28. Significant Events for the Time Period Reported (summarize significant progress made, evacuations, incident growth, etc.):

**Backing and flanking fire with short intermittent uphill runs. Most activity today was on the west side along Rattlesnake Canyon and on the south in upper Douglas Canyon. Crews with aviation support started a burnout in Rattlesnake Canyon from Corral Canyon towards Powers Garden to contain the fire east of Rattlesnake Canyon and provide historic structure protection. Crews continued to prep and chip along High Creek Road to the SE.**

29. Primary Fuel Model, or Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc.):

**Fuel Model: Timber (Grass and Understory)**

**Mostly pinyon/oak with a high amount of manzanita understory at the higher elevations. Grass and scattered PJ and lower elevations.**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc.):

**null**

33. Life, Safety, and Health Status/Threat Remarks:

**Except for minor incidents there have been no reportable accidents or illnesses on the fire to date.**

34. Life, Safety, and Health Threat Management:

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour timeframes:  
**Continued movement to the S and SW. Isolated runs and single tree to group torching. Fire has reached Rattlesnake Canyon at the confluence with Corral Canyon between Powers Garden and the Ball Mill. Fire is established in the upper reaches of Douglas Canyon.**

12 hours: **Canyon between Powers Garden and the Ball Mill. Fire is established in the upper reaches of Douglas Canyon.**

24 hours: **same**

48 hours: **same**

72 hours: **same with possible movement to the East.**

Anticipated after 72 hours: **Same**

37. Strategic Objectives (define planned end-state for incident):  
**Manage fire within planning area boundary using strategy and tactics necessary to minimize impacts to sensitive areas and values at risk while maximizing benefits to resources. Protect historic structures and keep fire from entering state and private lands.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Limited threat to Deer Creek Ranch. More prominent threat to historic structures in Rattlesnake Canyon and the head of Redfield Canyon to the south.**

24 hours: **Same**

48 hours: **Same**

72 hours: **Same**

Anticipated after 72 hours: **Same**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **None at this time**

24 hours: **None at this time**

48 hours: **None**

72 hours: **None**

Anticipated after 72 hours: **None at this time**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,

3) anticipated results.  
**Utilize lighting patterns to minimize fire severity and provide for backing fire where possible. Provide point protection of private lands and historic structures. Utilize MIST tactics within the wilderness. Construct and hold containment lines where feasible.**

41. Planned Actions for Next Operational Period:  
**Continue to prep and assess holding features on the east side. Continue to hold the line on the north side. Continue burnout operations in Rattlesnake Canyon from Corral Canyon to Horse Canyon as feasible and protect historic structures. Apply fire as needed to limit fire activity and severity. Improve road in High Creek in the SE corner for a possible holding feature.**

42. Projected Final Incident Size/Area:

43. Anticipated Incident Containment or Completion Date:

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$2,468,000.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):  
**Safford experienced high afternoon E winds 35-40 mph, Gust 54. By the time it reached ICP to the east of the fire winds were 20-25 with minimal winds on the west side of the fire in Rattlesnake Canyon. The fire received a very light rain sprinkle today; mostly on the south end. Two helicopters on the incident are available for IA with one supporting IA on the Forest today.**
