Comments /notes on tonight's mission and this interpretation: I began mapping from the most recent NIFS fire perimeter for both fires. <u>Beehive – 10,745 Acres</u> This fire increased in size by 141 acres since last night's IR. There was no intense heat and only scattered heat throughout the interior of the fire. <u>Beehive 2 – 92 Acres</u> This fire increased in size by 88 acres since last night's IR. There was no intense heat and only scattered heat throughout the interior of the fire. <u>Corral - 78 Acres</u> The heat perimeter grew by 1 acre. There was no intense or scattered heat, only limited interior isolated heat.
