Valley 96° Valley 14% Valley WSW 7-10 mph

LAL: 2 **Haines:** 5 (Moderate) **Prob. Of Precipitation:** 10%

See attached Fire Weather Forecast for more details.

FIRE BEHAVIOR

GENERAL:

Pockets of unburned fuels will continue to consume and will torch out where sufficient ground and ladder fuels exist. Group torching will be short in duration and the resultant embers are not expected to result in sustained growth except where fuels and slope align (i.e. across drainages). Dead and downed fuels are very dry and will remain receptive to embers throughout the shift.

SPECIFIC FIRE BEHAVIOR:

DIV A, B, C, & Q, S, & Z: Continued smoldering and burning out of interior islands. Single tree torching is possible where sufficient fuels align with low ladder fuels, but ember wash will be short distance. As the fire backs downslope, less consistent grass remains to carry fire from clump to clump of trees.

Flame Length: 0.5 - 2' Flame Length
Rate of Spread: 0.5 - 3 chains/hour (3 feet per minute)
Spotting Distance: <0.1 mile (1-5 chains or up to 300')
Probability of Ignition: 80%

DIV R, ZZ: Creeping ground fire early in the morning. Active fire and group torching in the afternoon west of Middle Cedar Creek. Where the dominant winds align with west aspects of tributary drainages, expect rapid upslope runs and large group ignitions until fire crests the ridges.

Flame Length: 1 - 4' Flame Length
Rate of Spread: 0.5 - 2 ch/hr backing, up to 11 ch/hr with head fire (12 feet per minute)
Spotting Distance: 0.2 miles (up to 15 chains or 1000')
Probability of Ignition: 80%

AIR OPERATIONS:

Smoke will likely pool in drainages on the east and north of the fire hampering visibility until mid-morning.

SAFETY

Ember wash and spot fires over the last several shifts occurred east of the B33 Road. The majority of these landed in the Playground Fire of 2015 which had relatively little ground fuel loading. As operations continue south in DIV ZZ and R, fuels to the east are more dense and conducive to faster/more sustained fire activity than what you've been seeing the last two days. Watch out for complacency!

Work Assignments (Task and Purpose)

Task:

- PSD upper rim edge above Highway 73 north to DIV C
- Initiating fire operations along Hwy 73 as needed if PSD fire moves that way
- Hold previous shift burn out operations
- Coordinate with Law Enforcement Branch if fire impedes traffic on Hwy 73
- Continue direct suppression on slop over and improve 36 road to middle canyon

Purpose:

- To keep fire from impacting affecting communities of Cedar Creek and Carrizo, and to protect public safety of drivers on Hwy 73

End State (Desired outcome and Time Frame)
 Containment lines have held, mop-up and rehab complete, and values at risk, including Carrizo, are protected
 Smoke and fire impacts on Hwy 73 have not caused a threat to public safety.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

Everyone is considered a **Safety Officer**

INCIDENT: Cedar Fire

DATE: 06/23/2016 TIME: Day/Night Ops

Major Hazards and Risks:

- FATIGUE
- DEHYDRATION
- COMPLACENCY
- DRIVING
- PERSONAL HYGENE

In the event of a Medical Emergency - Follow the Medical Plan (ICS 206 WF)

Fire Order of the Day - (3) Base all actions on current and expected behavior of the fire

Narrative:

Fatigue: Many crews have been fighting fire hard for several nights and days straight. Supervisors, be sure to monitor your crews' condition and monitor your crews' work/rest ratio.

Dehydration: Although temperatures have moderated slightly, continue to drink plenty of fluids...

Complacency: Fight the urge to become complacent with this fire. Most injuries occur during the mop up and rehabilitation phase. Take your time with even the most menial of tasks. **There is still important work to be done.**

Driving in congested areas and on steep mountain roads requires that all drivers maintain ample spacing between vehicles, full attention is focused on the roadway, defensible tactics are employed, and always be considerate of other operators on the roadways.

Personal Hygiene: With long shifts and hard work, sleep is at a premium. Be sure to take the time to take care of yourselves. **WE NEED YOU FOR THE LONG HAUL!**

Watch Out Situation for the Day

5. UNINFORMED ON STRATEGY, TACTICS AND HAZARDS

OUR SAFETY RECORD HAS BEEN EXCELLENT

However, we continue to have a high potential for an injury from firefighter operational activities. Ensure that you complete a personal risk analysis related to your assignment. **Keep up the excellent work!!!**

Remember:

“Your last mistake is your best teacher”

Human Resource Message

Respectful disagreement helps prevent GROUP THINK. Keep it professional and appropriate.

“When we are debating an issue, loyalty means giving me your honest opinion, whether you think I'll like it or not. Disagreement, at this stage, stimulates me. But once a decision has been made, the debate ends. From that point on, loyalty means executing the decision as if it were your own.” - Colin Powell
