# Tres Lagunas Fire Incident Action Plan

New Mexico State Forestry & Santa Fe National Forest, Pecos Ranger District NM-N4S-000070 PNHH9A (1502) [P]

Friday June 7, 2013

Day Shift
(0600 - 2000)

New Mexico Incident Management Team

John Pierson, IC

Incident Objectives	TF	RES LAGUNAS	06/06/13	0932					
Operational Period     06/07/1	3 Friday [	Day Shift 0600 - 2000							
5. General Control Objectives for the incident	(include alterna	atives)							
Assure the safety of incident personnel and the principles/procedures.	ne public by pro	viding clear leader's intent a	and application o	f safety					
Establish anchor points to protect the Gallinas area watersheds to the extent possible.	and Santa Fe	watershed while also provid	ding for structure	protection. Protect					
Maintain clear communications with local, state, and private entities by providing timely and accurate information.									
Manage the fire to minimize impacts to natural and cultural resources, wild and scenic river values and man-made improvements by using appropriate suppression strategies and tactics.									
Keep costs commensurate with values at risk.									
Provide for protection of endangered species	protection zone	es identitied on maps and th	rough DIVS and	OPS2.					
Mitigate smoke impacts to surrounding communities.

# Fire Weather Forecast

FORECAST NO: 9 NAME OF FIRE: Tres Lagunas

PREDICTION FOR: Day SHIFT UNIT: Pecos District Santa Fe N.F.

SHIFT DATE: Friday, June 7<sup>th</sup> SIGNED: Chris McKinney/Brent Wachter

TIME AND DATE Incident Meteorologist (T)/Incident Meteorologist

FORECAST ISSUED: 2130 MDT June 6th

# **WEATHER DISCUSSION:**

Slightly drier and warmer conditions expected today as the dryline approaches from the west. With the lack of thunderstorm activity in the vicinity of the fire on Thursday conditions today will be more unstable and favorable for thunderstorm development. A weak disturbance will move in from the northwest by midday which should help to aid development. Expect cumulus clouds to begin forming by late morning with thunderstorms possible by 1200-1300 MDT. Expect a mix of wet and dry thunderstorms with small wetting footprints. Maximum wind speeds will be similar to Thursday except for areas that receive outflow from thunderstorms. On Saturday the dryline will move east of the fire bringing much warmer and drier conditions with Haines 6 possible. Some increase in moisture is possible on Sunday as models have hinted at another back door cold front. Confidence in this is low but may increase on Friday as new data comes in.

# **WEATHER FORECAST:**

**WEATHER:** Partly cloudy early becoming mostly cloudy by late afternoon. Good chance (70%) of thunderstorms affecting the area (chance of wetting rain 30%). Storm movement will be towards the east-southeast.

**LAL:** 3

**MAX TEMPERATURES:** 7500 ft: 76-78 8500 ft: 75-77 9500 ft: 68-72

**MIN HUMIDITY:** 7500 ft: 19-21% 8500 ft: 22-23% 9500 ft: 24-25%

20 FT WINDS:

**RIDGETOP** - Light ESE winds becoming SSE by 1000 4 to 7 mph. Becoming SSW 8-12 mph with gusts to 23 mph as the afternoon progresses.

**SLOPE/VALLEY -** Perhaps a light drainage in sheltered canyons turning more upslope after 0900. Othwerise...SE wind 5 to 9 mph during the morning becoming SSW 7 to 12 mph with occasional gusts to 20 mph during the afternoon. Strongest winds felt within Pecos and Cow canyons as well as helibase.

**HAINES INDEX:** Haines 4, brief Haines 5 possible

**STABILITY/INVERSION:** Inversion breaking by 0930

Max Mix Height: 14500 ft AGL Max Transport Wind: WNW 17 kt

**OUTLOOK FOR FRIDAY NIGHT:** WX: Chance of showers and thunderstorms early (30%) otherwise some

partial clearing. LAL 2

Min T: 44-50 Max RH: 45-55 Wind: SE 3 to 7 mph (generally drainage most areas)

#### **EXTENDED FORECAST:**

	0:1=0:10	<del></del>				
	Max T	Min T	Min RH	Max RH	Wind	Highlights
Sat 8 <sup>th</sup>	73-84		9-15%		WNW 9-15 g 28 mph	Haines 6 Possible/Virga
Sun 9 <sup>th</sup>	69-80	44-50	14-22%	40-50%	SSW 5-10 g 20 mph	Bump in RH possible/LAL2
Mon 10 <sup>th</sup>	77-88	45-55	8-14%	30-40%	WSW 8-13 g 24 mph	Well above normal temps

FIRE BEHAVIOR FORECAST									
FORECAST NUMBER: <b>7</b>	TYPE OF FIRE: Wildfire								
.,FIRE NAME: Tres Lagunas	OPERATIONAL PERIOD: 6/7/13 Day/Swing								
DATE ISSUED: 6/6/13	TIME ISSUED: 21:30								
UNIT: Santa Fe NF	SIGNED: Galen Roesler (FBAN)								

# **WEATHER SUMMARY:**

Chance of thunderstorms. Haines today is Moderate.

See attached weather forecast for detailed weather information

# **FIRE BEHAVIOR**

#### **GENERAL:**

Good overnight relative humidity recovery will help keep fire behavior down early in today's shift. Expect fire behavior to pick up when the sun warms and dries fuels. Although there will be more fire behavior today than yesterday, this should be another good day to make progress on the fire. The fine fuels have not yet returned to the dryness of a couple days ago.

Early in the shift expect to see creeping and smoldering along with heavies continuing to burn. As fuels dry there will be backing and flanking fire. When the fire aligns with wind, fuels, and topography short uphill runs could occur. Torching will be likely where ladder fuels exist.

Spotting potential will be increased from yesterday and although not as big a problem as a few days ago, you could see spots today. Rollout on steep slopes will continue to cause downhill spots. Watch for rollout into heavies to continue to cause spread between heavy fuels.

BEHAVE outputs based on today's predicted weather:

Mixed Conifer: Surface Forward Rate of Spread 6-21 ft/min, Flame Length 4-8 ft, Spotting Distance .6 miles Ponderosa Pine: Surface Forward Rate of Spread 6-27 ft/min, Flame Length 2-5 ft, Spotting Distance .6 miles

#### SPECIFIC:

Today's Probability of Ignition will range from 60-80%.

All Div: A chance of thunderstorms is in the forecast; watch for outflow winds that could affect fire behavior.

**Div B, C, and E:** This area contains a lot of residual heat. Fire behavior should become more active than yesterday with continued drying of fuels. Expect moderate to active behavior with occasional torching and some spotting possible.

**Div T, W, and U:** This will be a good day to progress on line construction. A window for burnout operations is questionable.

**Div A/Z and Y:** Today's conditions should be favorable for securing line and mop-up. Most fire will remain in heavy down fuels.

**Structure Groups:** The fire is near or into some of the structure areas. Channeling and funneling of winds will affect your localized fire behavior.

IA Group: Weather conditions remain favorable for successful IA, but fuels are recovering. Be heads up.

**Swing Shift:** Fire behavior will be similar to what is described above early in the shift diminishing in the night time hours when heavies will be the main source of burning.

## **AIR OPERATIONS:**

Thunderstorm outflows could create turbulence that will affect air operations.

# SAFETY:

Terrain on this fire often makes it difficult to see what is happening on the fire beyond your immediate location. Maintain good communication and share fire behavior information with adjacent forces.

Standard Firefighting Order #2 – Know what your fire is doing at all times.

7. Control Operations											

# 7. Control Operations

Keep fire West of FR 92.

Construct direct and indirect dozer line.

Prep and Fell snags along FR 92 and along indirect dozer line.

Hold and secure direct fireline and Mop-up 100 feet in.

# 8. Special Instructions

Ensure LCES; Test communications and utilize human repeaters and air attack if needed.

Establish and communicate trigger points to all personnel. Contact OPS prior to initiating any firing operations. Notify planning OPS for resources and supply needs by 1400 for the next shift. Aerial Firefighter use and effectiveness group will be monitoring retardant drops throughout the fire. Treat powerlines as if HOT.

Air Resources needs coordination thru DIVS who will contact Air Attack.

Provide GPS Coordinates of all pump locations to Situation Unit Leader.

# Tres Lagunas Fire Guidelines for Suppression Rehabilitation on Forest Service, State and Private Lands June 7, 2013

The following treatments guidelines will be followed on National Forest and State lands. The treatments will also include private lands after verification with the landowner.

# HAZARD TREES

Remove downed timber and other obstructions (e.g., rocks) from roads which may create post-fire safety hazards. Fall hazard trees that may fall across fire lines, roads or onto structures near the fire line as a result of line construction or burnout. Provide data on slash removal around private land structures and summer home areas in order to consider additional treatments.

# **SLASH**

All hangs-ups (pushed over trees) along dozer lines will be dropped, bucked and spread. Slash from fire line construction will be lopped and scattered to less than 2 feet in height. Slash should be scattered back over the fire line after the fire is out. Slash in intermittent and perennial watercourses will be removed to above the high-water mark. Treat slash that has been generated by defensible space and along Hwy. 63 corridor and other structure defense areas (including Cowles Lease Cabins, Holy Ghost), and haul to FS Rd. 646 and disburse it in the burned Davis-Willow burn area.

# REDUCTION OF EROSION ON HAND LINES AND DOZER LINES

Waterbars are to be constructed on hand lines and dozer lines; this includes all interior and perimeter fire lines constructed during fire suppression activities. Construct water bars or rolling dips, depending on effectiveness, on hand lines and dozer lines; this includes all interior and perimeter fire lines constructed during the fire. Waterbars should be constructed diagonally (at 30 to 35 degrees) not perpendicular, to the suppression lines in order to divert runoff. Waterbars should not be constructed to divert runoff directly into a stream course. Construct drains such that water flows into un-burned areas wherever possible. On steeper slopes, waterbars may need to be constructed in an alternating pattern to prevent additional erosion from runoff. Insure that waterbars have open outlets to avoid restricting flows. Where possible, construct waterbars where rocks, vegetation, or debris are below the outlet to dissipate water. If any bar ditches along forest roads have been disturbed by dozers or equipment, they need to be re-established for proper drainage. After drainage is re-established on closed fire lines, plant native seed grasses.

The following guidelines are to be used in the spacing of waterbar construction:

Slope	Maximum Interval
0.0 - 4.0% slope	150 feet
5.0 - 9.9% slope	130 feet
10.0 - 14.9% slope	75 feet
15.0 - 40.0% slope	50 feet
40% slope and greater	20 feet

## **ROADS**

Roads on private lands leading to Drop Points may need to be restored. Drop Points, constructed turnarounds, helispots, helibases and other disturbances must be stabilized. Refer to item 2 and 3 above.

Re-establish all drainage structures (culverts, cross drains, ditches, rolling dips, down drains, berms) to pre-fire or functional conditions

Replace damaged roadside drains.

Where needed, re-grade after suppression activities.

Stabilize and/or control erosion caused by road activity or upslope suppression activities.

# DROP POINTS, HELISPOTS AND SAFETY ZONES

Treat safety zone construction by removing hang-ups and lopping slash to less than 3 feet in height. Slash and berms created during construction of safety zones will be treated. Remove berm and spread back into safety zone. Place slash on safety zone and treat as above in item 4 and seed with native seed mixes.

# **DEBRIS CLEAN UP**

Collect and remove all trash and flagging from within fire area, staging areas, drop points, helispots, and helibase locations.

# **OTHER STRUCTURES**

Repair or replace all structures damaged during fireline construction activities (i.e. fences, gates, cattle guards, culverts, etc.).

- ICP: rehabilitation will occur according to specifications negotiated with the Park Superintendent.
- Mobile Retardant Plant: rehabilitation will occur according to specifications negotiated with the landowner.

Progress of the rehabilitation will be reported daily by Operations to the Situation Unit and tracked on a Suppression rehabilitation map for the Incident. Actions may be accomplished by an Incident Management Team assigned to the incident.

# **HEALTH AND SAFETY MESSAGE**

# **SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: **Tres Lagunas** DATE: 060713 Fri Oper. Period: Day and Swing Shift

# **Major Hazards and Risks:**

Driving, Air Operations, Snags, Steep Rough Terrain, Communication, Mopup, Environmental Hazards (bear), Base and Camp Hygiene.

Fire Order of the Day -Fight fire aggressively, having provided for *safety* first.

- Driving: Expect more residential traffic on Hwy 63 as the Roadblock relocation allowed 100 residents access to their homes. Vehicle traffic is increasing from base camp to spike camps. Obey speed limits in Pecos area.
- Deer are common on Hwy 63 especially at dusk and dawn.
- All Divisions. Be sure to keep personnel at least 500 feet from bucket or retardant drops.
- Div B/C/E//T Develop warning system for rolling rocks, snags and weakened trees on steep slopes.
- Mopup has begun on most divisions. Look up, look down, look around.
- 70% chance of thunderstorms tomorrow over fire area. Carry rain gear and extra layers.
- Backhaul all trash to reduce wildlife (bear) encounters.

# **Watch Out Situation of the Day**

13.ON A HILLSIDE WHERE ROLLING MATERIAL CAN IGNITE FUEL BELOW

# Mitigate or Change Tactics When Faced With

- ⇒ Indirect Fireline
- ⇒ Lack of Anchor Points
- ⇒ Frontal Assault
- ⇒ High or Extreme Wind Conditions
- ⇒ Reburn Potential
- ⇒ Presence of Hazardous Materials
- ⇒ Lack of Communications With All Forces
- ⇒ Structural Protection
- ⇒ Spotting Becomes Common
- ⇒ Downhill Line Construction
- ⇒ Underslung Line
- ⇒ Fatigued Crews
- ⇒ Re-ignition Becoming Common

Incident Safety Officers: Dan Rael, Gary Kemp (t), Bill Kornrumph, Elmer Orosco, Ray Corral (t), TC Smith, and Fred Schoeffler.

# LCES Analysis of Tactical Actions - ICS 215A

ncident Name:				Date							-		Ctical Actions - ICS 215A Operational Period:		
Tres Lagunas				06	06.07.13 Friday					Dayshift 0600-1800					
Troo Eagundo					/ISIO			_	<u> </u>				Daysimic 6000 1000		
TACTICAL HAZARDS	AII DIV	A/Z	В	С	Е	Т		w		Str 1	Str II	Swing	LCES MITIGATION		
Driving	Х												Drive defensively with lights on, seatbelts fastened. Watch for wildlife on highway ROW at dusk and dawn. Keep windshield clean. Use chock blocks. Maintain LCES.		
Downhill/Indirect Fireline			х	х	х	Х	Х					Х	Follow downhill line standards IRPG p8. Ensure line is anchored. Maintain LCES. Ensur lookout can see entire area. Use ATGS as lookout when available.		
Mid-slope/Underslung Fireline	Х												Build Cup trench as needed. Post lookout that can see all areas of line construction. Monitor Wx and Fire Behavior. Maintain LCES.		
Extreme Conditions (Spotting, Wind)													Know current and expected Wx and Fire Behavior. Identify trigger pointsof engagement and make them known. Maintain LCES.		
Unburned Fuels and Reburn Potential	Х									Х		Х	Ensure line is anchored. Know current and expected Wx and Fire Behavior. Identify areas make them known. Maintain LCES. IMET to broadcast Wx changes.		
Firing Operations													Develop burn plan for Complex burns. Give complete briefings on assignments, firing sequence and crew spacing. Maintain LCES.		
Span of Control													Maintain proper supervisor ratio. Order additional resources as needed.		
Heavy Equipment			Х			Х	Х	Х					Utilize equipment bosses. Maintain contact with operators. Stay clear of heavy equipmer Be aware of loose soil and rocks. Maintain LCES.		
Air Operations / Multi- Aircraft	Х												Maintain good communication with ATGS and pilots. Ensure all personnel are at least 50 feet from bucket or retardant drops. Maintain LCES.		
Hazard trees/Snags	Х												Assess, Identify, Communicate, Isolate. (IRPG pg 20). Watch for wind shifts. Maint LCES.		
Hazardous Materials						Х				Х	Х	Х	Utilize the Incident Response Pocket Guide page 26. Identify, mark and avoid Hazmat situations. Maintain LCES. Use HAZMAT teams.		
Mopup	Х												Utillize required PPE. Brief on Common Denominators of Fatality Fires. Use extra caution areas with ash pits. Maintain LCES.		
Transportation greater than 1 hour												Х	Limit shifts to 14 hours. Maintain 2:1 work to rest ratio. Consider spike camps.		
Communication	Х												DO NOT engage unless effective communications exist. Identify dead spots and report to Com unit. Use human repeaters as needed. Only use assigned frequencies. Know Leaders Intent. Maintain LCES.		
Weather Conditions	Х												Weather observations taken by crews and given to IMET. IMET to broadcast changes Wx conditions.		
Environmental Hazards	Х												Discuss local wildlife, livestock and vegetation hazards (ie bears, snakes, bees, cattle, cactus, poison oak) Do not harass or instigate any confrontation with animals. Identify a flag hazards. Identify location of nearest medical assistance.		
Powerline Hazards		Х			х					Х	Х	х	Locate and avoid high voltage powerlines. Consider all power lines as energized. Conta power company to deactivate line if needed. (IRPG pg. 22)		
Structure Protection		Х			Х	Х				Х	Х	Х	Follow Structural Watch Outs IRPG pgs 10-14. Identify electric/ gas lines, propane tanks and storage sheds. Park vehicles for egress and keep roads/access clear.		
Base/Spike Camp				Х	Х	Х	Х	Χ	Х	Х		Х	Ensure daily briefing is conducted and IAP's are delivered. Maintain personal hygiene. Wash hands before each meal.		
Transfer Of Command													Know who your supervisor is, establish communications and leaders intent before engaging		
Mines						Х						Identify, Flag and Avoid areas with current or histiorical Mining activity. Inform supervisor and others of hazards such as open shafts or tunnels.			
Thunderstorm	Х												Review IRPG pg 19 for thunder

#### Incident within an Incident Checklist and Initial Action (June 6, 2010)

Purpose: The purpose of this checklist is to provide guidelines to initiate an orderly action on an emergency within the responsibilities delegated to the New Mexico Incident Management Team on this incident. This checklist is designed as a tactical approach as an initial action and part of this Incident Action Plan. The Incident Commander may approve subsequent actions that address additional needs due to the nature of the emergency.

#### Direction from the Incident Commander:

- The nearest Operations Chief, Division Supervisor or highest qualified overhead on scene will initially be the **POINT OF CONTACT** for the emergency.
- Radio Communication will be on that division's tactical frequency, unless otherwise designated by the Operations Chief and will take priority over other radio traffic.
- The involved Division will communicate with Communications "on Command"
- Names of injured or deceased individuals will not be given over the radio. Use of crew names or
  designators should be limited. Deceased individuals and their equipment are not to be moved, except to
  accomplish rescue work or to protect the health and safety of others.

#### OPERATIONS CHIEF, DIVISION SUPERVISOR, OR HIGHEST QUALIFIED OVERHEAD

- Communications will be informed of the on-scene **POINT OF CONTACT** by position/last name (i.e. Task Force Leader Smith, Facilities Unit Leader Jones)
- Size-up emergency: nature, number of people, medical condition, details of aircraft or vehicles involved, location, medical treatment and transportation needs, law enforcement, rescue or hazmat response needs.
- Communicates size-up to Operations Section Chief
- Coordinates line EMT & Paramedic response and communications for air-medical and/or ground transportation needs and with the Medical Unit.
- Remove all unnecessary personnel from the site.

# AIR ATTACK SUPERVISOR

- Obtain Coordinates of location and Coordinate air-medical response.
- o Assists designated **POINT OF CONTACT** in coordinating the emergency response.

#### SAFETY OFFICER

- o Responds to scene after coordination with the designated Operations supervisor.
- O Assesses and recommends investigative responses and critical incident stress response.
- o IMT Safety Officer in coordination with the Medical Unit Leader will identify and prioritize transport options in terms of efficiency.

#### **COMMUNICATION UNIT LEADER**

- o Maintains clear radio traffic and monitors communications to support response.
- o Immediately Notify Medical Unit Leader and Safety Officer.
- o Notify IC, Deputy IC, Operations Chief and the Plans Chief of the emergency.

## MEDICAL UNIT LEADER

- o Coordinate with Operations to support the response.
- $\circ\quad$  Assign a MEDL to the scene. Assign other positions to support the response, as needed.
- o Constantly monitor and assess the appropriate response in coordination with Operations.

# IC, COMMAND & GENERAL STAFF

- Manage the emergency and direct specific responsibilities to individual positions for a continued appropriate response.
- O Notify the host unit and host dispatch center of the size-up information.
- O Constantly monitor and assess the appropriate response and adapt direction, as needed.
- o Submit all documentation pertaining to the emergency to the Plans Chief.

## Medical Emergency Procedures

In the event of a medical emergency the On-Scene Point of Contact (POC) will provide the following information to Communications

- 1. Declare the nature of the emergency.
- a. Medical injury/illness? If injury/illness is it life threatening? (Medical Transport vs. Medical Emergency)
  - "Medical Emergency" = Life Threatening incidents.
    "Medical Transport" = non-life threatening incidents.
- 2. If Life Threatening, request that the designated frequency be cleared for emergency traffic
- 3. Contact Tres Lagunas Communications on Command frequency
- 4. Identify the highest qualified overhead as on-Scene POC by Last name (i.e. Smith)
- 5. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates)
  6. Identify on-scene medical personnel by name (i.e. Jones)

- Request any additional resources and/or equipment needed.
- 9. Document all information received and transmitted on the radio or phone.
- 10. Identify any changes in the On-Scene POC or medical personnel as they occur.

# Tres Lagunas Fire RESOURCE CONSIDERATIONS

Pecos-Las Vegas Resource Concerns:

# **WILDLIFE**

**Mexican Spotted Owl** (Federally Threatened) – Occurrence of MSO protected activity center in Indian Creek and Cow Creek.

Mitigations – Please minimize large amounts of disturbance such as dozer lines in narrow canyons that remove large snags, large diameter trees and wood piles.

**Fish** – Rio Grande Cutthroat Trout – Occur in headwaters of Indian Creek, Macho Creek, Dalton Creek. Very distinct lineage in Pecos. Different from rest of populations in NM since isolated for so long.

Mitigations – If fire enters these areas minimize the amount of shade removed from streams. Removal of conifers is OK. Try to keep deciduous vegetation to provide shade and keep stream temperatures cool. If fire gets within a few miles of these headwaters of these streams-contact Resource Area Advisor, Esther Nelson to employ fish removals.

# **PLANTS**

**Holy Ghost Ipomopsis** – Federally Threatened. This plant occurs in only four populations in the ENTIRE Pecos area. If we lost the Holy Ghost population, there is high probability the plant will go extinct. Occurs in Indian Creek, Holy Ghost Canyon and others.

Mitigations – Populations flagged in Indian creek (white and orange spotted flagging) and Holy Ghost Canyon (blue and black-striped flagging) along roadside. No ground disturbance of this plant. No dozer or digging of line through population. Light fire OK. No fire retardant drops on this plant. Very vulnerable.

# **WATER**

Let Resource Advisor know of any activities that cause disturbance in waterways.

# **RANGE**

Livestock present on Rosilla allotment, Bull Creek allotment, Valle Medio allotment, Beaver allotment. When conducting burnouts, need to determine locations of water and spring developments and corrals to minimize destruction of those structures.

#### **TIMBER**

Ridge between Dalton and Indian Creek has old growth, mature ponderosa pine. Would like to keep these trees intact.

# HUMAN RESOURCES MESSAGE TRES LAGUNAS FIRE—PECOS, NM JUNE 07, 2013

# **Exercise TOLERANCE.**

Pledge to respect people

whose abilities, beliefs, culture, race, sexual identity or other characteristics are different from your own.

# ~~Thought for the Day~~

Nothing gives one person so great advantage over another as to remain always cool and unruffled under all circumstances.

Thomas Jefferson – 3<sup>rd</sup> President of the United States and Principal Author of the Declaration of Independence

Human Resources Specialist: Jim Maes (505) 710-4774 Human Resources Specialist (t): Gina Melchor (505) 274-9933

## WHY?

⇒ At Check In and/or during the incident- We want to do what we can to ensure you have a quality training experience!!

⇒ At DEMOB - We need to record the information to ensure you get credit for your training experience and the incident has its training report accurate.

# **HOW MUCH TIME?**

 $\Rightarrow$  It takes about 5 minutes to what needs to be done.

#### WHAT TO BRING?

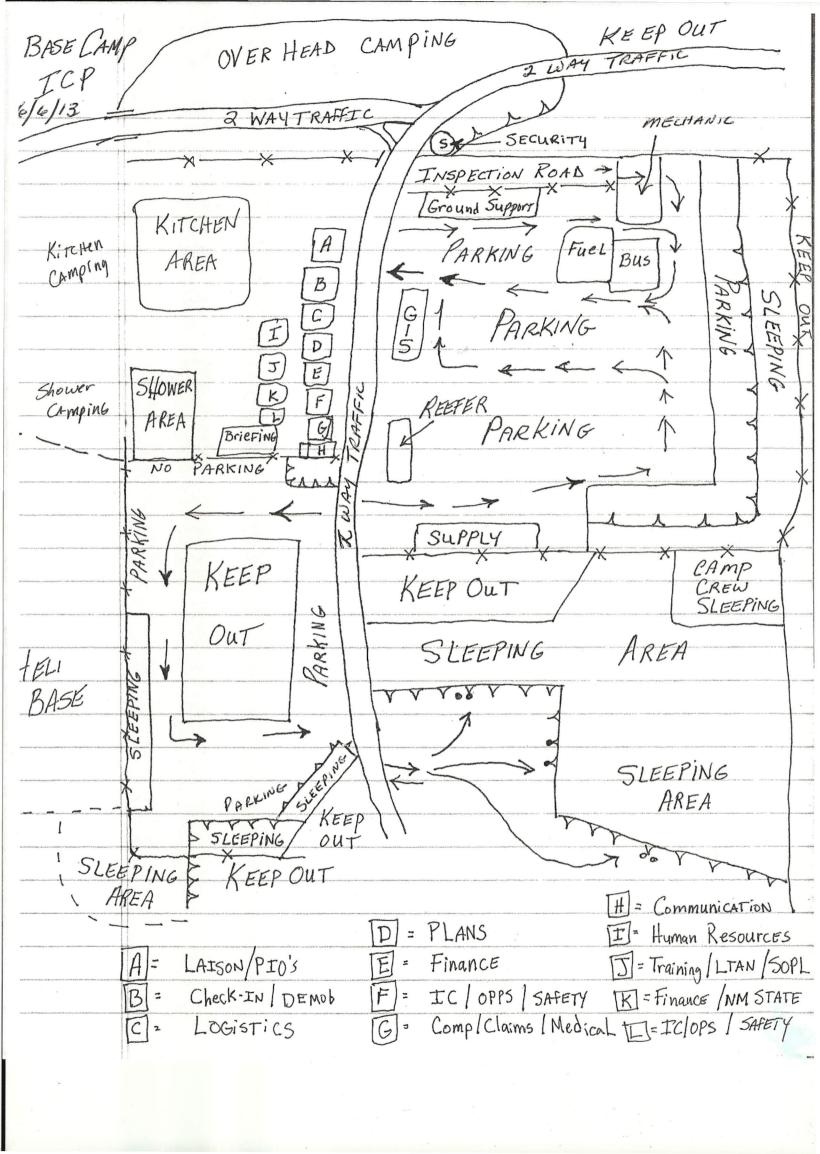

⇒ Trainees need to bring their Taskbooks and Red Card.....and Trainer.

# WHERE?

Training Specialist Ann Hutchinson (T) the Training Tent usually but you may wandering around (looking for trainees). Ann's cell number is 623-293-8628

Have a safe.....and learning assignment!!!

If you believe your training is finished, you may be trained but you are finished. - Anonymous
