JOHN PIERSON - INCIDENT COMMANDER**

# **CEDAR FIRE**

**AZ-FTA-000403**

**PA KAX5 (1502)**

White Mountain Apache Tribe

## **INCIDENT ACTION PLAN**

### **Day Operations**

**Saturday June 25<sup>th</sup>, 2016**

**0600 to 2100**

UTM 11 NAD83 DD.MMM

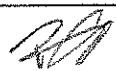

**SOUTHWEST AREA TYPE 1  
INCIDENT MANAGEMENT TEAM 2  
JOHN PIERSON - INCIDENT COMMANDER**

**Values at Risk**

- **Firefighter and Public Safety**
- **Communities of Cedar Creek, Amos Ranch, Pinetop/ Lakeside, Hondah, McNary, Show Low, Carrizo, Forestdale and White River**
- **Faught Ridge Timber Sale**
- **Tribal Natural Resources –  
Water, Vegetation, Wildlife, and Soils**
- **Public Information**
- **Sensitive Sites**
- **Tribal Economic Opportunities**

<b>INCIDENT OBJECTIVES</b>	1. Incident Name <b>CEDAR FIRE</b>	2. Date Prepared 6/24/2016	3. Time Prepared 2150 hrs
	<b>4. Operational Period</b> Saturday June 25, 2016 Day Shift 0600 to 2100 hours		
<b>5. Objectives</b>			
<ul style="list-style-type: none"> <li>• Provide for emergency responders and public safety.</li> <li>• Protect the communities of Cedar Creek, Carrizo, Forestdale, Amos Ranch, Pinetop/Lakeside, Show Low, and Hondah.</li> <li>• Minimize fire footprint while utilizing strategies and tactics with the highest probability of success.</li> <li>• Minimize impacts to the South Faught Ridge timber sale, water, vegetation, wildlife, and soils.</li> <li>• Minimize impacts to the Faught timber resources.</li> <li>• Maintain and develop partnerships and relationships through timely and accurate information.</li> <li>• Protect sensitive sites.</li> </ul>			
<b>6. Leaders Intent</b>			
Protect Values at Risk by utilizing safe and effective strategies and tactics that provide for the highest probability of success.			
<b>7. Weather Forecast For Period</b>			
Partly cloudy. Continued warm and dry. Isolated high based showers and thunderstorms in the afternoon and evening mainly to the east of the fire. Temps upper 80's - lower 90's, Haines Index – 4 low			
<b>8. General Safety Message</b>			
Maintain situational awareness and communications.			
<b>9. ATTACHEMENTS (X IF ATTACHED)</b>

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 16	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Cedar	<b>OPERATIONAL PERIOD:</b> DAY – 25 June, 2016
<b>DATE ISSUED:</b> 24 June, 2016	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> AZ-FTA	<b>SIGNED:</b> Dan Pearson FBAN-T <i>DWP</i>

## INPUTS

### WEATHER SUMMARY:

Partly cloudy and smoky in the morning, clearing and becoming warm and dry in the afternoon.

**Temp:** Mid-slope 88°      **Humidity:** Mid-slope 17%      **Winds (20'):** SW 4-8, Gusts to 15 mph  
Valley 95°                      Valley 14%

**LAL:** 2                      **Haines:** 4 (Low)                      **Prob. Of Precipitation:** 10%

See attached Fire Weather Forecast for more details.

## FIRE BEHAVIOR

### GENERAL:

Pockets of unburned fuels will continue to consume and will torch out where sufficient ground and ladder fuels exist. Group torching will be short in duration and the resultant embers are not expected to result in sustained growth except where fuels and slope align (i.e. across drainages). Dead and downed fuels are very dry and will remain receptive to embers throughout the shift.

### SPECIFIC FIRE BEHAVIOR:

**DIV C, R, S, ZZ:** Fire will continue to back through pine stringers with sporadic single and small group torching on the perimeter of DIV C as well as adjacent to the line in R/ZZ. Brush fields west of the line in DIV S will continue smoldering and occasionally flaring up. Fire activity will begin picking up in the early afternoon before returning to a smoldering state in late evening.

**Flame Length:** 0.5 - 2' Flame Length  
**Rate of Spread:** 0.5 – 2.5 chains/hour (3 feet per minute)  
**Spotting Distance:** <0.1 mile (1-5 chains or up to 300')  
**Probability of Ignition:** 90%

### AIR OPERATIONS:

Lower Haines Indices will combine with poor overnight ventilation allowing smoke to pool in drainages and lower elevation areas surrounding the fire hampering visibility until clearing around 1100.

## SAFETY

Pine dominant areas have burned out relatively cleanly, but in the brush dominant areas, the live fuel moisture prevented "solid" black from being consistently achieved. This resulted in brush fields that continue to smolder and flare up in the heat of the day. Be patient and vigilant while patrolling as fire will continue to skunk around and has potential to creep and compromise lines days later.

# FIRE WEATHER FORECAST

FORECAST NO. 16

NAME OF FIRE: Cedar

PREDICTION FOR: Saturday June 25, 2016

UNIT: Fort Apache Agency

TIME AND DATE

FORECAST ISSUED: 2000 Friday 6/24/15

SIGNED:

*Julia Z. Ruthford / Mary Wister*  
Julia Ruthford / Mary Wister (T)  
971-221-6728 240-778-5303  
Incident Meteorologists

**WEATHER DISCUSSION:** The north to south running boundary between dry air to the west and moist air to the east will continue to be the key weather feature impacting the fire area for the next several days. An upper level trough swinging through Montana will shift this boundary a bit further east today bringing some more sunshine as well as continued warm and dry weather to the fire area. General winds will be light allowing terrain driven slope and valley winds to dominate. Mid-level moisture will begin creeping into the area late Sunday through Monday gradually increasing the coverage of high based showers and thunderstorms. Conditions look favorable for a stronger surge of moisture to push in Tuesday bringing increasingly wet showers and thunderstorms.

## **SATURDAY:**

**WEATHER:** Partly cloudy...continued warm and dry. Isolated high based showers and thunderstorms in the afternoon and evening mainly to the east of the fire area.

**MAXIMUM TEMPERATURE:** Mid 90s valleys and upper 80s around 7000 feet.

**MINIMUM RELATIVE HUMIDITY:** 14% to 17%.

**20 FOOT WINDS:** Ridge level winds NW 5 mph becoming SW in the afternoon. Elsewhere up-slope winds 3 to 5 mph becoming up-valley generally SW 4 to 8 mph with gusts to 15 mph in the afternoon. Watch for gusty outflow winds near any showers or thunderstorms.

**STABILITY:** Morning smoke hanging in valleys mixing out by 0900...then becoming unstable.

**HAINES INDEX:** 4

**CHANCE OF WETTING RAIN:** 10%.

**LAL:** 2

## **SATURDAY NIGHT:**

**WEATHER:** Partly cloudy. A slight chance of a shower or thunderstorm in the evening.

**MINIMUM TEMPERATURE:** Lows upper 50s valleys and mid 60s slopes and ridges.

**MAXIMUM RELATIVE HUMIDITY:** 45 to 50% valleys and around 35% slopes and ridges.

**20 FOOT WINDS:** SW wind 4 to 8 mph becoming down-slope/down-valley 3 to 5 mph.

**STABILITY:** Smoke settling into valley inversions.

**HAINES INDEX:** 4

**CHANCE OF WETTING RAIN:** 10%

**LAL:** 2

**SUNDAY:** Partly cloudy with the slight chance of afternoon and evening showers or thunderstorms. Highs in the mid 90s valleys and upper 80s ridges. Min RHs in the mid teens. General winds SE 5 to 7 mph except up-valley 4 to 8 mph with gusts to 15 mph in canyons in the afternoon.

**OUTLOOK FOR MONDAY THROUGH WEDNESDAY:** High based scattered showers and thunderstorms developing Monday and becoming increasingly wet Tuesday and Wednesday. Slightly cooler but still remaining above seasonal normal. Minimum RHs moderating into the mid 20s.

<b>Friday's Weather (IRAWS):</b>	<b>Max/Min Temps</b>	<b>Max/Min RH</b>	<b>Afternoon Winds</b>
Faught Spur (7030ft) on Div Z:	90°/65°	44%/16%	SW 3-7 G 8-17 mph
HWY60 Flat (5612ft) on DIV B:	92°/65°	47%/14%	SW 6-12 G 13-22 mph

**Work Assignments (Task and Purpose)**

- Task:**
- Monitor fire around power lines and prep power poles as needed
  - Mop up and hold containment lines to keep fire from escaping
  - Rehab firelines per established standards
  - Backhaul unnecessary items and garbage

- Purpose:**
- To keep fire from progressing further south with potential of affecting the communities of Carrizo

**End State (Desired outcome and Time Frame)**

Containment lines have held, mop up and rehab is completed and values at risk, including Carrizo, are protected. Power line service interruption has been minimal.

**Work Assignments ( Task and Purpose)**

**Task:**

- Continue direct suppression on slop over and improve 36 road to middle canyon
- Mop up and hold containment lines to keep fire from escaping
- Rehab firelines per established standards
- Backhaul unnecessary items and garbage
- Drag slash to roadside including on contingency line and continue chipping

**Purpose:**

- To keep fire from impacting communities of Cedar Creek and Carrizo and to protect public safety of drivers on Hwy 73

**End State ( Desired outcome and Time Frame)**

Containment lines have held, mop-up and rehab complete, and values at risk, including Carrizo, are protected  
Smoke and fire impacts on Hwy 73 have not caused a threat to public safety.

**Work Assignments (Task and Purpose)**

- Task:**
- Maintain presence in communities near fire area
  - Remove all suppression equipment around structures
- Purpose:**
- Improve sustainability of structure and improvements
  - Provide future plans to the community

**End State (Desired outcome and Time Frame)**

Structures remain undamaged.  
Communities have a plan they can use for future wildland incidents.

**AIR OPERATIONS SUMMARY 220** Prepared By: Pete Schwab Prepared Time: 2000 hrs.

**1. INCIDENT NAME: CEDAR** **2. OPERATIONAL PERIOD** 06/25/2016 **START TIME:** 0600 **END TIME:** 2000 **SUNRISE:** 0510 **SUNSET:** 1936

**3. REMARKS** (Safety Notes, Hazards, Air Operations Special Equipment, etc.).

**AVIATION SAFETY IS A TEAM EFFORT**

**AIR OPERATIONS INTENT**

ALL MISSIONS WILL BE ANALYZED IN TERMS OF HAZARDS AND RISKS

- THE RISK ASSESSMENT IS AN OPEN PROCESS WELCOMING INPUT.
- HAZARDS WILL BE MITIGATED, RISK WILL BE REDUCED.
- RISK MANAGEMENT PROCESS WILL BE DOCUMENTED AND DISPLAYED.

**IF A MISSION FEELS UNSAFE, IDENTIFY SAFE ALTERNATIVES!**

**\*\*\*Possible Thunderstorm Cells & Outflow Winds: HEADS UP!!!\*\*\***

**4. READY ALERT AIRCRAFT:**

**DPS Ranger N42AZ**

Order through Communications

- SHORT-HAUL CAPABLE DURING THE DAY.
- NIGHT VISION CAPABLE FOR NIGHT OPERATIONS.

See Medical Plan (ICS 206) in the IAP

# HEALTH AND SAFETY MESSAGE

*SAFETY* starts with *YOU*

Everyone is considered a **Safety Officer**

**INCIDENT: Cedar Fire**

**DATE: 06/25/2016 TIME: Day Ops**

**Major Hazards and Risks:**

- **Complacency**
- **Transportation**
- **Hydration**
- **Weather Changes**

In the event of a Medical Emergency – Follow the Medical Plan (ICS 206 WF)

Fire Order of the Day – Determine Safety Zones and Escape Routes

**COMPLACENCY:** It's up to each of us to control and eliminate complacency. Challenge yourself to focus on the task at hand and maintain a positive attitude. Continue to work as a productive member of the "Cedar Fire" as we work towards meeting the objectives. Encourage fellow workers to adhere to all the safety fundamentals.

**TRANSPORTATION:** Dangers are around the very next corner, so **BUCKLE UP - USE HEADLIGHTS, and GO SLOW.** If it's NOT SAFE to go- DON'T.

**NOTE:** Highway 60 is now open to the public. Please drive with caution

**HYDRATION:** Although temperatures have moderated slightly, continue to drink plenty of fluids...

**WEATHER CHANGES:** It will be mostly dry and hot through the weekend. This will be followed by increased moisture and a return of storm chances early next week. Winds will trend more northerly on Saturday.

ALWAYS USE LCES – Make sure you apply this throughout the day.

**Watch Out Situation for the Day**

18. TAKING A NAP NEAR THE FIRELINE

**Common Denominators of Fire Behavior On Tragedy Fires**

- \*Most incidents happen on the smaller fires or on isolated portions of larger fires.
- \*Most fires are innocent in appearance before the "Flare-ups" or "Blow-ups". In some cases, tragedies occur in the mop-up stage.
- \*Flare-ups generally occur in deceptively light fuels.
- \*Fires run uphill surprisingly fast in chimneys, gullies, chutes and on steep slopes.
- \*Some suppression tools, such as helicopters or air tankers, can adversely affect fire behavior. The blasts of air from low flying helicopters and air tankers have been known to cause flare-ups.

**Incident Safety Officers: Michael Gillespie (SOF1), Don Muise SOF1(T)**

## **BIA Suppression Rehabilitation Standards**

The following actions must be taken by the IMT1 to rehabilitate the immediate impacts from suppression efforts:

1. Rehabilitate dozer lines by pulling in berms and randomly scattering previously cut brush onto the fire lines to eliminate the appearance of a travel way and minimize future access. Get clearance from the Ops Section Chief before brush is pulled back into the dozer and fire lines. Coordinate with Agency Resource Advisors to avoid disturbance of cultural sites.
2. Cross slope dozer lines should be restored to original contour, as conditions allow.
3. Construct water bars along fire line slopes as follows:
  - Approximately every 150 feet for slopes 10-15%
  - Approximately every 100 feet for slopes 15-25%
  - Approximately every 75 feet for slopes greater than 25%
4. Brief operators and supervisors of potential for sparking due to travel of tracked machinery over rock and blade strikes. If significant sparking is occurring, have adequate suppression forces on hand.
5. When hand lines are no longer needed, rehabilitate and obliterate constructed hand lines by pulling in berms and randomly scattering previously cut brush onto the fire lines
6. Cut all snags along roadways that pose an immediate threat to firefighter and public safety.
7. Pick up all trash along fire lines, spike camps, drop points, staging areas and at helispots.
8. Identify needs for revegetation or other mitigation on and adjacent to fire lines, spike camps, drop points and staging areas.
9. Close down Helibase including trash pickup in and around the perimeter of the base. Assess site impacts for revegetation or other mitigation.
10. Clear all stream beds (dry and wet), irrigation ditches/canals, culverts and borrow ditches of brush and debris generated as a result of fire suppression actions.
11. Ensure that artifacts are not disturbed or collected by fireline personnel.
12. Mend fences and repair gates affected by suppression actions.
13. Revegetate with grass seed all staging areas, dozer lines, drop points, helispots and vehicle turnouts. See attached recommended seed mix.

## Human Resource Message

"Life is 10% what happens to you and 90% how you react to it."

Many of us will be demobing soon. No matter how many times you've been through it, the demob process can be stressful. Remember that you are not the only one feeling anxious, stressed and tired. You can assist the folks in demob and help the process go as smoothly as possible by being PREPARED and PATIENT.

If you are headed home, practice that same level of patience with your family and co-workers. Appreciate all they have done to keep things going in your absence, and the stress they are under while they await your safe return.

Whether you are traveling by plane, car or engine, have a safe trip home or to your next assignment.

Debra Packard, HRSP

# TRAINEES

I came to the incident as a trainee.

What are the steps to document my experience?

Check in with the Incident Training Specialist, they will provide you with a Incident Trainee Data Worksheet.

Information needed includes, your name, Agency work address, work phone #, trainee position here on the incident, date arrived, date scheduled to leave if known,

Who your trainer or mentor is, their agency address, and phone #.

You will need to bring and show your Qualls Card, and Position Taskbook.

You will be given a personnel performance evaluation to be completed by you trainer, and a trainee exit interview to be completed by you providing feedback on the training experience.

At the time of Demob, or shortly before come back to the Training Specialist with the eval form, exit interview, and taskbook.

A final letter to the home unit will be drafted.

You will be given all original documents, 1 copy mailed to the home unit, 1 copy filed with the incident records.

The copy mailed to the home unit needs to be filed in your Agency fire folder.

This may be where you work or your Fire Dispatch Center.

See me if you have any questions

Room B 105

Robert Rick TNSP

# MEDICAL PLAN (ICS 206 WF)

Medical Incident Report					
<b>FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</b>					
<b>Use items one through nine to communicate situation to communications/dispatch.</b>					
<b>1. CONTACT COMMUNICATIONS/DISPATCH</b>					
<i>Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)</i>					
<b>2. INCIDENT STATUS:</b> Provide incident summary and command structure.					
Nature of Injury/Illness			<i>Describe the injury (Ex: Broken leg with bleeding)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
Incident Commander			<i>Name of IC</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
<b>3. INITIAL PATIENT ASSESSMENT:</b> Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.					
Number of Patients:	Male / Female	Age:	Weight:		
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!					
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!					
Mechanism of Injury: <i>What caused the injury?</i>					
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>					
<b>4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY</b>					
SEVERITY			TRANSPORT PRIORITY		
<input type="checkbox"/> <b>URGENT-RED</b> Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>			Ambulance or MEDEVAC helicopter. Evacuation need is <b>IMMEDIATE</b> .		
<input type="checkbox"/> <b>PRIORITY-YELLOW</b> Serious injury or illness. <i>Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.</i>			Ambulance or consider air transport if at remote location. Evacuation may be <b>DELAYED</b> .		
<input type="checkbox"/> <b>ROUTINE-GREEN</b> Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>			Non-Emergency. Evacuation considered <b>Routine of Convenience</b> .		
<b>5. TRANSPORT PLAN:</b>					
<b>Air Transport:</b> (Agency Aircraft Preferred)					
<input type="checkbox"/> Helispot		<input type="checkbox"/> Short-haul/Hoist		<input type="checkbox"/> Life Flight	
				<input type="checkbox"/> Other	
<b>Ground Transport:</b>					
<input type="checkbox"/> Self-Extract		<input type="checkbox"/> Carry-Out		<input type="checkbox"/> Ambulance	
				<input type="checkbox"/> Other	
<b>6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:</b>					
<input type="checkbox"/> Paramedic/EMT(s)		<input type="checkbox"/> Crew(s)		<input type="checkbox"/> SKED/Backboard/C-Collar	
<input type="checkbox"/> Burn Sheet(s)		<input type="checkbox"/> Oxygen		<input type="checkbox"/> Trauma Bag	
<input type="checkbox"/> Medication(s)		<input type="checkbox"/> IV/Fluid(s)		<input type="checkbox"/> Cardiac Monitor/AED	
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)					
<b>7. COMMUNICATIONS:</b>					
Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					
*(NAC for digital radio system)					
<b>8. EVACUATION LOCATION:</b>					
Lat/Long (Datum WGS84) <i>Ex: N 40 42.45' x W 123 03.24'</i>					
Patient's ETA to Evacuation Location:					
<b>Considerations:</b> If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...			<b>REMEMBER:</b> Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.
