4. OPERATIONAL PERIOD (DATE/TIME)

July 13, 2016 0700-2000

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Objectives

- Provide for the safety of incident responders and the public through the application and implementation of sound risk management analysis; plan for and provide timely evacuations as needed.
- Efficiently suppress the fire using a full range of suppression tactics, while minimizing exposure to firefighters.
- Values at Risk on USFS, Private Lands are communicated and protected from adverse fire and incident management actions; keep fire away from infrastructure.

INCIDENT REQUIREMENTS

- Foster and strengthen relationships between incident agencies, partners, cooperators, responders, and communities affected/potentially affected by the fire.
- Provide timely and accurate information to the public and media on the fire status and incident activities.
- Minimize negative impacts to natural, wildlife, and cultural resources.
 - Utilize resource advisors for timely advice and recommendations
- Coordinate with affected agencies/organizations within the TFR

VALUES AT RISK

- Incident Responders and the public (#1 Priority)
- Homes and Structures
- Communications sites
- Cultural and historic sites/areas
- Allotments
- Recreation sites – Trails

SAFETY THOUGHT

Watch for falling snags! This fire has created a lot of snags and with the predicted winds this hazard will increase.

MAJOR HAZARDS AND RISKS		
<ul style="list-style-type: none"> • Hiking • Winds • Ridgetop winds – 10 -15 mph 	<ul style="list-style-type: none"> • Rolling Material • Weather Hot and Dry • Lighting 	<ul style="list-style-type: none"> • Dehydration • Mop-up • Snags and other hazards

- Predicted winds on the fire are expected to be from the N-NW but can also be driven by terrain as well. Stay alert to these possible changes.
- Watch footing while hiking and alert crewmembers as you travel of hazards along the trail.
- Thunderstorms are predicted in the 3-5 day forecast with a 10% chance of precipitation. A slight possibility of lightning is also in place. Historically if large amounts of lightning are occurring in this area then there is a greater chance of heavy precipitation. Be sure to pack rain gear.
- Hot and dry conditions exist today and will continue through the week and the potential for heat related illness is likely in fatigued firefighters. Drink plenty of fluids and get adequate rest.
- Snags are always a hazard while working either in the green or in the black. Be sure to scout area prior to getting involved in any work activity. Check for cat faces, leaners and widow-maker especially in hot and dry conditions as this will cause fire weakened trees to fall sooner than later. Be sure to flag and make everyone aware of the hazards. Post lookouts when necessary especially when winds begin to pick up.
- Review the IRPG on hazards that you may not be familiar with. Complete an AAR at the end of each operational period to identify how to improve for the next shift.
