FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildfire
FIRE NAME: Cedar	OPERATIONAL PERIOD: June 20, 2016, DAY SHIFT
DATE ISSUED: June 19, 2016	TIME ISSUED: 2000 hrs
UNIT: AZ-FTA	SIGNED: Holly P. Kleindienst FBAN/LTAN

INPUTS

Holly P. Kleindienst 6/19/20

WEATHER SUMMARY:

HOT AND DRY. MOSTLY SUNNY. SOME CLOUDS BUILDING IN THE AFTERNOON.

- Max temps... mid-slope 89-94 F valley 93-98 F
- Min humidity... mid-slope 7-10% valley 5-8%
- Winds... Light in the morning. South at 5-8 mph by 1200. Afternoon winds 10-15 with a few gusts near 20 mph on ridge tops and exposed areas.
- Haines Index... 5 (Moderate)

OUTPUTS

GENERAL FIRE BEHAVIOR:

- Primary fire behavior will return to backing and flanking fire instead of head fire, with the return of southerly winds.
- Continued hot and dry weather coupled with increasingly low fuel moistures will still promote isolated torching and short duration runs. Short range spotting should be expected from any torching.
- As the fire transitions from ponderosa pine into pinyon/juniper, a further decrease in rate of spread is expected.

SPECIFIC FIRE BEHAVIOR:

- After the inversion lifts, southerly winds funneling up West Cedar Creek could promote substantial runs into the DIV Z area.
- Predicted surface rates of spread: Backing-less than 1 ch/hr, Flanking - 1-2 ch/hr, Head fire - 4-12 ch/hr.
- Predicted spotting distance: 0.1-0.2 miles.

AIR OPERATIONS:

- Wind and temperature should be favorable for air operations over the fire.
- Smoke may limit air operations on all flanks of the fire until diurnal warming lifts smoke from surface.

SAFETY

Watch Out Situations:

UNBURNED FUEL BETWEEN YOU AND THE FIRE.
CONSTRUCTING LINE WITHOUT AN ANCHOR POINT.

INCIDENT Weather Forecast

FORECAST NO: 06
 PREDICTION FOR: Monday Day Shift
 SHIFT DATE: June 20, 2016
 TIME AND DATE
 FORECAST ISSUED: 2000 June 19, 2016

NAME OF FIRE: Cedar
 UNIT: Fort Apache Agency

Incident Meteorologist: Tom Bird

Weather Discussion:

Fire weather conditions continue near critical today, as high pressure remains overhead to keep the temperatures near record, and allow only weak moisture gains. Temps will be near record as RH drops to near single digits. With some increase in moisture the Haines Index will drop to Moderate (5). Winds will be southerly and become breezy in the afternoon hours. PM buildups are likely, especially south and east. There is a risk of late-day shower and thunderstorm development in the vicinity of the fire. High-based storms will cause concern for gusty and erratic winds. Additional moisture moves in Tuesday through Thursday to further lift RH levels. More clouds, slightly elevated RH, and chances for showers and Thunderstorms each afternoon/evening.

Weather Forecast Monday:

...Hot and Dry with Southerly Winds...

Weather..... Still very HOT and quite dry. Mostly sunny with afternoon cloud development.
 A few late-aftn buildups and possibly an isolated storm, mostly south or east of fire.
Max Temperatures... Mid-slopes... 89-94 Valleys... 93-98.
Min Humidity..... Mid-slopes... 10-13% Valleys... 8-11%.
Winds (20FT)..... Light drainage in the morning... favoring south 5-8 mph by 1200hrs. Afternoon winds
 10-15 mph... a few gusts near 20 mph on ridge tops and open areas.
Haines Index..... 5 Moderate
Lal..... 1 *Drink another water!*
Chance of Rain..... 5%

Weather Forecast Monday Night:

Weather..... Partly cloudy. Slight chance a shower or thunderstorm moving in from the SE.
 Better RH recoveries. Thermal belt developing between 6400-6800 ft. el.
 Possible southerly ridge gusts after midnight. Erratic winds if storms move in..
Min Temperatures.... Valley bottoms: 55-60. Slopes and ridges: 63-68.
Max Humidity..... Valley bottoms: 35-45%. Slopes and ridges: 30-35%.
Winds (20FT)..... South to southeast... possibly increasing through the night. 5-8 mph through
 2400 hrs... then 10-15 mph. Gusts to 20 possible over ridges and aligned drainages.
 Downslope/Down-valley winds 3-5 mph after midnight valley bottoms and canyons.
Haines Index..... 5 Moderate
Lal..... 2
Chance of Rain..... 10%

Outlook For Tuesday:

Weather..... Partly cloudy & hot. Not as dry. Inversion breaking after 1000 hrs. Increasing clouds
 and afternoon thunderstorm chances. Expect erratic & gusty winds near storms.
Max Temperatures... Mid-slopes... 85-90 Valleys... 90-95.
Min Humidity..... Mid-slopes... 18-23% Valleys... 15-20%.
Winds (20FT)..... South to southwest winds 7-10 mph gusts to 15 mph along the ridge tops and open
 areas.

Safety Message

Day 6/20/2016

Fireline: Use lookouts that know fire behavior and can give adequate warning. All fireline personnel need to know their Escape Routes and where their Safety Zones are, at all times. Safety Zones need to be adequate and appropriate for potential fire behavior and to safely accommodate everyone depending on it!

Heads up for all types of heavy equipment and/or air operations along the lines, and stay well clear. Communicate your presence on Divisions, and to equipment operators by radio, voice, or hand signal. Don't approach moving equipment until you are sure operator is aware of your presence.

Medical Emergencies:

Are you prepared to deal with a medical emergency? Do you understand incident medical emergency procedures?

DEHYDRATION

Drink before you are thirsty!
If you are thirsty you are behind the power curve!
Continue to take fluids even after shift!

Don't trust smoke---it can hide what is really going on!

TRAINEES

I came to the incident as a trainee.

What are the steps to document my experience?

Check in with the Incident Training Specialist, they will provide you with a Incident Trainee Data Worksheet.

Information needed includes, your name, Agency work address, work phone #, trainee position here on the incident, date arrived, date scheduled to leave if known.

Who your trainer or mentor is, their agency address, and phone #.

You will need to bring and show your Quals Card, and Position Taskbook.

You will be given a personnel performance evaluation to be completed by you trainer, and a trainee exit interview to be completed by you providing feedback on the training experience.

At the time of Demob, or shortly before come back to the Training Specialist with the eval form, exit interview, and taskbook.

A final letter to the home unit will be drafted.

You will be given all original documents, 1 copy mailed to the home unit, 1 copy filed with the incident records.

The copy mailed to the home unit needs to be filed in your Agency fire folder.

This may be where you work or your Fire Dispatch Center.

See me if you have any questions
