But use for Notes!

1. Incident Name VA Interagency Wildland Fire Academy	2. Date Prepared 4/24/2025	3. Time Prepared 1630	INCIDENT OBJECTIVES
4. Operational Period Date: 05/28/2025 – 05/31/2025 Time: 0800 – 1700 Daily			
5. General Control Objectives For The Incident (Include Alternatives)			
<ol style="list-style-type: none"> 1. Provide for the safety of students, instructors, and the public as the number of one priority utilizing LCES, the 10 standard fire orders, and the 18 watch out situations. 2. Provide quality training following NWCG guidelines. 3. Ensure a safe and healthy working environment for all participants. 4. Provide for the protection of natural resources on Appomattox-Buckingham State Forest property. 5. Provide for a good future relationship with Longwood University and the public. 6. Provide logistical support for all training activities. 7. Make sure all academy attendees are kept aware of incident activities and all other significant events outside the academy. 8. Conduct operations utilizing the most cost-effective methods. 			
6. Weather Forecast For Operational Period			
Weather report to be given at daily briefing. Remain aware of current and changing weather conditions, especially for outdoor field activities.			
7. General Safety Message			
FIELD AWARENESS DRIVING TICKS AND “CRITTERS” HEAVY EQUIPMENT USE DEHYDRATION		<ul style="list-style-type: none"> ○ Scout areas where personnel will be conducting field operations. Report any suspicious items to your instructor. ○ Do not follow too close. Be aware of school buses and pedestrians. ○ Use spray for ticks. Apply according to label directions. Report all tick bites. ○ Be aware of moving equipment. ○ Ensure communications are established and use spotters when necessary. ○ Drink plenty of water. Take rest breaks. Monitor personnel for dehydration. ○ Report any injuries to your instructor and the Safety Officer.

9. Control Operations											
ENOP, Engine Operator										4 Days	
This course provides the knowledge and skills necessary to operate and maintain a wildland fire engine during pre-suppression, suppression, and post fire operations.											
Pre-requisites: - Qualified as a Firefighter Type 2 (FFT2)											
- Satisfactory completion of pre-course work.											
10. Special Instructions											
Briefing at 0745 outside Moss Residence Hall (Map #20) on 5/28, then proceed directly to your class following briefing.											
<u>Classroom Days:</u> Lunch on 05/28 is available from 1130 to 1330 in Upchurch University Center, (Map #61).											
<u>Field Days:</u> Convene per instructors' directions each day prior to going to the field. Field exercises will be conducted at Appomattox-Buckingham State Forest DP-4. Wear appropriate field clothing and boots for field exercises. Box lunches are provided on 5/29-5/31 and will be brought to you in the field.

9. Control Operations									
Advanced Tractor Plow Course 4 Days <p>Advance Tractor Plow operations class is a VDOF developed, practical training course to continue the development of tractor plow operators for wildland fire suppression work. The course is for newer operators who have previous wildland fire experience in practical dozer operations on wildfire fire incidents. The course will present students with advanced dozer operation skills, operator equipment maintenance, and reinforce safe and effective dozer operations on emergency incidents.</p> <p>Prerequisites: Class A or B Commercial's Driver's License, completion of the VDOF Basic Tractor-Plow operator task book, recommendation of a full-time VDOF employee, and all students will be expected to bring one tractor-plow unit to the class.</p>									
10. Special Instructions									
<p>Briefing at 0745 outside Moss Residence Hall (Map #20) on 5/28, then proceed directly to your class following briefing.</p> <p><u>Classroom day:</u> lunch on 5/28-5/29 is available from 1130 to 1330 in Upchurch University Center, (Map #61).</p> <p><u>Field days:</u> Box lunches provided on 5/30-5/31 and will be brought to you in the field. Please wear appropriate field clothing and boots for field exercises.</p> <p>On 5/28 – 5/31: Convene per instructors' directions each day prior to going to the field. Field exercises will be conducted at Appomattox-Buckingham State Forest DP-1 and DP-3.</p>

9. Control Operations									
S-130/190 Firefighter Training Field Portion					1 Day				
This course addresses the foundational skills universal to all wildland firefighters. Safety, tactics, equipment use and operation prepares the firefighter for suppression work. Training in fire behavior factors will aid in the safe and effective control of wildland fires. Basic knowledge of the structure and concept of the ICS system will be covered along with human factors on the fire line. This course will be presented using a blended approach, meaning the student will complete approx. 40 hours of online training will be prior to the field exercise. The remaining "Instructor Led Component" of the training will be completed during the field exercises.									
10. Special Instructions									
Briefing/Check In at 0745 Carter Taylor Trailhead on 5/31, stage at briefing area for instructor directions prior to going into the field (Appomattox-Buckingham State Forest Map Trail Head Symbol). See page 23 for QR code									
Box lunches provided and will be brought to you in the field.									
Please wear appropriate field clothing and boots for field exercises.

S-131 Advanced Firefighter (Firefighter Type 1) /Squad Boss					2 Days				
<p>This training course is designed to meet the training needs of the advanced firefighter (Firefighter Type 1 (FFT1)) and/or Incident Commander Type 5 (ICT5). Students will be able to identify position responsibilities and demonstrate the ability to apply principles of Operational Leadership found in the Incident Response Pocket Guide (IRPG). Students will be able to identify Look Up, Down and Around indicators and demonstrate the ability to apply components of LCES.</p> <p>Pre-requisites- Students must be qualified as Firefighter Type 2 (FFT2).</p>									
10. Special Instructions									
<p>Briefing at 0745 outside Moss Residence Hall (Map #20) on 5/25, then proceed directly to your class following briefing. Lunch is available from 1130 to 1330 in Upchurch University Center, (Map #61).</p>

9. Control Operations									
Portable Pumps and Water Use				3 days					
This course is designed to provide knowledge and skills to design, setup, operate, troubleshoot, and shut down portable water delivery systems. The focus is on portable pumps - it does not address water delivery for engines. Topics covered include portable water delivery systems; equipment; roles and responsibilities; and system design and hydraulics. There is also a field exercise where students will apply what they learned in the classroom.									
10. Special Instructions									
Briefing at 0745 outside ARC Residence Hall (Map #33) on 5/28, then proceed directly to your class following briefing. Lunch is available from 1130 to 1330 in Upchurch University Center, (Map #61). Box lunches will be provided on 6/1 & 6/2 and will be brought to you in the field. Field exercise will be held at High Bridge State Park, DP-7 (See High Bridge Map) Please wear appropriate field clothing and boots for field exercises.

S-212 Wildfire Power saws						4 Days				
This course provides introduction to the function, maintenance and use of internal combustion engine powered chain saws, and their tactical wildland fire application. Field exercises support entry level training for firefighters with little or no previous experience in operating a chain saw, providing hands-on cutting experience in surroundings similar to fireline situations.										
Pre-requisites: S-130/S-190 and satisfactory completion of pre-course work.										
10. Special Instructions										
Briefing at 0745 outside Moss Residence Hall (Map #20) on 5/28, then proceed directly to your class following briefing.										
<u>Classroom day:</u> lunch on 5/28-5/29 will be brought to the Toga VFD.										
<u>Field days:</u> Box lunches provided on 5/30-5/31 and will be brought to you in the field, ABSF.										
Please wear appropriate field clothing and boots for field exercises.										
On 5/30 – 5/31: Convene per instructors' directions each day prior to going to the field. Field exercises will be conducted at Appomattox-Buckingham State (DP-2, DP-5). See S-212 Ops Map.

8. Medical Emergency Procedures (Incident within an Incident)							
1. Declare the nature of the emergency. A Medical injury/illness? If injury/illness is it life Threatening? 2. If life threatening, then request that the designated frequency be cleared for emergency traffic. 3. Identify the on-scene point of contact (POC) by resource and last name (i.e. POC is DIVS Smith). 4. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates) 5. Identify on-scene medical personal by position and name (i.e. EMT Jones), 6. Identify preferred method of patient transport, 7. Request any additional resources and/or equipment needed. 8. Document all information received and transmitted on the radio or phone, Identify any changes in the on-scene point of contact or medical personnel as they occur							
Prepared By (Medical Unit Leader) Chad Briggs				Reviewed By (Safety Officer) John Miller			

Longwood University Emergency Preparedness

Everyone is asked to assist in making the campus a safe place by being alert to suspicious situations and promptly reporting them. If you observe a criminal act or are a victim, immediately notify the University Police via phone or emergency call box at:

- Campus phone: **ext. 2091**
- Public phone: **395-2091**
- **Blue Light Emergency Phones:** These are EMERGENCY phones scattered across campus. To use pickup push button and you will be connected to campus security.

The University Police headquarters is located at the Dorrill Dining Hall, on the ground floor and provides 24-hour help and protection. This service is provided seven days a week on a year-round basis.

- (1) Everyone is asked to assist in making the campus a safe place by being alert to suspicious situations and promptly reporting them.
 - a. If you are a victim or witness to a crime, you must promptly notify Public Safety as soon as possible and report the incident. Include the following:
 - b. If you observe a criminal act or observe a suspicious person on campus, immediately notify Public Safety and report it.
 - c. Assist the officers when they arrive by supplying them with all additional information and asking others to cooperate.
- (2) Should gunfire or explosives be discharged on campus, you should take cover immediately using all available concealment. After the disturbance, seek emergency first aid if necessary and then notify Public Safety.

Hostile Intruder(s) on the Grounds of the College

When a hostile person(s) is actively causing death or serious physical injury or the threat of imminent death or serious physical injury to person(s) on the campus, we recommend the following procedures be implemented:

- Run away from the threat if you can, as fast as you can.
- Contact Campus Police at x2091 if possible or dial 911 on a cell phone.
- If you can get away from the immediate area of danger, summon help and warn others.
- Turn your cell phone on vibrate.
- Once the police arrive, obey all commands. This may involve you being handcuffed or made to put your hands in the air. This is done for safety reasons, and once circumstances are evaluated by the police, they will give you further directions to follow.

Hostile Intruder in a Non-Residence Hall Building

When a hostile person(s) is actively causing death or serious bodily injury or the threat of imminent death or serious bodily injury to person(s) within a building, we recommend the following procedures be implemented.

- Faculty should immediately lock the students and themselves in the classroom if possible. Cover any windows or openings that have a direct line of sight into the hallway.
- If communication is available, call 2091.
- Do not sound the fire alarm. A fire alarm would signal the occupants to evacuate the building and thus place them in potential harm as they attempted to exit.
- Lock the windows and close blinds or curtains.
- Stay away from the windows.
- Turn off lights and all audio equipment.
- Try to remain as calm as possible.

- Keep everyone together.
- Keep classrooms secure until police arrive and give you directions.
- If you are not in a classroom, try to get to a classroom or an office.
- Stay out of open areas and be as quiet as possible.
- Turn your cell phones on vibrate.
 1. You can try to hide, but make sure it is a well-hidden space or you may be found as the intruder moves through the building looking for victims.
 2. If you think you can safely make it out of the building by running, do so. If you decide to run, do not run in a straight line. Attempt to keep objects such as, desks, cabinets, fixtures, etc. between you and the hostile person(s). Once outside, do not run in a straight line. Use trees, vehicles, and other objects to block you from the view of intruders.
 3. If the person(s) are causing death or serious physical injury to others and you are unable to run or hide, you may choose to play dead if other victims are around you.
 4. Your last option if you are caught in an open area in a building may be to fight back. This is dangerous, but depending on your situation, this could be your last option.
 5. If you are caught by the intruder and are not going to fight back, obey all commands and do not look the intruder in the eyes.
 6. Once the police arrive, obey all commands. This may involve your being handcuffed, or keeping your hands in the air. This is done for safety reasons, and once circumstances are evaluated by the police, they will give you further directions to follow.

Hostile Intruder(s) in a Residence Hall

When a hostile person(s) is actively causing deadly harm or the imminent threat of deadly harm within the residence hall, we recommend the following procedures be implemented:

- Lock yourself in your room.
- If communication is available, call 2091.
- If away from your room, join others in a room that can be locked.
- Do not stay in the open hall or other open areas.
- Do not sound the fire alarm. A fire alarm would signal the occupants in the rooms to evacuate the building and thus place them in potential harm as they attempted to exit.
- Barricade yourself in your room with desks, beds, or anything you can push against the door.
- Lock your window and close blinds or curtains.
- Stay away from the window.
- Turn all lights and audio equipment off, turn your cell phone on vibrate.
- Try to stay calm and be as quiet as possible.
- If you are caught in the open such as hallways and lounge areas, you must decide what you are going to do. This is a very crucial time and can possibly mean life or death depending on your actions.
 1. You can try to hide, but make sure it is a well-hidden space or you may be found as the intruder moves through the dorm looking for more victims.
 2. If you think you can safely make it out of the building by running, do so. If you decide to run, do not run in a straight line. Keep any objects you can between you and the hostile person (s) while in the building. Once outside, do not run in a straight line.
 3. If the person(s) are causing death or serious physical injury to others and you are unable to run or hide, you may choose to play dead if other victims are around you.

4. The last option you have if caught in an open area in the dorm maybe to fight back. This is dangerous, but depending on your situation, this could be your last option.
5. If you are caught by the intruder and are not going to fight back, obey all commands and do not look the intruder in the eyes.
6. Once the police arrive, obey all commands. This may involve your being handcuffed or made to put your hands in the air. This is done for safety reasons, and once circumstances are evaluated by the police, they will give you further directions to follow.

We also have here in the Police Department the Instant Alert/Siren System which allows us to send out a siren followed by a message that can be heard across town.

Campus Police: 395-2091
Ambulance: 911

SAFETY INFORMATION

SNAKES

Copperheads are the only poisonous snakes found in this area.

- ◆ **Northern Copperhead** *Agkistrodon contortrix mokasen*
- ◆ **Southern Copperhead** *Agkistrodon contortrix contortrix*

The cryptic coloration of the copperhead allows it to blend in well with deciduous leaf litter in the woods. Most bites by this non-aggressive snake are caused by accidentally stepping on it.

POISONOUS PLANTS

Poison ivy, *TOXICODENDRON RADICANS*, may be found as a low growing shrub or a tree climbing vine (**smooth, shiny leaves, no hairs**). Plants have compound leaves with three leaflets, unlike VIRGINIA CREEPER, which is a non-poisonous vine with 5 leaflets.

The leaves of both of these plants are deciduous and change color in the fall. Allergic reactions differ among individuals. The toxic substance that causes rashes is oil within the plant called urushiol. It oozes from areas of the plant that have been cut, bruised, or eaten at by insects. The oil may persist for five years even after the plant dies. Rashes do not spread by scratching unless there is residual oil on the skin, nor do they spread from blister rupture. Reaction may not occur immediately after contact. Avoidance of the plant is recommended, even for those persons who are not hypersensitive. Ironically, the oil would be harmless were it not for the overreaction of the body's immune system. Wash with soap and water and wipe with isopropyl alcohol. Jewelweed also works well as a natural remedy.

LIGHTNING

Beware of lightning strikes when electrical storms are imminent:

- ◆ Ground all equipment.
- ◆ Avoid single, isolated trees or poles, antennae, and equipment.
- ◆ Cease radio, telephone, and fuel operations, drop all antennae.
- ◆ If caught on an open hilltop, crouch down and do not huddle in groups.

VEHICLES

Obey all posted limits on campus and on the State Forest.

While on the state Forest use only bridges, established fords or other approved water crossings. Watch out for culverts and streams that may be overgrown with vegetation. Minimize damage to trees, soils and vegetation when off road maneuvers are required. Avoid sharp and neutral steer turns whenever possible. Remain on established roads/trails when the ground is saturated.

HEAT INJURIES / HYDRATION

- ◆ Make sure you are properly hydrated, especially if you are not acclimated to the hot weather.

Humidity is not your friend. The rate of sweating is higher in humid conditions but the cooling is less. The reason is that because the air is already very saturated with water, sweat can't evaporate. Sweat that beads up and rolls off doesn't function in the cooling process. However, this "futile sweat" does deplete the body of vital water and salt. As dehydration

progresses' cooling becomes more difficult. Performance drops and heat injury becomes a real threat. Deaths have occurred when the air temperature was less than 75 degrees F (24 degrees C) but the relative humidity was above 95%.

Recognizing symptoms of heat injury. There are three stages to heat illness; heat cramps, heat exhaustion and heat stroke -- listed in order of increasing severity.

Often the border between them is blurred into a continuous spectrum. **Heat cramps** are due to muscle spasms and often occur in the arms, legs or abdomen. They are thought to be caused by dehydration and loss of salt and other electrolytes. **Heat exhaustion** is due to more profound loss of water and electrolytes. It is characterized by generalized weakness, headache, dizziness, low blood pressure, elevated pulse and temperature elevation as high as 104° F (40° C). Both can usually be treated by moving out of the sun, drinking fluids and eating salty food.

Heatstroke is a life threatening condition and represents severe dehydration, high body temperature, and a shut-down of the cooling mechanisms. The person may be delirious or comatose, and half of the victims have stopped sweating. The pulse is rapid and weak, the blood pressure is low and body temperature is greater than 105° F (40.6° C) and may reach as high as 110° F (43° C). The oral temperature is notoriously inaccurate in these circumstances. Damage to the brain, heart, lungs, kidneys and other organs may occur. Sometimes despite the best medical care, death is the end result.

Emergency roadside treatment of heatstroke:

- ◆ Call 911
- ◆ Remove the patient from direct sunlight
- ◆ Remove the patient's clothing
- ◆ Wet the body surface and fan to promote air movement and evaporation
- ◆ Rub the skin with bags of ice
- ◆ It is important that you notify the medical unit or incident command that you have had previous heat injuries.

TICKS

Ticks are very abundant on the State Forest. Of special concern is the deer, or black-legged tick *Ixodes scapularis*, pictured.

Deer ticks are vectors of the spirochete bacteria *Borrelia burgdorferi*, which causes Lyme disease. During the larval and nymphal stages of the deer tick's life, one of its primary hosts is the white-footed mouse. These mice are major host reservoirs for the bacteria, thereby passing it on to the deer ticks. Studies show that the Lyme disease spirochetes are transmitted from the tick to the host via salivation or regurgitation while the tick is feeding.

Careful removal is necessary due to the fact that squeezing a tick's abdomen while pulling it off may actually introduce the contents of the tick's gut into the host (humans in this case).

Observe the bitten area throughout the following 3 days to 1 month. Symptoms of Lyme disease include:

- ◆ *Erythema migrans* (the bull's-eye rash), a circular red rash
- ◆ fatigue
- ◆ chills and fever
- ◆ headache
- ◆ joint and muscle pain
- ◆ swollen lymph nodes

The American dog tick is also found in the area. These ticks have been known to carry the organism responsible for Rocky Mountain spotted fever.

- ◆ Apply tick spray, your Division Supervisor should have tick spray available.
- ◆ Check yourself for ticks after returning from any outdoor activities.
- ◆ Carefully remove **ticks** without squeezing them to avoid possible infection of Lyme's Disease or Rocky Mountain Spotted Fever.
- ◆ Contact Incident Base should you need any medical supplies.

VENOMOUS ARTHROPODS

Arthropods are segmented invertebrates with jointed antennae and legs. They include insects, arachnids, centipedes and millipedes.

- ◆ Insects: bees, wasps, hornets, yellow jackets, ants and caterpillars
- ◆ Arachnids: spiders and scorpions
- ◆ Centipedes and Millipedes

Of all deaths due to venomous stings/bites in a year, most are caused by arthropods.

Insects – Treatment

Bees often leave their stinger and poison sac embedded in the skin of their victim. Using your fingernail or a knife blade, scrape them away to prevent further poison from being pumped into the skin. Wasps, hornets and yellow jackets do not leave their stingers. Many caterpillars have hollow, venom-filled hairs on their bodies, which may break off into the skin. Place tape over the sting area to remove them.

Ice packs or cold compresses will relieve the immediate burning sensation and pain. Other treatments include: a baking soda paste, household ammonia and household meat tenderizer.

If the victim exhibits headaches, itching, a feeling of bodily discomfort, anxiety or hives: consult a physician immediately. These symptoms indicate a potential for allergic reaction. A moderate allergic reaction would include the above symptoms plus two or more of the following: constriction of the chest or throat, abdominal pain, nausea, vomiting, dizziness or wheezing.

Black Widows are the most common dangerous spiders in the area.

Red hourglass shaped marking

WILDLIFE

Please do not harass or harm any fish or wildlife species, to include nests, dens, burrows, dams or any other structures.

Threatened & Endangered Species (T&E)

Be aware that state and/or federal laws as well as state and federal regulations protect several T & E plant and animal species found on the State Forest. These include the Bald Eagle, Michaux's Sumac, some Bivalves and the Roanoke Logperch. It is unlawful to maliciously damage or destroy, as well as to remove, cut or dig up any T&E plant species.

RULES & REMINDERS

❑ NAME BADGES

All staff, instructors and students must wear their academy name badge at all times on campus for security purposes and access to meals in the dining hall.

❑ BRIEFING

All students will attend **Briefing** at the **ICP** (Moss Residence Hall #20) at **0745** on the first day of their class. Head to class immediately following briefing.

❑ MEALS

Upchurch Community Center
(sit in designated area
of dining room)

BREAKFAST

0700 – 0800 (7:00 am-8:00 am)

LUNCH

1130 – 1330 (11:30 pm-1:30 pm)

DINNER

1700 – 1830 (5:00 pm-6:30 pm)

❑ PARKING

Parking is only in Wynne parking lot. Parking is first come, first served for commuter and on-campus attendees. You are likely to be towed if you park elsewhere.

❑ ROOM CHECKOUT

Drop room key and badge holder at ICP Check-In **BEFORE** class the day of checkout. We don't want to hunt you down in class! Put all trash in trash bags provided and dump down the trash chute. Put used linens in the pillowcase and deliver to Linen check-out desk.

❑ ALCOHOL CONSUMPTION

Alcohol consumption is **ONLY** allowed in the Wynne Residence Hall lodging rooms – **NOT** in the parking lots, etc. VDOF policy will be enforced. All Academy participants are expected to behave professionally. Anyone with behavioral issues may be escorted off campus and sent home.

❑ NOISE

Loud noise will **NOT** be tolerated after 10 p.m., be considerate of others.

❑ SMOKING

All buildings, grounds and residence hall rooms are smoke-free. Smoking is only permitted in the smoking huts found around campus.

❑ STAFF AND INSTRUCTOR MEETINGS

Instructor Briefing at the **ICP** (Moss Residence Hall #20) at **1900** the night before the first day of your class. All instructors and instructor assistants are expected to attend. Instructor briefing will be on Tuesday, 5/27 (all classes starting Wednesday), Wednesday, 5/28 (all classes starting Thursday), and Friday, 5/30 (all classes starting Saturday).

Incident Management Team Daily Planning Meeting at the **ICP** (Moss Residence Hall #20) at 0900 daily as needed.

ACTIVITIES AVAILABLE

☐ RECREATION

Health & Fitness Center (#43)

Academy name badge required for access.

Monday – Friday: 9:00 am – 8:00pm

Please obey all rules and regulations.

Rules and Regulations:

1. Display conference name badge to gain access.
2. No food or drink is permitted past the lobby except for water in a spill proof container.
3. Cell phone use including calls, texts, photo or video is prohibited except in main lobby.
4. Taking photos or videos is prohibited unless approved by Campus Recreation Supervisor or administrator.
5. Please be courteous to other patrons and Campus Recreation staff.
6. Campus Recreation staff reserve the right to remove any person from the premises that violate any safety policies and procedures or for any conduct that is viewed as unsafe or inappropriate.
7. Supervisor on duty reserves the right to make judgments and final decisions on policies.

A limited amount of sports equipment is available for checkout from the Longwood conference staff. The staff will be located in the ICP during the academy.
