FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE: Wildland, Type 1
FIRE NAME: Quaker Run	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: Fri Nov 10, 2023 Time Issued: 1700	SHIFT DATE: Sat Nov 11, 2023
UNIT: Virginia DOF and Shenandoah NP	SIGNED: <i>Kelly Cagle</i> FBAN

WEATHER SUMMARY:

Local Thresholds – Watch Outs	Forecast for Today
7 Days or > Since Rainfall RH < 30 Winds > 15 mph	Min RH % 45 Winds NNW 4-7 Days Since Rain 1

FIRE BEHAVIOR:

Fire danger and fire potential are very low today. Fine fuels are wet and will not support fire spread. Fuels may begin to dry somewhat, but cool temps will limit any drying. Isolated smoke or smoldering is possible. Open flame or active fire spread is unlikely.

Fire Type	Rate of Spread	Flame Length
Backing	Low to none	1 or <
Uphill 20% slope	Low to none	1 or <
Uphill 40% slope	Low to none	1 or <

Maximum spotting distance = N/A

Peak Probability of Ignition = Low

Specific Areas of Concern:

Branch 1 (Division Alpha, Golf, Hotel)- Minimal fire behavior expected. Isolated smoke or smolder might be possible, especially on a heavy fuel. Creeping or active fire with forward spread is unlikely. Continue to monitor/address leaf accumulations in containment lines.

Branch 2 (Division Delta, Echo, Foxtrot) Minimal fire behavior. Rainfall should help cool remaining heat from recent firing operations. Smoke or smolder from heavy fuel certainly possible. Active fire spread or creeping is unlikely. Continue to monitor/address leaf accumulation in containment lines.

Air Operations:

Suitable conditions for aviation activities are expected today.

Fire Behavior Safety Message:

Again today, fire behavior itself is not likely a threat to your safety. One thing that could be is wet leaves on a hillside. Be mindful when working or walking on wet leaves – they can be very slick and could cause your feet to slip out from underneath you in an instant.

HEALTH AND SAFETY MESSAGE

SAFETY is YOU & ME

We are ALL accountable for SAFE behaviors

INCIDENT: Quaker Run

DATE: November 11, 2023

Major Hazards and Risks: Driving - UTV's

Driving – Driving to and from the incident continues to be one of the most dangerous tasks we do each day. Driving safe and alert depends on your mindset and commitment to others on the roadway. Ensuring you have adequate rest and remain both physically and mentally healthy throughout the assignment will help you to maintain safe driving practices. Ensure you are using spotters for backing, use your chock block when parking on slopes and keep paying attention to your surroundings.

UTV's – There are a lot of utility terrain vehicles (UTV) out on the fire line, these specialized tools are a great way to get to areas of the fire in a timely manner, but these vehicles can also be dangerous if not operated correctly. They may be similar in handling and operating as a small truck but UTV's at their core are designed for off-road use. Use common sense when driving, don't take chances, keep your arms and legs in the vehicle and please respect the environment, you are driving on private or national park lands and making unnecessary paths is prohibited.

Planning for medical emergencies

What will you do if someone gets hurt?

- Where are the personnel that can provide medical care?

How will we get the injured out?

- How many people and what kind of equipment will you need?

How long will it take?

- Where is the closest medical care and how will we transport?

Four Critical Errors that are made while driving

1. Eyes not on the task – Texting while you drive or looking at the scenery.
2. Mind not on the task – Talking on the phone or radio while driving.
3. Being in the line of fire – The oncoming vehicle is in your lane.
4. Losing your balance or traction – You are driving too fast for the road conditions.
