought stressed hardwood fuels (Model 10)and deep organic soils.
---	--

32: Today's observed fire behavior (leave blank for non-fire events):
Flame up to 5 feet in brush/regeneration fuel model pockets and up to 6 feet in southern rough fuel pockets. Rates of spread from 2 chains/hour in hardwood forest to 10 chains/hour in brush.

33: Significant events today (closures, evacuations, significant progress made, etc.):

34: Forecasted Weather for next Operational Period Wind Speed (mph): 8G16 Temperature: 87 Wind Direction: NW Relative Humidity: 38	35: Estimated Control Date and Time:	36: Projected Final Size:	37: Estimated Final Cost:
--	--------------------------------------	---------------------------	---------------------------

38: Actions planned for next operational period:
Prepare, improve, hold, mop up, and patrol lines. Continue pumping water into Interior and Railroad Ditches in DIV A and and ditches in DIV B. Execute burnout in DIV D if conditions permit. Patrol and improve lines on North Bull spot.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?
When the fire area receives 6+ inches of rain.

41: Projected demobilization start date:

42: Remarks:
North Bull spot is located in Dismal Swamp State Park and suppression resources are assigned. 5050 acres burned in Virginia and 914 acres burned in North Carolina. Fire acreage reduced due to more accurate mapping.
