Heavener Mtn Fire

Spot Forecast for Heavener Mtn Fire...USFS

Forecast is based on forecast start time of 0600 EST on November 11.
If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

High pressure will build toward the area this weekend and remain in control through early next week. Near to below normal temperatures are expected with plenty of solar radiation during the day. Relative humidity values will be moderate and winds will be mostly light through the weekend (meaning some diurnal terrain-induced circulations are possible).

The next period of concern for weather is late Monday into Tuesday. Lower relative humidity and gusty winds are likely as a dry cold front passes through. Measurable rain is not expected until at least Friday November 17.

.VETERANS DAY...

Sky/weather.....Mostly sunny (30-40 percent). Patchy fog early in the morning.

CWR.....0 percent.

Max temperature.....Around 51.

Min humidity.....48 percent.

Wind (20 ft).....Northwest winds 5 to 9 mph.

Mixing height.....3200 ft AGL.

Transport winds.....Northwest 5 to 7 mph shifting to the north around 6 mph late in the afternoon.

Smoke dispersal.....Poor (100 knot-ft) early in the morning increasing to fair (19200 knot-ft) in the afternoon.

Eye level winds.....Northwest winds up to 5 mph.

HEALTH AND SAFETY MESSAGE

“Safety is a continuing journey, not a final destination.”

INCIDENT: Heavener Mountain	DATE: 11/11/2023
-----------------------------	------------------

Major Hazards and Risks: DRIVING, HAZARD TREES, HEAVY EQUIPMENT OPERATION, STINGING AND BITING INSECTS

- Driving continues to be one of the major hazards we face on this fire each day. Continue to use your headlights when traveling, this helps other drivers to see you especially on the dusty roads within the fire area. Please look at the distracted driving tips in the box below.

- Hazard Trees – Thoroughly scout your work area and mitigate hazards with appropriate felling/bucking resources prior to continuing operations.

- Heavy equipment operations will likely continue. When you’re working with heavy equipment like dozers, keep in mind the operator sometimes has limited visibility. Make sure you make contact with the operator before working close to them, so they know where you’re going to be.

- Ticks are out, check yourself at the end of your shift, if you find an embedded tick contact the medical unit for appropriate treatment.

Risk Management Process

Situation Awareness

Gather Information

- Objective(s) Previous Fire Behavior
- Communication Weather Forecast
- Who’s in Charge Local Factors

Hazard Assessment

Estimate Potential Hazards

- Look Up/Down/Around Indicators
- Identify Tactical Hazards

What other safety hazards exist?

Consider severity vs. probability?

Hazard Control

- Identify hazard mitigation actions

What other controls are necessary?

Decision Point

Are controls in place for identified hazards?

NO - Reassess situation **YES** - Next question

Are selected tactics based on expected actions/outcomes?

NO - Reassess situation **YES** - Next question

Have instructions been given and understood?

NO - Reassess situation **YES** - Initiate action

Distracted Driving

There are three main types of distractions:

1. Manual: taking your hands off the wheel
2. Visual: taking your eyes off the road
3. Cognitive: taking your mind off driving

- Driving while using a cell phone reduces brain activity associated with driving (e.g., spatial processing that helps drivers remember and make sense of the objects they observe on the street) by 37 percent.
- Phone conversations of any type increase reaction times and increase variations in speed, lane deviations, and steering wheel control.
- When conversing on mobile devices, either hand-held or hands-free, drivers increase their risk of a crash two to four times.
- Texting takes your eyes off the road for 4.6 seconds. At 55 MPH, that’s like driving an entire football field blindfolded.
- Talking to a passenger while driving is significantly safer than talking on a cell phone, a University of Utah study found. Passengers, unlike cell phone conversations, can make the driver aware of changing road conditions they might not see and can stop the conversation if traffic conditions warrant.

Your Safety Officer : Dave Marion

Finance

- Personnel and Equipment Time will be conducted remote.
- All Finance Documentation must be emailed to 2023.heavermountain.finance@firenet.gov
- When emailing CTRs please include your name, resource order number, and the word TIME in the subject line of the email. Example: *Bear, Smokey O-123 TIME*
- (for questions only, please do not text documentation to these numbers)
Kelly Donaldson 580-236-9339
- Please remember that ALL CTRs and Shift Tickets must be signed by your incident supervisor.
- If you send a photo of your CTR, be sure to double check it is readable before submitting. Sometimes we get them blurry, folded, upside down or in a weird angle and we can't read it. If given the option of attachment size don't select small as this makes it tiny and unreadable.
- If you have any trouble or issues using the E-CTR's please feel free to reach out to us. We can provide you with alternate formats.
- CTRs and Shift Tickets should be submitted at a minimum, every other day.
- Justifications are required in the remarks when posting Time without meal breaks, including travel.
- Hazard Pay is required to be justified in the remarks, such as: "Firefighting on an uncontrolled Fireline."
- VIPR Resources should submit lodging receipts periodically rather than at the time of demob.
- Include your cell phone number on CTR and/or Shift Tickets in remarks.
- Ensure that E# is on the Shift Ticket.
