

## INFRARED INTERPRETER'S DAILY LOG

<b>Incident Name:</b> Pipeline	<b>IR Interpreter(s):</b> Hillary Hudson	<b>Local Dispatch Phone:</b> Flagstaff Dispatch (928-527-3552)	<b>Interpreted Size:</b> 26,532 acres <b>Growth last period:</b> 0
<b>Flight Time:</b> 1200 AST <b>Flight Date:</b> 6/26/22	<b>Interpreter(s) location:</b> Santa Fe, NM <b>Interpreter(s) Phone:</b> 928-606-1994	<b>GACC IR Liaison:</b> Tom Mellin <b>GACC IR Liaison Phone:</b> Phone: 505-842-3845 Cell: 505-301-8167	<b>National Coordinator:</b> Tom Mellin <b>National Coord. Phone:</b> Phone: 505-842-3845 Cell: 505-301-8167
<b>Ordered By:</b> AZ-COF (928-527-3552)	<b>A Number:</b> 83	<b>Aircraft/Scanner System:</b> 350SM TENAX	<b>Pilots/Techs:</b> Wren
<b>IRIN Comments on imagery:</b> Most of the fire was obscured by heavy cloud cover		<b>Weather at time of flight:</b> Overcast	<b>Flight Objective:</b> Map heat perimeter, isolated, intense, and scattered heat.
<b>Date and Time Imagery Received by Interpreter:</b> 6/26/22 0000 AST		<b>Type of media for final product:</b> PDF Map, shapefiles, kmz, GDB	
<b>Date and Time Products Delivered to Incident:</b> 6/26/22 0145 AST		<b>Digital files sent to:</b> /incident_specific_data/southwest/GACC_Incidents/2022/2022_Pipeline/IR/20220626	
<b>Comments /notes on tonight's mission and this interpretation:</b>  I started my interpretation with the most recent NIFS fire perimeter. All but the southern tip of the fire was obscured by heavy cloud cover which made IR interpretation impossible. The southern tip did exhibit some scattered and isolated heat. The view of this area was quite good and there was no cloud cover present due to the fact that the clouds ended abruptly creating a clean edge The cloud cover polygon on the map shows the portion of the scan that was covered in clouds.
