| <ol style="list-style-type: none"> 1. Prevent and /or reduce impacts caused by the Cedar Fire to residents, businesses, and critical infrastructure and high value resources while ensuring public, firefighter, and aviation safety. Ensure that all incident actions reflect this commitment to safety through sound risk assessment, adherence to the 10 standard firefighting orders, mitigation of the 18 situations that shout watch out and LCES. If you cannot mitigate a tactical hazard to an acceptable level of risk, do not implement the corresponding tactical action. Do not let cost objectives minimize safety and risk management. Ensure that Leader's Intent is clearly communicated and understood. 2. Coordinate incident management activities with White Mountain Apache Tribe, Bureau of Indian Affairs, Navajo County, and Municipal entities including but not limited to; suppression actions, support needs, and rehabilitation. Tactics will be most aggressive where values at risk are high. Take advantage of natural features such as breaks in fuels, topographic features, or changes in weather. 3. Treat all Incident Management personnel, cooperators, contractors, local citizens and the public with dignity and respect. Ensure prompt and accurate communication that fosters discussion, embraces local knowledge, and encourages interactions with host agencies, local cooperators, and private landowners. 4. FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1

TYPE OF FIRE: Wildfire

FIRE NAME: Cedar

OPERATIONAL PERIOD: June 17, 2016 Day Shift

DATE ISSUED: June 16, 2016

TIME ISSUED: 2200 hrs

UNIT: AZ-FTA

SIGNED: Holly P. Kleindienst FBAN/LTAN

INPUTS

WEATHER SUMMARY:

EXPECT DRY CONDITIONS AND BREEZY SOUTHWEST WINDS ON FRIDAY.

Max Temp: 85-87 F (Up 4-5 degrees)

Min RH: 7-9% (Down 1-2%)

Winds: Light drainage winds until 8 am, becoming SW 8-12 mph with gust 15-20 mph

Haines: 5 (Moderate)

ON SATURDAY, WARMER TEMPS, AND LIGHTER WINDS. SUNDAY THRU TUESDAY, WILL BE HOT WITH RECORD BREAKING TEMPERATURES AND LIGHTER WINDS.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Rapid fire growth like that seen on Wednesday is unlikely, but factors still support active fire behavior!

Factors reducing extreme fire behavior:

- Gradually decreasing daytime winds Friday and Saturday.
- Decreasing BI (Burning Index is a daily trend that reflects potential flame length.)

Factors supporting extreme fire behavior:

- Low fuel moisture: 1 hr fuels at 2%, 10 hrs at 3%, 100 hrs at 6%, 1000 hrs at 8%
- ERC above the 97th percentile (Energy Release Component is a seasonal trend for fuel dryness.)
- Increasing temperatures.
- Increasing Haines Index. Saturday will be a Haines of 6.

SPECIFIC:

Rates of spread when winds align with slopes:

- Pine and Mixed Conifer– 7-20 ch/hr (up to 1/4 mile/hr)
- Ridgtop shrub mix – 45-133 ch/hr (that's up to 2 mile/hr!)

Flame Lengths:

- 3-10 feet

Spotting distance:

- 3/10th of a mile

AIR OPERATIONS:

- Wind and temperature should be favorable for air operations over the fire.
- Smoke may limit air operations on all flanks of the fire until diurnal warming lifts smoke from surface.
- Expect VFR conditions on the south and east flanks of the fire, though smoke will likely continue to limit air operations over the north end of the fire in Division A.

SAFETY

Though wind speeds are somewhat reduced, numerous other indices are increasing. Continue to expect active fire behavior from interior burning or new spots, and short range spotting due to remaining winds, and increasing instability in the atmosphere.

INCIDENT Weather Forecast

FORECAST NO: 01
PREDICTION FOR: Friday Day Shift
SHIFT DATE: June 17, 2016

Weather Discussion: ...Getting HOT...and then VERY HOT...Continued very DRY...

*After a slow ramp up to seasonal warmth and dry conditions under breezy to windy conditions...today we see the start of a steep climb in temperatures combined with associated drying of the entire Southwestern U.S. The one thing in our favor will be a downward trend in winds as high pressure builds strong and centers over the state. This will weaken gradients and allow winds to slacken and become more terrain driven. Temperatures will be near record by Sunday and remain there for several days following. RH recoveries will be poor each night...and minimums will drop into the single digits each afternoon. We'll call it **abnormally HOT and extremely DRY. Conditions will be about as HOT and as DRY as they get!** Lack of strong winds will keep conditions short of Red Flag. Litter, or No, moisture expected the next week.*

Weather Forecast Friday:

Weather Forecast Friday Night:

Weather.....Clear. Meager RH recoveries. Thermal belt developing between 6400-6700 ft.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

Everyone is considered a Safety Officer

INCIDENT: Cedar Fire

DATE: 06/17/2016 TIME: Day Ops

Major Hazards and Risks:

- **Driving:** Drive slowly, head lights on, use seat belts. Expect an increase in traffic due to the weekend.
- **Weather:** Breezy and dry weather expected today. As the weekend approaches, be heads-up for changing conditions including increasing temperatures and lower humidities.
- **Communications:** Utilize human and/or aircraft repeaters if primary system is not functioning.
- **Aircraft:** Heads up if aircraft is used. Assess exposure risk versus gain before ordering
- **Rolling Terrain:** Watch your footing, loose debris, and rolling material.
- **Hazardous Trees:** Hazard trees are not necessarily snags, they may be green and healthy.

Fire Order of the Day – *Fight fire aggressively, having provided for safety first*

New resources may be moving into unfamiliar Divisions/Branches. It is absolutely essential that everyone on the fireline receives a thorough briefing. Supervisors should ensure that the briefing includes the predicted weather, fire behavior, safety message, communications plan, and the Special Instructions on the Division Assignment Form.

Additionally, take the time to discuss the task, purpose and end state of the work assignment; the residual safety risks of the work assigned; and the transport times to a hospital in the case of an injury so that the firefighters in the field can make the best risk informed decisions possible.

With higher temperatures, lower humidity's and long days – **EVERYONE NEEDS TO STAY HYDRATED, DRINK PLENTY OF FLUIDS!!**

1. FIRE NOT SCOUTED AND SIZED UP

Watch Out Situation for the Day

STANDARD FIRE ORDERS

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected fire behavior.
4. Identify escape routes and safety zones, and make them known.
5. Post lookouts when there is a possibility of danger.
6. Be alert, keep calm. Think clearly, Act decisively.
7. Maintain prompt communications with your forces, your adjoining forces.
8. Give clear instructions and insure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

INCIDENT EMERGENCY PLAN (IEP)

The goal of this Incident Emergency Plan (IEP) is to provide the guidelines necessary to locate, triage, extricate, treat and transport medical patients. Scene radio communications will be on a “tactical” radio channel and command communications will be on a “command” channel. Names of the injured or deceased should not be given over the radio. Deceased individuals and their equipment are not to be moved, except to accomplish rescue work or to protect the health and safety of others.

DIVISION/GROUP SUPERVISOR OR LINE SUPERVISOR CHECK LIST

- ❑ Conduct size-up of the Incident (location & nature of the accident, # of patients & type of resources needed).
- ❑ Coordinate paramedic & EMT response to the accident/illness.
- ❑ Begin “TRIAGE” – See page 48 from the 2010 Incident Response Pocket Guide.
- ❑ Establish Immediate, Delayed and Minor treatment areas as needed.
- ❑ Coordinate with Communications for ground ambulance and additional EMS resources.
- ❑ Coordinate with Air Attack for air-medical transportation resources.
- ❑ Evaluate special needs (Law Enforcement, Heavy Rescue and Hazardous Materials).
- ❑ Ensure traffic control, scene security and point-of-contact person are established.
- ❑ Designate ambulance/helicopter loading areas.
- ❑ Coordinate and document all patient transportation destinations.
- ❑ Coordinate with the Safety Officer to preserve the scene for accident investigation.

| Nature of Injury/Illness | | <i>Describe the injury (Ex: Broken leg with bleeding)</i> |
| Incident Name | | <i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i> |
| Incident Commander | | <i>Name of IC</i> |
| Patient Care | | <i>Name of Care Provider (Ex: EMT Smith)</i> |
