

Oak Fire

AZ-CNF-000670/P3H56L (0305)

Incident Action Plan
Day Operational Period
July 4, 2014

INCIDENT OBJECTIVES	1. Incident Name Oak	2. Date 07/3/2014	3. Time 1600
----------------------------	--------------------------------	-----------------------------	------------------------

4. Operational Period
07/04/2014 DAY 0630-2000

5. General Control Objectives for the Incident (Include alternatives)
1. Provide for firefighter, aviation, and public safety.
 2. Prevent fire from spreading to private lands and protect historic structures.
 3. Try to contain fire activity within the Coronado National Forest.
 4. Manage this natural ignition fire to improve wildlife habitat and forage; improve rangeland conditions; watershed conditions; improve forest health.
 5. Minimize fire severity impacts to T&E habitat (i.e. Chiricahua Leopard Frog, Mexican spotted owl). Try to maintain buffer zones to trap sediment.
 6. Utilize Minimum Impact Suppression Tactics (MIST) when conducting fire management operations in the Wilderness.
 7. Work with media outlets and social media tools to provide the public timely and accurate information.

6. Weather Forecast for Period

See attached Weather Forecast

7. General Safety Message

Driving on Forest Roads takes your full attention!

.DISCUSSION...A SLIGHT CHANCE OF THUNDERSTORMS CAN BE EXPECTED DURING THE MORNING HOURS FRIDAY...WITH SCATTERED THUNDERSTORMS FRIDAY AFTERNOON AND EVENING. EXPECT STRONG...GUSTY AND ERRATIC WINDS WITH ANY THUNDERSTORM. MOISTURE WILL REMAIN IN PLACE THROUGH THE WEEKEND WHICH WILL RESULT IN THE DAILY CYCLE OF MAINLY AFTERNOON AND EVENING THUNDERSTORMS.

.INDEPENDENCE DAY...

SKY/WEATHER.....PARTLY CLOUDY THEN BECOMING MOSTLY CLOUDY.
A SLIGHT CHANCE OF SHOWERS AND THUNDERSTORMS
IN THE MORNING...WITH SCATTERED SHOWERS AND
THUNDERSTORMS IN THE AFTERNOON.
MAX TEMPERATURE.....89 TO 92 DEGS.
MIN HUMIDITY.....18 TO 21 PCT.
20-FOOT WINDS.....EAST TO SOUTHEAST 3 TO 8 MPH IN THE MORNING
AND 7 TO 12 MPH IN THE AFTERNOON. STRONG...
GUSTY AND ERRATIC WINDS NEAR ANY THUNDERSTORMS.
LAL.....2 IN THE MORNING AND 4 IN THE AFTERNOON.
CHANCE OF RAIN.....10 PERCENT IN THE MORNING AND 40 PERCENT IN
THE AFTERNOON.
HAINES INDEX.....4 LOW.

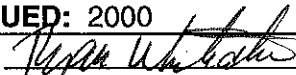

.FRIDAY NIGHT...

SKY/WEATHER.....MOSTLY CLOUDY. SCATTERED SHOWERS AND
THUNDERSTORMS IN THE EVENING. A SLIGHT CHANCE
OF SHOWERS AND THUNDERSTORMS OVERNIGHT.
MIN TEMPERATURE.....65 TO 68 DEGS.
MAX HUMIDITY.....62 TO 65 PCT.
20-FOOT WINDS.....SOUTH TO SOUTHWEST 5 TO 10 MPH IN THE EVENING
BECOMING LIGHT AND VARIABLE 2 TO 7 MPH
OVERNIGHT. STRONG...GUSTY AND ERRATIC WINDS
NEAR ANY THUNDERSTORMS.
LAL.....4 UNTIL 2200...THEN 2.
CHANCE OF RAIN.....40 PERCENT UNTIL 2200...THEN 10 PERCENT.
HAINES INDEX.....3 VERY LOW.

.SATURDAY...

SKY/WEATHER.....PARTLY CLOUDY THEN BECOMING MOSTLY CLOUDY.
SLIGHT CHANCE OF SHOWERS AND THUNDERSTORMS
IN THE MORNING...WITH SCATTERED SHOWERS AND
THUNDERSTORMS IN THE AFTERNOON.
MAX TEMPERATURE.....90 TO 93 DEGS.
MIN HUMIDITY.....17 TO 20 PCT.
20-FOOT WINDS.....WEST TO NORTHWEST 3 TO 8 MPH IN THE MORNING...
INCREASING TO 7 TO 12 MPH IN THE AFTERNOON.
STRONG...GUSTY AND ERRATIC WINDS NEAR ANY
THUNDERSTORMS.
LAL.....2 IN THE MORNING AND 4 IN THE AFTERNOON.
CHANCE OF RAIN.....10 PERCENT IN THE MORNING AND 40 PERCENT IN
THE AFTERNOON.
HAINES INDEX.....3 VERY LOW.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 7	TYPE OF FIRE: Wildfire
FIRE NAME: Oak	OPERATIONAL PERIOD: Day 7/4/2014
DATE ISSUED: 7/3/2014	TIME ISSUED: 2000
UNIT: Coronado Nat'l Forest, Safford RD	SIGNED: 
	Typed/printed: Ryan Whiteaker, FBAN

INPUTS

WEATHER SUMMARY:

Temp: 89-92, RH: 18-21%; Winds: E to SE 3-8 in the morning then 7-12 in the afternoon. Gusty and erratic near any storms. Haines of 4, Low.

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fire activity throughout the fire has been slope and fuels driven. This is either from roll out or fire that has backed down slopes and then aligned. Fuels are in the area and very receptive to ignition. There is also a large component of dead/dead and down fuels in the entire mountain range. This is in large part to the drought and the heavy freeze in 2011 that killed or set back a large number of oak trees in Southern AZ. Leaf drop could also be contributing to backing fire spread. Any outflow winds from approaching thunderstorms could cause rapid rates of spread in all directions anywhere that heat and open flame is present. Any new starts could see rapid rates of spread as well.

The fuel moisture readings are: 1000 hrs are at 3% at noon creek and 7% in Shake Trail. The 100 hour fuel moistures in the same sample sites are in the very low single digits. Live fuel moistures are 87% in the Manzanita, 92% in the Juniper, 93% in the Emery Oak and 88% in the AZ White Oak. The burning period tends to be 0900 to 2000- 2200 at most elevations although it has started as early as 0700 and go well into the night.

ROS: 40-50 ch/hr. FL: brush 5-10 feet. Higher with alignment.

PIG:90%

SPECIFIC:

DIV U: The fire will continue to back its way down towards Rattlesnake Canyon. The best potential for the fire to make into Rattlesnake is backing down Corral Canyon and Brushy Canyon. If it gets down into the bottom of Rattlesnake it has plenty of potential to continue to move to the west and north and threaten the cabins in the bottom of the canyon. Be aware that the fire could get seated in the canyon and gain alignment.

DIV T: The fire will continue to back down some of the east facing slopes up high and make some short uphill runs. Most of this will be up high on the slopes. This portion of the fire has been the earliest piece to show fire activity due to the sun hitting those slopes and warming them first.

DIV V: Backing fire with the upslope runs will be the activity here today. Once the fire backs down and lines up with wind and slope there will be short runs. This could be intense for a short duration.

AIR OPERATIONS: Expect more cloud build up this afternoon. Turbulence will increase with these clouds and outflow winds could be very strong. Strong outflow winds could impact helicopter operations this afternoon.

SAFETY.

Outflow winds could cause some issues if a cell passes over the fire. This time of year rains can be short duration but high intensity. .

"He never crosses the line, and the line wouldn't dare to cross him."

Health and Safety Message

It's better well done than well said

HAPPY BIRTHDAY AMERICA

Air Operations

This fire has 6 aircraft supporting ground crews. They are a critical part of the overall strategy, so when you order them up be ready for them when they arrive. Assure everyone is out of the drop area, you have good communications between ground and air, and continue to Look UP, Look Down, Look Around. Review blue pages 56-59 in your IRPG.

Driving:

It's a big holiday weekend so heads up for more traffic on the roads. Pay close attention to defensive driving with seat belts and lights on. Roads can be steep, rocky and rough on tires, so slow down. Dust on the roads is increasing so slow down and move over for others (especially vehicles with more lug nuts than you).

Fire Weather

The weather has changed. The chance for thunderstorms dictates you review p. 21 in your IRPG, and have a plan to deal with lightning and rain/mud before they happen. It is still hot and dry so maintain your hydration and keep an eye on each other for heat-related injuries.

Communications

Establish and test the communication system, including Tac, Command, and Air/Ground channels before you need them. There will be dead spots caused by elevation and topographical features so use human repeaters if necessary. Cell phone coverage may be poor, spotty or non-existent.

Accident/Injury Procedures

In your daily safety sessions, practice "What if..." scenarios about how you would medevac a serious injury from your location. Review section 8 of the ICS 206 (Medical Plan) and pages 108 & 109 in your IRPG.

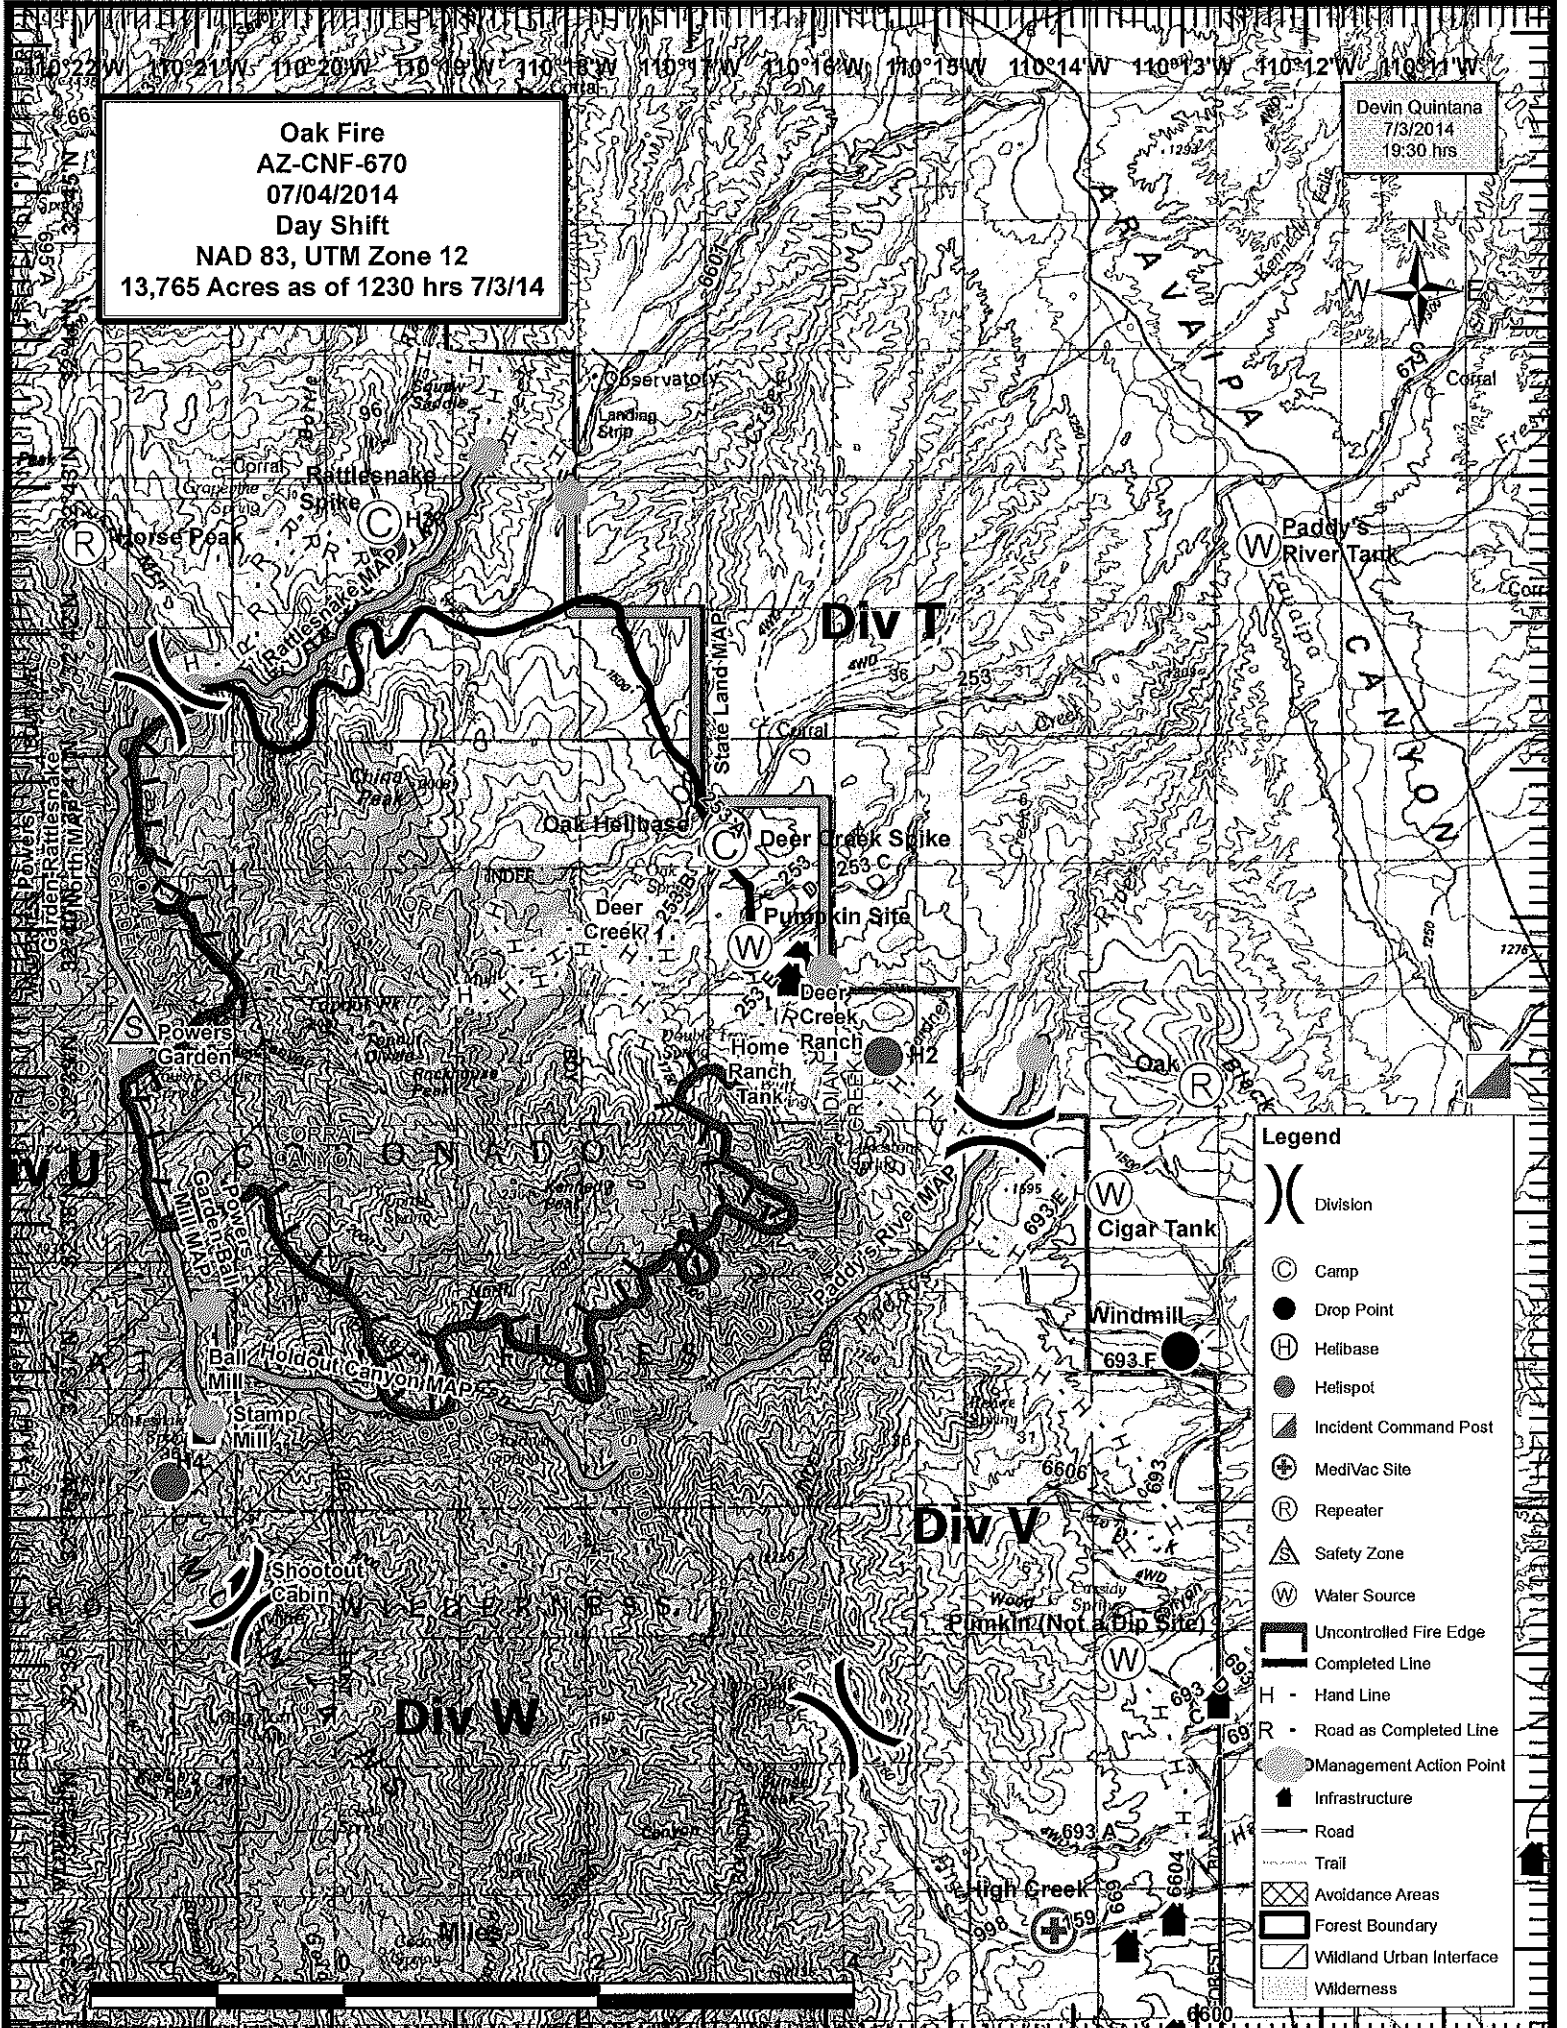

Safety Officers: John McGee, Steve Hensel, Damon McRae, Mike Cachero (T)
