FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: Wildfire
FIRE NAME: Cedar	OPERATIONAL PERIOD: Sunday, June 19, 2016, NIGHT
DATE ISSUED: June 19, 2016	TIME ISSUED: 1400 hrs
UNIT: AZ-FTA	SIGNED: Holly P. Kleindienst FBAN/LTAN

INPUTS *HPK* 6/19/16

WEATHER SUMMARY:

SUBSTANTIAL SHIFT IN WIND DIRECTIONS OVERNIGHT!

- Min temps... mid-slope 62-67 F valley 58-62 F
- Min humidity... mid-slope 18-23% valley 25-30%
- Winds...
 - 1800-2100: Northerly 5-9 mph with gusts to 15
 - 2100-2400: Becoming variable... May see light westerlies...
 - 2400-0600: Predominantly southerly at 5-9 mph
 - Drainage bottoms will see downslope winds 3-5 mph after midnight
- Haines Index... 6 (High)

OUTPUTS

GENERAL FIRE BEHAVIOR:

During the evening hours expect:

- Open fire edge to continue to "MUNCH" its way southward.
- Individual tree and small group torching.
- Short duration runs when wind gusts align with uphill slopes, side drainages or exposed flats.
- Short range spotting up to ½ mile from ridgeline torching.

SPECIFIC:

- DIV A, B, Z – Light northerly winds will allow for continued securing of lines, and good visibility for locating and mitigating potential threats to the line in the evening hours. Expect smokier conditions after midnight, increasing into the morning hours.
- DIV S & Q
 - 1800-2200: Fire behavior as state above. Expect rates of spread between 1-7 ch/hr (1-7 ft/minute). With wind gusts, rates of spread could increase to 12 ch/hr, or higher if there is a brushy understory.
 - 2200-2400: fire behavior will begin to decrease, though localized areas experiencing strong drainage winds will experience higher fire behavior.
 - 2400-0600: a marked decrease in fire activity on the southern open burning edge as southerly winds push the fire back into itself. Uncontained fire from last night's slop over into West Cedar Creek SHOULD be sheltered from southerly influences in the early morning, and under the inversion, but this is a tricky picture to predict. Use due caution when winds begin to shift in this area.

SAFETY

ERC is at the Peak of the local fire season, when many large fires in the Southwest have exhibited unexpected, short term, high impact fire events.

Haines index is a pronounced 6 (High). Increased INSTABILITY combined with MODERATE FIRE ACTIVITY, and LOW WINDS can lead to plume driven fire activity which can rapidly push active fire in any, or every direction. Watch for signs of this rarely occurring phenomena including great stillness, and/or developing pyrocumulus.

The best response to suspected developing plume dominated fire behavior is to disengage to an unburnable area until the pyrocumulus breaks down. A loss of productivity for an hour or two far outweighs the loss of a firefighter during the rare event of a pyrocumulus collapse.

INCIDENT Weather Forecast

FORECAST NO: 05
 PREDICTION FOR: Sunday Night Shift
 SHIFT DATE: June 19-20, 2016
 TIME AND DATE
 FORECAST ISSUED: 1300 June 19, 2016

NAME OF FIRE: Cedar
 UNIT: Fort Apache Agency

Weather Discussion: ...Substantial shift in wind directions overnight - ...

Another night with winds as a concern. Tonight they should stay lighter...but a significant shift in direction is anticipated. Winds will start the night-shift from the north...and end the night-shift from the south. A transition will take place in the late evening hours...probably between 2200-2400 hrs. Speeds should be in the 5-10 mph range over the open, upper, and exposed parts of the incident with light downslope winds 3-5 mph dominating the drainages below mid-slope. Temperatures will continue mild and RH recovery will again be generally poor but begin to creep upward. Generally clear skies with a lot of smoke trapped in the drainages overnight. Another hot and dry day for Monday.

Sunday's Weather:

Sunny skies. Very hot and Dry with north winds. Max Temps: ~94-99. Min RH: ~4-8%. Winds: NNE 6 g12 mph.

Weather Forecast for Tonight:

Weather.....Mostly Clear with plenty of smoke hanging in the valleys. Meager RH recoveries. Winds shifting from northerly to southerly overnight. Thermal belt developing between 6400-6800 ft. el. Cool valleys/mild ridges.

Min Temperatures....Valley bottoms: 58-62. Slopes and ridges: 62-67.

Max Humidity.....Valley bottoms: 25-30%. Slopes and ridges: 18-23%.

Winds (20FT).....1800-2100 hrs: Northerly 5-9 mph with gusts to 15.
 2100-2400 hrs: Becoming variable between 2000 and 2400
 2400-0600 hrs: Shifting southerly 5-9 mph.
 Drainage bottoms will see downslope 3-5 mph after midnight.

Haines Index.....6 High

Lal.....1

Chance of Rain.....0%

Outlook For Monday:

Weather.....HOT and dry. Mostly sunny. Inversion breaking and smoke lifting after 1000 hrs. A few late-aftn buildups and possibly an isolated storm...mostly east of fire.

Max Temperatures...Mid-slopes...89-94 Valleys...93-98.

Min Humidity.....Mid-slopes... 10-13% Valleys...8-11%.

Winds (20FT).....Light drainage in the morning...favoring south 5-8 mph by 1200hrs. Afternoon winds 10-15 mph...a few gusts near 20 mph on ridge tops and open areas.

Haines Index.....5 Moderate

Lal.....1 (*hydrate...hydrate...hydrate*)

Chance of Rain.....5%

Extended Outlook for Tuesday-Wednesday-Thursday: ***Increasing Moisture-Showers/Storms Poss***

Temperatures still above normal. Relative humidities increasing. Chances for showers and Thunderstorms. Lighter afternoon winds. Temps: Lows: mid 60s. Highs: low 90s. Min RH: 15-20% Max RH: 40-50%. Winds: SW: 5-10 with some gusts to 15 mph. Haines: 5 (Moderate).

Human Resource Message

Human Resource Specialist has arrived on the incident!!!

My role is to be a focal point for informal resolution of issues and concerns involving discrimination or harassment. I will also serve as an open and empathetic channel through which individuals assigned to this fire can raise questions, discuss concerns, and get answers about an aspect of their work environment—be it practices, policies, operating procedures, facilities, or work conditions.

If you need to talk about a concern please contact me at the HRSP office or by phone/text. My office is located at the end of the "Green Parkway" next to Safety.

TRAINEES

I came to the incident as a trainee.

What are the steps to document my experience?

Check in with the Incident Training Specialist, they will provide you with a Incident Trainee Data Worksheet.

Information needed includes, your name, Agency work address, work phone #, trainee position here on the incident, date arrived, date scheduled to leave if known.

Who your trainer or mentor is, their agency address, and phone #.

You will need to bring and show your Qualls Card, and Position Taskbook.

You will be given a personnel performance evaluation to be completed by you trainer, and a trainee exit interview to be completed by you providing feedback on the training experience.

At the time of Demob, or shortly before come back to the Training Specialist with the eval form, exit interview, and taskbook.

A final letter to the home unit will be drafted.

You will be given all original documents, 1 copy mailed to the home unit, 1 copy filed with the incident records.

The copy mailed to the home unit needs to be filed in your Agency fire folder.

This may be where you work or your Fire Dispatch Center.

See me if you have any questions
