JOHN PIERSON - INCIDENT COMMANDER

# SUPERSTITION FIRE

*TONTO NATIONAL FOREST  
ARIZONA DEPARTMENT OF FORESTRY AND FIRE MANAGEMENT*

## Values at Risk

### Communities

Gold Canyon, Apache Junction, Canyon Lake and Marina

### Private Property and Values at Risk

Lost Dutchman State Park, Quarter Circle U Ranch, Burns Ranch, SRP Distribution lines, Multiple Trailheads and trails

### Major Transportation Corridors

State Route 88 (Apache Trail)

### Superstition Wilderness

### Sonoran Desert

### Airports

Williams Gateway Airport (Mesa), Phoenix Sky Harbor International Airport

### Archaeological and Cultural Resources

### Waterways and Riparian Areas

### Wildlife Resources

The endangered Gila Topminnow, Golden Eagles

## SAFETY SPOTLIGHT:

### HEAT RELATED INJURY

A heat related injury (HRI) is a potentially fatal condition caused by elevated body temperatures.

Symptoms of HRI include:

- Profuse sweating w/ warm or cool clammy skin leading to hot dry skin
- Muscle cramps and weakness
- Dizziness, headache and irritability
- Rapid, weak pulse
- Vomiting
- Mental status change
- Loss of consciousness

**If HRI is suspected:** Cool the body as quickly as possible, then treat other conditions.

**IRPG Page 109-110**

AZ-TNF-002551 P3NGUO (0312)

# INCIDENT ACTION PLAN

**Friday, August 28, 2020**

**Operational Period**

**Day 0600 to 2100**

**Night 1800 to 0800**

Check-in

The endangered Gila Topminnow, Golden Eagles

<b>INCIDENT OBJECTIVES</b>		1. Incident Name <b>Superstition Fire</b>	2. Date Prepared 8/27/2020	3. Time Prepared 2100 hrs
<b>4. Operational Period</b>				
Friday, August 28, 2020		DAY SHIFT 0600 – 2100	NIGHT SHIFT 1800-0800	
<b>5. Leaders Intent</b>				
<p>The intent for the incident is to effectively utilize strategies and tactics that provide for firefighter and public safety first and foremost, which have a high probability of success. Objectives to be accomplished shall utilize risk-based decisions that minimize unnecessary exposure for the purpose of implementing tasks associated with protecting priority values at risk.</p>				
<b>6. General Control Objectives for the Incident (Include Alternatives)</b>				
<ol style="list-style-type: none"> <li>1. Ensure firefighter, aviation and public safety through clear leader's intent with established work prioritization and implementation of fundamental firefighting principles utilizing thorough risk informed decisions.</li> <li>2. Minimize fire impacts to values at risk including SRP powerline, Hwy 88 corridor, Canyon Lake Marina and Tortilla Flat.</li> <li>3. Reduce the risks to public safety personnel from the potential exposure of COVID-19 through coordination with the State of Arizona and Pinal County emergency response cooperators, and departments of health services.</li> <li>4. Maintain and develop partnerships with stakeholders, cooperators, community leaders, and local agencies through timely and accurate information.</li> <li>5. Ensure timely incident information sharing to the public through area information outlets including fire activity and smoke impacts.</li> </ol>				
<b>7. Weather Forecast For Period</b>				
<b><u>FORECAST FOR TODAY:</u></b> Sunny.				
<b>Max Temperature:</b> 105-109 <b>Min RH:</b> 14-19%				
<b>20 FT Winds:</b> Southeast winds 5 to 7 mph in the morning becoming west 5 to 10 mph in the afternoon				
<b>Lighting Activity Level:</b> 1 in the morning, becoming 2 in the afternoon				
<b>8. General Safety Message</b>				
Use caution when traveling in neighborhoods, maintain safe distances, use headlights at all times.

**Superstition Fire****Day Shift****08/28/2020**

Outflows will be a concern for the Superstition fire area today. First, there is a 50% chance the area could see an outflow coming from the northeast (may end up being more northerly or mostly easterly depending on how distant storms evolve). The peak timing for such outflow to arrive in the area is between 1700-2000 local. Wind speeds with this outflow will likely reach 20-30 mph, but localized areas of stronger gusts nearing 40-50 mph cannot be ruled out. New thunderstorms may also form along this outflow, including over the fire area. Storms may produce lightning strikes and erratic gusty winds. However, rainfall is not expected to be heavy (below 0.10").

RH values will depend heavily on elevation and shading. Daytime RH values will likely drop slightly below 20% for the driest areas, and perhaps down to 25% at higher/shaded areas. Overnight recovery will increase into the 35-40% range.

**Superstition Fire**

FRIDAY...

Sky/weather.....Sunny.

CWR.....5 percent in the afternoon.

Max temperature.....105-109.

Min humidity.....14-19 pct.

Wind (20 ft).....Southeast winds 5 to 7 mph in the morning  
becoming west 5 to 10 mph in the afternoon.

LAL .....1 in the morning, becoming 2 in the afternoon

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 2	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Superstition Fire	<b>OPERATIONAL PERIOD:</b> Day Operations, 08/28/2020
<b>DATE ISSUED:</b> 08/27/20	<b>TIME ISSUED:</b> 17:00
<b>UNIT:</b> AZ-TNF Tonto National Forest	<b>SIGNED:</b> FBAN

### INPUTS

**WEATHER SUMMARY:** Continued afternoon thunderstorms forming over the Mogollon Rim to the north, White Mountains to the east, and Nogales to the south. Main concern is the possibility of an outflow boundary impacting the fire area. This is more likely than a thunderstorm directly affecting the fire area. Outflow boundary winds are likely between 1700 and 2000 bringing winds of 20-30 mph with the potential for higher gusts.

**Sky Condition:** Sunny/hazy    **Temp:** 105-109°    **Humidity (min):** 14-19%    **CWR:** 0%    **Haines:** 4 Low  
**Winds:** West winds 5 -10 mph    **Outflow winds from the east likely after 1700**    **LAL:** 1 in the am then 2 in pm

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

Summary – Active fire has generally moved out of the higher elevation brush fuels and is exhibiting the most consistent movement in the mid-to-lower elevations through Sonoran grass/shrub fuels. Winds are likely to be funneled through the complex terrain once fire drops off Black Mesa.

**Environment** – The Sonoran and Brush FDRAs for the Tonto NF are showing ERC and KBBi values that are setting new high records for this time of the year. ERCs are running at, or near, the 95<sup>th</sup> percentile with KBBIs continuing a climb past the 90<sup>th</sup> percentile. This is an unusually hot and dry period for late August.

**Fuels** – Sonoran Desert/Desert Grasslands – Fully cured heavy grass crop, including invasive grasses have increased resistance to control all summer, no relief has been received so expect a continuous available fuel bed to exist. Upper shrublands - Expect all fuels to be available with live FM in the mid 50-70% range for live brush.

**General fire characteristics** – Conditions represent active fire behavior based on predicted afternoon conditions. ***High end of characteristics modeled using 25 mph winds to estimate outflow wind impacts.***

**GRASS-BRUSH Head Fire** – ROS: 10-14 ch/hr; FL 5-8 ft, **Backing/Flanking Fire** ROS – 2-4 ch/hr, FL-2-4 ft  
**BRUSH Head Fire** – ROS: 20-30 ch/hr; FL 12-20 ft, **Backing/Flanking Fire** ROS – 3-10 ch/hr, FL-4-8 ft

**POI** (probability of ignition) – 90-100% shaded and unshaded      **FDFM** (fine dead fuel moisture) is 3%.

##### SPECIFIC:

**Superstition Fire** – Fire is likely to continue to push primarily to the north and east again today. On the northwest corner, fire will grow north to the 78 Road/Grand Enchantment Trail and east to First Water Ranch and First Water Creek. On the northeast, fire is expected to drop off Black Mesa into West Boulder Canyon and continue north mainly on the western side of the canyon towards Hwy 88 and Canyon Lake. Easterly movement off Black Mesa up to Yellow Peak and northwest movement onto Hackberry Mesa is likely as well.

##### AIR OPERATIONS:

Hazy conditions early in the morning. Smoke should clear around 1000 resulting in good visual range. Watch for thunderstorms building in the mid-to-late afternoon bringing gusty erratic winds.

##### SAFETY – Outflow Winds

Although conditions are conducive to support steadily active fire behavior across the fire area, activity can quickly escalate to Extreme fire behavior in all directions, on all fires, in all fuel types as winds increase and or change direction where outflow winds from approaching and passing T-Storms reach the fire area.

49	Large Sprinkler Kit Order (>40 Structures)			Additional 50 Gallons Unleaded Gas
				Additional 10 Quarts 2-Cycle Oil

# SAFETY MESSAGE

<b>INCIDENT NAME:</b> SUPERSTITION FIRE	<b>OPERATIONAL PERIOD:</b> 8/28 thru 8/29/20 Day/Night
<b>MAJOR HAZARDS:</b>	
<ul style="list-style-type: none"><li>➤ <b>DRIVING</b> - Drive defensively, use headlights and backers.</li><li>➤ <b>T-STORMS/DOWNDRAFTS</b> - Expect critical fire behavior conditions, especially in light flashy fuels and brush.</li><li>➤ <b>COVID-19</b> - Please continue to Wash hands, wear masks, and utilize social distancing.</li></ul>	<ul style="list-style-type: none"><li>➤ <b>UTV/ATV USE</b> - Use qualified operators only. Use proper PPE including full-face helmet and required safety equipment.</li><li>➤ <b>AVIATION</b> – Aviation Watchouts IRPG page 46</li><li>➤ <b>EXCESSIVE HEAT WARNING</b> - Temps 100+ Today and low temps 80+ overnight.</li></ul>
<b>NARRATIVE:</b>	
<b>Don't Be Surprised in the Southwest!</b>	
<p>Mid-June through early July in the Southwest has historically been the peak of fire season, fire behavior potential, and associated risk of injury or death to fire management personnel. This has been proven over the years, with dozens of firefighter fatalities, injuries, entrapments and close calls occurring within this time frame.</p> <p><b>***Today is 8/28/20. Indices in the area are matching that of June and pioneering records currently***</b></p> <p>The following conditions are to be <u>expected and incorporated</u> into all aspects of wildland fire management:</p> <ul style="list-style-type: none"><li>• <b>Extreme Heat and Dryness:</b> Temperatures of 100°F - 120°F across mid and lower elevations. Single digit minimum RH and increasingly poor nighttime RH recovery all areas...with maximum RH values falling into the 15-25% range.</li><li>• <b>Environment:</b> ERCs are running at, or near the 95<sup>th</sup> percentile due to lack of traditional monsoon in July. This is an unusually hot and dry period for late August and fuels are much more receptive to ignition than normal</li><li>• <b>Prolonged Active Burning Periods:</b> Combination of heat, dryness and instability will prolong active burning periods noticeably.</li><li>• <b>Strong and Erratic Thunderstorm Winds:</b> Thunderstorm activity <i>will</i> become a factor on most Southwest fires during this time frame, and resulting strong &amp; erratic downdraft winds should be expected to potentially dominate fire spread &amp; behavior. <u>Actively seek information on storm movement (speed and direction) to facilitate your current risk assessment.</u></li><li>• <b>Collapsing Convection Columns:</b> The periodic collapse of strong convection columns over ongoing fires can create downdraft winds similar to those of stationary thunderstorms, with similar dangerous impacts on fire spread and behavior.</li><li>• <b>Heavy Fine Fuel Loading:</b> EXPECT RAPID FIRE GROWTH</li></ul> <p>It is critical to understand that firefighter fatalities on the Dude and Yarnell fires occurred during this mid-June through early July time frame in association with thunderstorm winds and/or collapsing convection columns.</p> <p><b>Fires exhibiting high resistance to control and rapid spread events are normal in the Southwest during peak fire season, and impacts will be amplified during periods of record heat. Plan, communicate, and act accordingly!</b></p>	
<b>SAFETY OFFICERS:</b>	Don Muise, Ricky Cox (T)

# WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>4</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever?
Chills?
Muscle pain outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
<i>* Take temperature with no-touch thermometer, if available *</i>

## Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries: Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained. If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	DO NOT ANNOUNCE Ask individual to step aside and follow the steps below.

Steps to follow
Escort symptomatic individual to isolation area.
Isolation support personnel should begin documentation.
Have symptomatic individual contact Supervisor for further direction.
Notify public health officials.
Have individual transported as appropriate.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

**IF YOU EXPERIENCE COVID-19 SYMPTOMS, CONTACT IMMEDIATELY:

### FIRE GROUND HYDRATION

Prior to going on the line you should drink at least 16 oz. of water.

#### While on the line:

Drink cool water, 34 oz. per hour. If you are dehydrated must drink about an ounce every minute.

#### After Fireground Operations

- If the fire ground activity lasts for less than an hour, you should have sufficient electrolyte and carbohydrates in your system to maintain optimal performance.
- If fire ground activity lasts for more than an hour, you should mix electrolytes with water to rehydrate the body. During an Operational Period involving 2 hours of active firefighting you should consume 12, 16 oz bottles of water and 2 bottles of Gatorade. A firefighter could lose as much as 70 ounces in sweat in just 30 minutes of firefighting activity.

**ALL TRAVEL TIMES ARE BASED FROM THE ICP. ROAD AND WEATHER CONDITIONS MAY ADD SIGNIFICANTLY TO THE TRAVEL TIMES. PLAN ACCORDINGLY!**

## HUMAN RESOURCE MESSAGE

*We take care of each other. I don't know if you'd find that just anywhere.*  
- Margie O'Clair

As an employee on this incident, you have the right to a workplace that is:

- Free from harassment or discrimination
- Free from bullying
- Free from drug and alcohol use
- Respectful of each other
- Productive and beneficial to the community that we're serving
- Fun!

Human Resources provides education and assistance in ensuring these workplace rights are upheld. Additionally, HR can assist if you have a family emergency. We also assist with investigations into inappropriate behavior, provide support and training for issues related to your employee rights, and serve as a resource for you when encounter workplace problems.

HR is part of the Plans Section, so please stop by or call if you would like assistance in any of these areas.

# MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
