FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 10	TYPE OF FIRE: Wildfire
FIRE NAME: Cedar	OPERATIONAL PERIOD: DAY – 22 June, 2016
DATE ISSUED: 21 June, 2016	TIME ISSUED: 2000
UNIT: AZ-FTA	SIGNED: Dan Pearson FBAN-T <i>DWP</i>

INPUTS

WEATHER SUMMARY:

Partly to mostly cloudy, with a chance of storms and showers.

High Temp: 83-92° Minimum RH: 17-25% Winds (20'): Southwest 5-10 mph (gust to 15 mph on ridges)

LAL: 3 Haines: 5 (High) Prob. Of Precipitation: 30%

See attached Fire Weather Forecast for more details.

FIRE BEHAVIOR

GENERAL:

Very similar weather predicted for today will result in very similar fire behavior to yesterday. Pockets of unburned fuels will continue to consume and will occasionally torch out. Small group torching will be short in duration and the resultant embers are not expected to result in sustained growth except where fuels and slope align (i.e. across drainages).

SPECIFIC FIRE BEHAVIOR:

DIV A, B, C, & Q: Overnight humidity recovery will delay onset of open flame. Burnout operations will likely struggle until rH values drop below 20%. Continued smoldering and creeping backing/flanking fire with isolated torching as fire burns out in sparse fuels lower in elevation.

Flame Length: 0.5-2' Flame Length
Rate of Spread: 1-3 chains/hour
Spotting Distance: <0.1 mile (1-5 chains)

DIV R, ZZ, S, & Z: Creeping to active fire spread with occasional group torching and short range spotting especially where pockets of unburned fuels did not consume during previous burnout operations.

Flame Length: 1-3' Flame Length
Rate of Spread: 1-8 chains/hour
Spotting Distance: 0.1 miles (up to 10 chains)

AIR OPERATIONS:

Aircraft should stay alert for storms developing over or near the fire area. Storms may contain gusty and erratic winds.

SAFETY

Stay alert for erratic winds resulting from passing storms especially during indirect firing operations. Winds can reverse and dramatically increase in speed within seconds directly impacting fire behavior. Post lookouts and set trigger points appropriately to avoid getting caught between the main fire and the firing operation.

Weather Discussion: ...Afternoon Showers/Thunderstorms w/gusty Outflow Winds...

Moisture has moved back into the area. Temperatures are lower and RH is higher. More clouds and isolated to scattered storms are back in the picture. The result is moderated fire weather conditions for the fire. Relative to fire fighter safety, weather concerns remain. Temperatures will continue slightly above average through the week. Relative humidity will be up a bit today, then slowly lower through the week. Winds remain generally southwest to west through the week. THE ISSUES of CONCERN include impacts from showers and thunderstorms, primarily lightning and erratic outflow winds. Thursday through the rest of the week moisture begins to wain and the region slowly trends drier with few to no storms. RH values will be dropping and afternoons will be breezy. The region is likely to see dry lighting over the next several days.

Weather Forecast Wednesday: ...Isolated storm chances remain – erratic outflow winds...

SAFETY MESSAGE

Thunderstorm Safety Rules

1. Stay out of dry creek beds.
2. Do not use radios or telephones.
3. Put down all tools and remove caulk boots.
4. Sit or lie down if in open country.
5. Avoid grouping together.
6. Do not handle flammable materials in open containers.
7. Stay in your vehicles. Take shelter in vehicles if possible.
8. Turn off machinery, electric motors.
9. Take shelter in a building if available.
10. When there is no shelter, avoid high objects such as lone trees. If only isolated trees are nearby, the best protection is to crouch in the open, keeping a distance of twice the height of the tree away. Keep away from wire fences, telephone lines and electrically conductive elevated objects.
11. Avoid ridge tops, hilltops, wide-open spaces, ledges, rock outcroppings and exposed shelters.
12. Advise crew that if they feel an electrical charge – if their hair stands on end or their skin tingles – lightning may be about to strike them. They must drop to the ground immediately.

Transportation: Stay on your side of the road. Always expect another vehicle around the next curve. Drive with your lights on! DRIVERS: it is your responsibility to make sure everyone in your vehicle has their seat belt fastened.

ABOVE ALL DRIVE DEFENSIVELY

Slips, Trips, & Falls: Go Slow - Around not Over, Stump Holes, Gopher Holes, and Barb Wire. Pick your routes and expect slippery footing around water mop up operations.

Medical Emergencies:

Are you prepared to deal with a medical emergency? Do you understand incident medical emergency procedures?

The most important fire is the one your on!

YOU AND FIRE

Human Resource Message

Different

Valuing
Each other
Regardless of

Years

A true leader seeks to make the team stronger by pulling from everyone. A true leader recognizes the value of diversity, because in the end we have more similarities than differences. They understand what a boring human environment it would be if we all looked and thought the same.

IMPORTANCE OF MAINTAINING YOUR PERSONAL TRAINING RECORDS

It is important to maintain a file of all your training certificates, and fire records.

The employee is ultimately responsible for their own record keeping.

Files should be kept in a **minimum of 2 locations**, this is done to mitigate loss or damage.

As your career grows, so too will your file, these records can be helpful in your development and career advancement.

Often useful when applying for a new position, or showing that you meet pre-requisites for further training.

As you advance into higher wildfire positions you will be assigned a PTB, or Position Taskbook.

One of your 2 Taskbook copies should be taken with you on each incident you are assigned.

This is for all incidents, there may be a time where you are dispatched for one position and encounter an opportunity to work on your taskbook position.

For each training assignment **ensure that you receive an evaluation.**

Make sure the trainer completes the Evaluation Record in the back of your taskbook.

This documents the incident information, name of incident, size, location, trainer, and your progress in completing the Taskbook.

Accuracy and legibility are important.

Another person with no first hand knowledge may be inputting this info into the computer (IQCS) or ICS database.

Each incident has a tracking number assigned to it, such as AZ-PNF-026, as an example.

This can be found on your resource order, or obtained from finance.

Maintain your Incident Qualification Card in your possession at all times.

You will need to **present the Qualls card during check-in** at each incident where an incident Command Team is used, and to the Training Specialist.

Following these guidelines will insure a complete and accurate record.
