SAFETY MESSAGE

Transportation: With moisture comes increased road hazards. A little moisture on the dirt roads will be good but too much and the dust becomes mud (SLIPPERY). Asphalt also can become quite slippery after being dry for months; especially at intersections. Clean windshields . Walk when the road becomes impassible. Many stretches of road are raised where going off the road would result in a roll over instead of a slide in. Drive slowly and be defensive & courteous (wave & smile). Slower speeds with any rain - Max. speed through Wisdom is <25 MPH. Smaller vehicles yield to buses, tenders, dozers & engines. Pull over to use cell phone / radio. Use 4 wheelers responsibly, safety gear on at all times.

Weather Events: In case of high winds, lightning, or rain events, pull out to a safe area (crew rigs) to wait for more favorable conditions. Wind will bring down additional snags and will put a lot of dust / ash in the air. Anyone on an exposed ridge or under a large tree is in danger during a lightning storm. Footing and driving conditions become treacherous with rain.

I. A.: Know where your going & use a controlled / orderly response. With strike team or task force highway travel, leave enough distance between engines for cars to pass you.

10 Standard Fire Fighting Orders

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times. Observe & use scouts.
3. Base all action on current and expected fire behavior of the fire.
4. Have escape routes and make them known.
5. Post a lookout when there is possible danger.
6. Stay alert. Keep calm. Think clearly. Act decisively.
7. Give clear instructions and be sure they are understood.
8. Maintain prompt communications with your personnel, your boss, and adjoining forces.
9. Maintain control of your forces at all times.
10. "Fight fire aggressively but provide for safety first."

This Order, might be changed just slightly to read:

"Fight fire aggressively having provided for safety first."

Fireline Supply Orders

All supply orders from the fireline will be placed by Division/Group Supervisors through the Communications Unit with the following information:

- Use the division designator and the sequential order number (Example: the third order from Division B would be B-3)
- Item description and quantity (utilized the CWZ Line-Supply Order Form)
- Delivery method (air/ground)
- Time needed (avoid ASAP time frames)
- Delivery point - coordinates (dd*mm.mm' x ddd*mm.mm') or drop point number
- Contact person and Channel to contact them
- Fireline orders should be consolidated as much as possible and requests should be made with an expected delivery time of 2 hours if the item(s) is on hand
- If an item is critical, indicate at time of order

Fireline Preparation

- 1. Prepare along the roads by cutting juniper and oaks less than 7".**
- 2. FLUSH CUT, FLUSH CUT, FLUSH CUT the stumps, as close to the ground as possible. NO pointy stumps- they pop loggers' tires.**
- 3. Cut approximately 1 chain in from the road, using discretion as to whether the area would hold a fire. Go farther in if it needs it, go lightly in areas that have a lower risk to move down the road.**
- 4. Lop trees in 2-3' lengths and scatter the material.**
- 5. Any questions please contact the Incident Commander**
