OPERATIONAL PERIOD (DATE/TIME)

MONDAY, May 13, 2024 DAY Operational Period: 0600 – 2200

GENERAL CONTROL OBJECTIVES

Leader's Intent

- Success is defined as keeping the fire to the smallest footprint possible, leaving happy customers, with arriving home safely.

Control Objectives

- Manage the fire with *Full Suppression, Confine/Contain* and *Point Protection* strategies.
- Minimize fire effects in protecting structures and protect cultural resources and minimize negative impacts on soils, wildlife and watersheds.
- Protect structures and cultural resources. Minimize impacts to soils, wildlife and watersheds.
- Keep fire south of U.S. Highway 70 and east of the San Carlos River.
- Provide initial attack support for new wildland fire starts, within the WFDSS planning area.

Management Objectives

- Manage risk to incident personnel by ensuring hazards are identified, assessed and mitigated. Accept only necessary risk when values threatened warrant action and the probability of achieving objectives is high.
- Create and maintain a supportive, positive, and harassment free work environment in which people are treated with respect and dignity. Create a "no tolerance" atmosphere for harassment, alcohol or illegal drug use.
- Maintain and enhance relationships with partners, cooperators, community leaders, and tribal representatives. Ensure timely and accurate information and sharing coordination with local authorities.
- Effectively manage incident costs through the selection and implementation of strategies and tactics that have a high probability of success in meeting objectives.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildland Fire
FIRE NAME: Toyo Fire	OPERATIONAL PERIOD: Day Shift, May 13, 2024
DATE ISSUED: May 12, 2024	TIME ISSUED: 2000
UNIT: San Carlos Agency	SIGNED: Stewart Turner, FBAN

INPUTS

WEATHER SUMMARY: For Specifics, please see the attached Incident Weather Forecast.

WEATHER: Normal wind trends Monday generally less than 10 mph. RH trends will continue on the dry side with poor to fair overnight recoveries. Several degrees hotter Monday. Strong gusty winds may return Wednesday as a weather system approaches from the west.

MAX TEMP: 92-95° **MIN RH:** 9-12%

20 FOOT WINDS: West 5-10 mph. A few gusts to 15 mph possible in mid to late afternoon.

CHANCE OF WETTING RAIN (≥ 0.10): 0% **HAINES INDEX:** 4 **LAL:** 1

FUELS: Fuel Models:(Scott/Burgan 40) **GR1** – Short sparse dry climate grass, **GR2** - Low load, dry climate grass, **SH1** – Low load dry climate shrub.

Ignition Receptiveness: Probability of Ignition 100%. Short range spotting.

Dryness: Dead and down fuel moistures :1 hour – 2%, 10 hour– 7%, and 1000 hour– 9%.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior will be dependent on the winds. Expect to see fire behavior to pick up during the afternoon hours with the wind gusts of 15 mph. Active fire behavior can be expected with these wind speeds. Without the winds expect to see low to moderate fire behavior. The fuels are dry and receptive to fire and spotting. Don't underestimate the fire behavior potential. With wind the fire will spread rapidly to the east.

SPECIFIC:

The area along the 410 road will be tested with the afternoon wind gusts. With the low humidity and high temperatures expect any embers across the line start to spread with the wind.

AIR OPERATIONS:

No limits to air operations.

SAFETY

Common Denominators of fire behavior on tragedy fires:

- *Most incidents happen on the smaller fires or on isolated portions of larger fires.*
- *Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in "flare-ups" or "extreme fire behavior." In some cases, tragedies occur in the mop-up stage.*

Safety Message

Toyo Fire

May 13, 2024

Don't be the Duke of Hazards!!!

- Driving is still the most dangerous hazard in our fire environment. Highway 70 is one of our biggest hazards with firefighter ingress and egress on and off the highway. Watch out for the public in the fire area.
- 5/13/2024 0600am is the transition from the local Type 3 Team to Southwest Area CIMT Team 1. Make sure before you go out on shift, you know who you are working for because it might of changed with the new incoming team. Make sure you get a solid briefing before heading to the line and make sure you have your radio is programed for todays shift.
- Don't let the lack of fire behavior lull you into being complacent. Potential of fast moving fire behavior is still present esspecially in river drainages with higer fuel loadings. Be aware of your surroundings and always have a way out.

Safety Officers - Bruce Malloy, Robert Bertolina, Mike Cachero
