1 INCIDENT NAME Cerro Pelado Fire	2. OPERATIONAL PERIOD: DAY / NIGHT 04/25/2022 Monday 0700- 04/26/2022 Tuesday 0700	2. DATE PREPARED 04/24/2022	3. TIME PREPARED 1800									
3. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) Management Objectives 1) Protection of human life and safety is the first priority for all actions taken on a wildfire and can overrule all other strategic/management objectives and incident requirements. 2) Base management decisions on meeting objectives while also minimizing the risk of COVID-19 exposures to responders and the public. COVID-19 considerations may alter how you meet goals but should not lead to higher risk tactics. 3) Maintain and strengthen relationships with the Santa Fe National Forest, private landowners, the public, cooperators and partners by providing timely and accurate information. 4) Protect the unique attributes of impacted watersheds through actions that minimize sedimentation and invasive species movement. 5) Protect impact to cultural resources through consultation with local forest specialists. Control Objectives 1) Protection of human life and safety is the first priority for all actions taken and shall override all other incident control objectives. Evaluate risk vs. benefit in strategic and tactical planning and only commit operational resources to actions that have the highest probability of success. 2) Keep fire out of Jemez Canyon 3) Keep fire East of Forest Road (FR) 10; SouthEast of Community SLP; South of State Route (SR) 4; East of FRs 282 & 280; and North of FR 270 4) Minimize retardant impacts to Jemez Natural Recreation Area 5) Protect values at risk in the Valles Caldera National Preserve including watersheds, visitor and administrative infrastructure, historic structures, cultural resources, and important wildlife habitats. 6) Provide initial attack resources to respond to any new ignitions within the TFR area to limit potential size and growth.												
4. Operational Period Command Emphasis: <p style="text-align: center;">*** L C E S ***</p>												
5. General Situational Awareness: <p style="text-align: center;">**Continued low RHs** **No predicted precip for several days**</p> <p><u>WEATHER DISCUSSION:</u> Unusually early start to fire season. Critical to extreme fire weather for the next several days. Entire area is experiencing extended drought. Please see daily weather forecast for detailed report.</p>												
7. GENERAL MESSAGE See the attached Safety Message for more information.

ICS 202	9. PREPARED BY (PLANNING SECTION CHIEF) Marg Olson	10. APPROVED BY (INCIDENT COMMANDER) Steve Parrish										

To: All Incident Personnel, Cerro Pelado Fire

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/Steve Parrish

Incident Commander

SAIMT 1

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 02	TYPE OF FIRE: Wildland, Type 1
FIRE NAME: Cerro Pelado	OPERATIONAL PERIOD: Day Shift
DATE ISSUED: 4/24/22 TIME ISSUED: 1800	SHIFT DATE: Monday, April 25, 2022
UNIT: Santa Fe NF	SIGNED: Greg Titus, FBAN 

WEATHER SUMMARY:

See weather forecast in today's IAP
Local Thresholds – Watch Outs
Min RH < 15%, Winds > 30 mph

FIRE BEHAVIOR:

GENERAL:

Although weather conditions have moderated expect active fire behavior today.

Current Fire Environment Conditions:

Fine Dead Fuel Moisture = 5%, 1,000 Hour Fuel Moisture = 11%, Live Shrub Moisture = 82%
ERC's remain around the 90th percentile @ Jemez RAWs, but at or near maximum value for this date.

Fire Behavior based on maximum values for the fuel models shown, exposed fuels on steep slope.

Fuel Model	Rate of Spread	Flame Length
Grass/Shrub	6-14 chains/hour	2-4 feet
Timber	6-13 chains/hour	7-9 feet

Spotting from ridge top torching trees up to **0.4 mile during wind gusts**. Probability of Ignition = **58%**
In **one hour** new spot fires or ignitions can reach **7 acres**.

Specific Areas of Concern:

Alpha – Southeast morning winds will push the fire toward Road 10. The light fuels in most of the area and the early morning occurrence of this wind will not present a major threat for active fire behavior. As winds turn to a south flow expect flanking and heading fire along the north side of the fire along nearly the whole division.

Zulu – Expect heading and flanking fire from the northeast division break to the eastern point of the fire. Fire will continue to burn east into the Las Conches fire scar. Minimal to moderate fire behavior due to the continuity of fuels. Large heavy fuels continue to burn in this area. Along the southern flank fire will continue to move south with mostly backing fire, expect minimal fire behavior.

AIR OPERATIONS: Cloudy skies and chance for morning precipitation may impact flight operations. Conditions improve into the day. Potential areas of smoke.

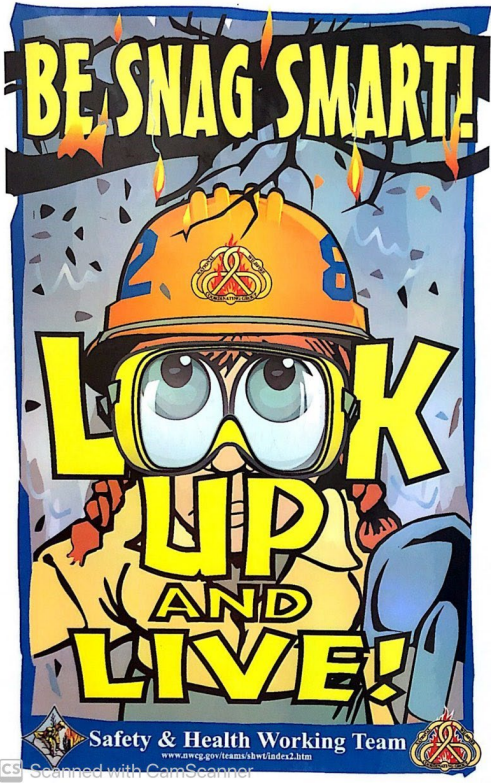

SAFETY:

Conditions are moderating but with a south wind fire may find new paths of fuel to move into. Conditions will become dry and windy again later in the week. Plan ahead before taking action. Update your expectations to fit current conditions. The fire environment is always changing. Prepare and plan for it with your LCES.

Send any fire behavior observations or photos to: gregory.titus@fws.gov

HEALTH AND SAFETY MESSAGE

“We don’t plan on luck to be safe, we plan on sound risk management and good decisions.....the Red Team

INCIDENT: Cerro Pelado Fire	DATE: Monday, April 25, 2022
Major Hazards & Risks: Driving, Hazard Trees, Medical Emergency	
<p>Driving – One of the biggest risks we take each day is driving. Some of the mitigations for driving are drive defensively, drive with lights on, ensure windshield is clear and clean, do not drive distracted, follow the speed limits, watch for wildlife crossing the road, and utilize 4-wheel drive on dirt or gravel roads.</p> <p>Hazard Trees – There are a lot of Hazard Trees in the burn footprint of the 2011 Las Conchas Fire and other fires. The best mitigation for hazard trees is avoidance, but if we must work around hazard trees, utilize some of the safety mitigations located in the IRPG (page 20-21 of the new yellow 2022 IRPG).</p> <p>Medical Emergencies- Do you know what to do in case of a medical emergency? Review the Medical Incident Report at the end of your IRPG or the IAP. Your actions may be what saves a life!</p>	
	<h3>Life First</h3> <ul style="list-style-type: none">• Everyone goes home<ul style="list-style-type: none">-Safely after every assignment• Risk Management<ul style="list-style-type: none">- Eliminate unnecessary exposure- Do not engage without the greatest margin of safety- Assure a high probability of success- Make sure risk is commensurate with values threatened

Red Team Safety Officers: Tony Rivers, Tommy Hawkins

**Cerro Pelado Fire
Human Resource Message
April 25, 2022**

Rights and Responsibilities While on Assignment

You have a right to:

- A safe work environment
- Adequate information, food, sleep, equipment, and transportation
- Answers to your questions

But it's not one-sided. Your help, cooperation and commitment are needed. For all fire personnel to be effective, here is an outline of your responsibilities:

❖ **Promote and Maintain Good Communications**

Adequate and accurate communications and information flow are essential for efficient fire suppression efforts and effective interpersonal relations.

❖ **Maintain an Attitude of Respect and Concern for your Colleagues.**

Fire suppression efforts can only be accomplished by accessing the skills and abilities of a wide variety of people. An attitude of **mutual respect** and **appropriate behavior** is essential for all personnel. Civil Rights violations will be dealt with promptly. If you have a concern, please report it to the Human Resource Specialist, your supervisor, or any member of the Management Team.

Fire camp will be a Drug and Alcohol-Free workplace. Here are the rules:

From the Fire line Handbook, Chapter 6 – Common Responsibilities:

Non-prescription unlawful drugs and alcohol are not permitted at the incident. Possession or use of these substances will result in disciplinary action.

Remember, **YOU** are responsible for your conduct and behavior.

Janine Summy, Human Resource Specialist, 509-429-1206

“I am still determined to be cheerful and happy, in whatever situation I may be; for I have also learned from experience that the greater part of our happiness or misery depends upon our dispositions, and not upon our circumstances.” -Martha Washington-

FINANCE

CTRs and SHIFT TICKETS will be picked up daily during morning briefing

OR

you can e-mail to

2022.CERROPELADO.FINANCE@FIRENET.GOV

(ADs send your Casual Hire Form to above email or place in box at morning briefing.)

Finance Section is here to help answer your question(s).

FREQUENT ISSUES:

- *If you work (longer) than the set operational period hours, please document why in REMARKS*
- *If you did not take a break for lunch/dinner, please document why in REMARKS*
- *Always have your supervisor sign your CTRs or SHIFT TICKETS*
- *If you did not adhere to the WORK/REST RATIO, please document why in the REMARKS and when MITIGATED*

IWI IC Responsibilities:

- Take charge of the scene – inform the Division Supervisor and Communications that you are the IWI IC and establish radio communications (frequencies, channels). Identify the emergency name – Division A medical, etc.
- Assign or begin patient assessment (Medical Incident Report - MIR) and first aid. Request additional medical resources on division/branch or across incident. Transmit MIR patient information to Communications.
- Determine patient transportation through consultation with line medical personnel and Medical Unit Leader. Consider transportation time, risk to personnel, destination facility and available operational resources. If air transport is chosen, implement the plan for alternative transportation in the event aircraft cannot complete the mission. Order transportation resources through Communications as early as possible.
- Notify Communications as resources arrive and any patient status changes. Names of injured or deceased individuals will not be transmitted on the radio.
- Initiate documentation for future investigation; if a line safety officer is available, assign them to lead documentation. Do not move deceased individuals, gear or personal effects except to accomplish rescue work or protect the safety of others. Obtain written documentation of witnesses. The Unit Log, ICS 214, may be used for the initial documentation, but a subsequent narrative will be required.
- As appropriate, conduct an After Action Review to determine successes, areas to improve and lessons learned.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
