OUTPUTS

FIRE BEHAVIOR

GENERAL:

Grass has been the primary carrier of the fire. Slope and or wind is needed to spread the fire. Little fire behavior is expected within the fire perimeter. No perimeter growth is expected. Caution should be used with any new start and initial attack; the grass fuels are extremely dry and the fire will spread quickly. Don't underestimate the fire behavior potential. With wind the fire will spread rapidly to the east.

SPECIFIC:

Smoldering fire behavior within the fire perimeter. The shrubs and trees are holding the heat and will continue to smolder until they consume the fuels or are extinguished.

Any initial attack should be sized up thoroughly paying attention to the grass fuels and the winds and topography. Active to very active initial attack fire behavior can be expected.

AIR OPERATIONS:

No limits to air operations.

SAFETY

Risk Analysis

Initiate all actions based on current and expected fire behavior

- *Can the resources you are replacing give you a thorough briefing?*
- *Can you observe the area, use scouts?*
- *Have escape routes and safety zones been thoroughly scouted?*
- *Are they marked for night use?*
- *Have potential dangers been located, can they be dealt with?*
- *Access to weather and fire behavior forecast?*

Safety Message
Toyo Fire
May 14 2024

Life is tough, but it's even tougher when you don't have any situational awareness!!!

- Your Situational Awareness begins every morning with a thorough morning operational briefing. Getting the daily weather, operational objectives, leaders intent and the end state will provide you the tools and awareness to have a safe shift.
- We have bear sightings on the fire in the river drainages. The bears are not interested in you but they are interested in your trash and or you feeding them. Feeding bears creates bad bear behavior.
- With very dry grass and the combination of high winds, there is a chance of the fire moving again. Have trigger points set to get your firefighters to a safe location or a safe position to anchor and engage if the fire takes off.

Safety Officers - Bruce Malloy, Robert Bertolina, Mike Cachero
