INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared
	Lateral West	8/16/11	2100
4. Operational Period Day shift 0730-1930 August 17, 2011 Night Shift 1930-2400 and 0001-0730 August 18, 2011			
5. General Control Objectives For The Incident (Include Alternatives)			
<ol style="list-style-type: none"> 1. Provide for firefighter and public safety by adhering to LCES and the 10 standard fire orders. 2. Prevent fire from exiting Refuge boundaries. 3. Mitigate smoke impacts to adjacent communities (Hamptons Roads) by coordinating with state transportation and public health officials. 4. Minimize resource impact to include loss of organic soil or timber resources, which in turn will minimize smoke impacts to local communities. 5. Manage the fire cost effectively for the values at risk by using cost projections identified in the WFDSS as a baseline. 6. Provide for initial attack for additional fires that originate on the refuge. 			
6. Weather Forecast For Period			
See attached weather forecast			
7. General Safety Message			
Watch Out For Sunken Roads.			
Road engineers will begin assessing and repairing roads along the ditches in the swamp, which are being undermined as the fire burns through the underlying peat.

☐ SAFEY MESSAGE

Brian Biesel/Pat Sheridan – Safety Officers

Lateral West Fire Great Dismal Swamp, Fish and Wildlife Service

08/17-18/2011

Driving – Your chances of being in an accident are always highest at intersections! Drop Points, Division Breaks and Parking Areas are intersections. Watch out for other drivers and assume additional vehicles and people are coming behind you. Leave room for other traffic and don't make your vehicle an obstacle for others to drive around. Don't assume all vehicles use the same amount of space, this is a fatal flaw.

Air Operations – Ground crews should monitor air to ground channels. Monitor dip sites to ensure people aren't encroaching space (for pictures). Stay clear of aeriels bucket drops. If other aircraft are spotted near the fire area, report to Air Ops immediately at 936-366-4239 or on Command Channel 3.

Mop Up – All PPE is required during Mop Up. Engine operators should use ear plugs or hearing protection when using pumps and eye protection to keep small debris from blowing back when hosing hot spots. Heads up for snags, mop up can be slow work; therefore, time exposed to a hazard is greater.

Unburned Fuel – Air support is up and available upon request. Post lookouts in threatening areas and communicate fire activity/spread continuously. Ensure Safety Zones and Escape Routes are known by everyone, marked appropriately, and locations are communicated to everyone working in the area.

Leader's Intent

In addition, all leaders of firefighters have the responsibility to provide complete briefings and ensure that their subordinates have a clear understanding of their **intent** for the assignment:

- Task = What is to be done
- Purpose = Why it is to be done
- End State = How it should look when done
