NPS: 4504 – F9FY – E11

FS: PRF9FY - 1502

INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared
	Lateral West	8/13/11	2100
4. Operational Period Day shift 0730-1930 August 14, 2011 Night Shift 1930-2400 and 0001-0730 August 15, 2011			
5. General Control Objectives For The Incident (Include Alternatives)			
<ol style="list-style-type: none"> 1. Provide for firefighter and public safety by adhering to LCES and the 10 standard fire orders. 2. Prevent fire from exiting Refuge boundaries. 3. Mitigate smoke impacts to adjacent communities (Hamptons Roads) by coordinating with state transportation and public health officials. 4. Minimize resource impact to include loss of organic soil or timber resources, which in turn will minimize smoke impacts to local communities. 5. Manage the fire cost effectively for the values at risk by using cost projections identified in the WFDSS as a baseline. 6. Provide for initial attack for additional fires that originate on the refuge. 			
6. Weather Forecast For Period			
See attached weather forecast			
7. General Safety Message			
Watch Out For Snags, Look Again, Check Behind You.			
8. ATTACHEMENTS (X IF ATTACHED)

<input type="checkbox"/> WEATHER FORECAST (Issued 08/13/11 1900) Lateral West Fire Great Dismal Swamp, Fish and Wildlife Service	Scott Kennedy - Incident Meteorologist Forecast #6 08/14-15/2011 DAY/NIGHT
--	---

WEATHER DISCUSSION:
A Warm Front will lift across the area today followed by a cold front tonight. A trough of low pressure will linger across the area Monday. High pressure will build into the area Tuesday and Wednesday.

WEATHER FORECAST DAY Night:

GENERAL: Mostly cloudy with numerous showers and thunderstorms. Chance of rain 60%. *(Partly cloudy with numerous showers and thunderstorms, mainly in the evening. Chance of rain 60%..)*
TEMPERATURES: 85° -87° (68° -70°)
HUMIDITY: Minimum 55%-60% (Maximum 95%-100%)
20 FT WINDS:SSE 6-12 gusting to 18 mph (S 4-7 mph becoming WSW)
STABILITY/INVERSION: Mixing height to 5000 ft agl around 1400 (Inversion to to 250 ft by 2100)
TRANSPORT WINDS: SSE 14 mph
LIGHTNING ACTIVITY LEVEL: 4 (3)
OUTLOOK FOR MONDAY: Partly cloudy with a 30% chance of showers and thunderstorms. Minimum temperature around 68 degrees. Maximum temperature 87 degrees. Minimum humidity 50-55%. Winds WSW 5-10 mph. Dispersion 50, good.

EXTENDED FORECAST:

Tuesday: Partly cloudy with a slight chance of showers and thunderstorms. Chance of rain 20%. Minimum temperature around 69 degrees. Maximum temperature around 86 degrees. Minimum humidity 45-50%. Winds NW 5-10 mph.
Wednesday: Partly Cloudy. Minimum temperature around 67 degrees. Maximum temperature around 87 degrees. Minimum humidity 45-50%. Winds N 4-8 mph, becoming NE.
Thursday: Partly Cloudy with a 30 percent chance of showers and thunderstorms. Minimum temperature around 68 degrees. Maximum temperature around 89 degrees. Minimum humidity 45-50%. Winds E 5-10 mph, becoming S.

<input type="checkbox"/> FIRE BEHAVIOR (Issued 08/13/11 19:00) Lateral West Fire Great Dismal Swamp, Fish and Wildlife Service	Mike Durfee - FBAN Forecast #6 08/14-15/2011 DAY/NIGHT
--	---

Fire Behavior Discussion - ALL DIVISIONS

Recent and continued shower activity will slow the surface spread of the fire for a few days. The smoldering fire but will continue to burn down into the ground. Fire will continue burning the heavy fuels (logs) because they will not be affected by the moisture, Watch for possible spreading and increased intensity if fire advances into any of the cut over or blow down units.

Low Brush/Regeneration/ Slash – ROS: < 5 chains / hr FL: 5-8 feet Spotting Distance 0.1 miles POI 15% (DIV - ALL)

Hardwood with Understory – ROS: < 4 chains / hr FL: < 2 feet Spotting Distance 0.1 miles POI 15% (DIV ALL)

Southern Rough (Brush with Overstory) – ROS: <10 chains / hr FL: 5-6 feet Spotting Distance 0.1 miles POI 15% DIV B, C)

Fire weakened trees are falling, evaluate your work area for snags or burned out trees and use lookouts when working in the timber.
Watch for hot fuel pockets and any stump, root, or peat holes if walking in the black.

Major Hazards and Risks:

Thunderstorms – There is a potential for Thunderstorms today! Read the fire weather forecast and keep your situational awareness radar tuned into changing weather conditions throughout the day. Communicate observed weather changes throughout the day with all resources and be prepared to take shelter in vehicles for protection from lighting. Look all around to ensure you are not parked close to a snag or tree when taking shelter in the vehicle that could hit the vehicle.

*** Observe the 30/30 rule: If you see lightning and hear thunder follow in less than 30 seconds, seek shelter. ***

Snags – Reports of falling snags in the open areas are common when winds increase above 10 mph. This will be a reality when thunderstorms pass thru the fire area today. Visibility can be reduced in heavy smoke making it difficult to see when snags are close by. Survey your work area to know the location of hazard trees.

Heavy Equipment – The complexity of this incident is still on the increase. More heavy equipment is showing up every day increasing the amount of hazards on-line. Parking congestion, material being thrown from cutting equipment, operator visibility, and equipment noise are all factors to be thinking about when working near heavy equipment.

Fatigue / Hydration – Consecutive long hot days have detrimental effects on the body. Fatigue will set in much earlier and staying hydrated will become more difficult. Take full advantage of off shift time getting good rest and continue to hydrate. Make sure you get plenty of water and ice in the mornings so you can stay hydrated throughout the day. Remember if you are drinking Gatorade or a similar drink to alternate between these and water! One quart an hour is the recommended minimum amount you should be drinking.

Road Conditions – Rain will change the road conditions quickly. The gravel roads will support traffic in wet conditions, the unsurfaced roads will turn to mud and will make travel difficult.

Learning is not a spectator sport. - D.**Blocher**
