FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4	TYPE OF FIRE: Wildland, Type 1
FIRE NAME: Quaker Run	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: Sat Nov 11, 2023 Time Issued: 1700	SHIFT DATE: Sun Nov 12, 2023
UNIT: Virginia DOF and Shenandoah NP	SIGNED: <i>Kelly Cagle</i> FBAN

WEATHER SUMMARY:

Local Thresholds – Watch Outs	Forecast for Today
7 Days or > Since Rainfall RH < 30 Winds > 15 mph	Min RH % 45 Winds NE 3-7 Days Since Rain 2

FIRE BEHAVIOR:

Minimal behavior expected, but fuels are drying and could become modestly available during the afternoon. Cold temps this morning will delay the availability somewhat. Any burn window would be short and most likely limited to the mid afternoon hours on a south or west facing slope. Fire potential would be low and limited to low rates of spread with low flame lengths. Isolated smokes or smoldering also possible in remaining heavy fuels.

Fire Type	Rate of Spread	Flame Length
Backing	1 chain per hour or <	1'
Uphill 20% slope	1 to 3 chains per hour	1 to 2'
Uphill 40% slope	2 to 3 chains per hour	1 to 2'

Maximum spotting distance = < 25 feet

Peak Probability of Ignition = 26%

Specific Areas of Concern:

Branch 1 (Division Alpha, Golf, Hotel)- Minimal fire behavior expected. Isolated smoke or smolder might be possible, especially on a heavy fuel. Fuels might dry enough to provide a very limited burn window mid afternoon. Fire intensity would be low. Leaf drop continues and fireline condition should be monitored for leaf accumulation.

Branch 2 (Division Delta, Echo, Foxtrot) Minimal fire behavior expected, however, fuels might dry enough to support limited fire spread during mid afternoon. Leaf drop continues and firelines should be monitored for fuel accumulation. – especially if heat remains near perimeter edge. Isolated smokes and smoldering or creeping also possible.

Air Operations:

Possible inversion early. Some clouds early as well. Should clear by mid morning and good aviation conditions are expected for the remainder of the day.

Fire Behavior Safety Message: The old adage “An ounce of prevention is worth a pound of cure” applies to our current situation. An expected wind event on Monday night could test our control lines. Any preemptive work that can be done today/tomorrow to strengthen those lines will better position us to withstand the incoming fire weather.

Major Hazards and Risks: Complacency, Driving and Medical Emergencies

Complacency- Whether you have been here for a while or just arrived maintain your focus. We want everyone to return home in the same shape they arrived in. There is still work to be done so, maintain your situational awareness. **A fire not running DOES NOT EQUAL no hazards.**

Driving- Driving is the one of the biggest hazards on this incident and in the surrounding towns; expect the unexpected. Defensive driving is essential. Keep windows clean, use headlights, seat belts, and chock blocks. Driving to and from the fire in the dark will require 100% focus.

Medical Emergencies- (Refer to IRPG pg.2) Review 8 line!

Ask yourself these 3 questions:

1. What are we going to do if someone gets hurt?
2. How will we get them out of here?
3. How long will it take to get them to the hospital?

5 Communication Responsibilities

1. Brief others as needed
2. Debrief your actions
3. Communicate hazards to others
4. Acknowledge messages
5. Ask if you don't know
