INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY SHIFT														
DRAW		Date/Time From: 07/29/2025 0600 TUE	Date/Time To: 07/29/2025 2200 TUE													
3. Objective(s): 1. Provide for firefighter and public safety. 2. Employ a full suppression strategy utilizing safe tactics with a high probability of success. 3. Minimize negative fire effects to structures, infrastructures, powerlines and cultural and heritage areas by utilizing BMP's to minimize impacts to T&E species. 4. Look for advantageous opportunities to minimize acres burned, in order to reduce prolonged smoke impacts to firefighters, recreational areas, dispersed camp sites and highly traveled road. 5. Provide timely, accurate informational updates to agency, all cooperators, partners and the public.																
4. Operational Period Command Emphasis: Ensure LCES are in place.																
General Situational Awareness: New Communications Plan today - don't forget to CLONE! Showers and thunderstorms possible late morning and early afternoon.																
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:																
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table border="0"><tr><td><input checked="" type="checkbox"/> ICS 202</td><td><input type="checkbox"/> ICS 207</td><td rowspan="6">Other Attachments: <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____</td></tr><tr><td><input checked="" type="checkbox"/> ICS 203</td><td><input type="checkbox"/> ICS 208</td></tr><tr><td><input checked="" type="checkbox"/> ICS 204</td><td><input checked="" type="checkbox"/> ICS 220</td></tr><tr><td><input checked="" type="checkbox"/> ICS 205</td><td><input type="checkbox"/> Map/Chart</td></tr><tr><td><input type="checkbox"/> ICS 205A</td><td><input checked="" type="checkbox"/> Weather Forecast/Tides/Currents</td></tr><tr><td><input checked="" type="checkbox"/> ICS 206</td><td></td></tr></table>				<input checked="" type="checkbox"/> ICS 202	<input type="checkbox"/> ICS 207	Other Attachments: <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____	<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> ICS 204	<input checked="" type="checkbox"/> ICS 220	<input checked="" type="checkbox"/> ICS 205	<input type="checkbox"/> Map/Chart	<input type="checkbox"/> ICS 205A	<input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	<input checked="" type="checkbox"/> ICS 206

Spot Forecast for Draw...USFS
National Weather Service Flagstaff AZ

.TUESDAY...

Sky/weather.....Becoming mostly cloudy. A chance of afternoon showers and thunderstorms.
Chance of pcpn.....50 percent.
Max temperature.....76 to 78.
Min humidity.....26 to 28 percent.
Wind (20 ft).....Variable winds 5 to 8 mph. Gusty and erratic winds expected near thunderstorms.
Max Vent Rate.....Excellent.
Clearing Index.....1100. Mixing height.....10800 ft AGL in the morning increasing to 13000 ft AGL in the afternoon.
Transport winds.....North 5 to 10 knots. .

TUESDAY NIGHT...

Sky/weather.....Becoming partly cloudy late. A chance of evening showers and thunderstorms. Chance of pcpn.....40 percent.
Min temperature.....48 to 51.
Max humidity.....85 to 90 percent.
Wind (20 ft).....Light winds. Gusty and erratic winds expected near thunderstorms in the evening. Gusty and erratic winds expected near thunderstorms overnight.
Min Vent Rate.....Poor.
Clearing Index.....1.
Mixing height.....100 ft AGL.
Transport winds.....Southwest 0 to 5 knots. .

WEDNESDAY...

Sky/weather.....Becoming mostly cloudy. Showers and thunderstorms likely by afternoon.
Chance of pcpn.....70 percent.
Max temperature.....76 to 78.
Min humidity.....28 to 30 percent.
Wind (20 ft).....Variable winds 5 to 8 mph. Gusty and erratic winds expected near thunderstorms.
Max Vent Rate.....Very good.
Clearing Index.....731.
Mixing height.....10000 ft AGL in the morning increasing to 13400 ft AGL late in the morning, then decreasing to 2600 ft AGL late in the afternoon.
Transport winds.....Northwest around 5 knots shifting to the northeast late in the morning, then shifting to the west early in the afternoon shifting to the south late in the afternoon.

MEDICAL PLAN (ICS 206 WF)

What is a Foreign Body In The Eye?

Eyelashes prevent most particles or objects from entering the eye, and tears usually are able to rinse out particles that do get in the eye. Occasionally, a solid object or projectile can adhere to the eye or embed itself below the surface of the eye.

Foreign bodies in the eye can be small specks of dirt or eyelashes, or larger objects such as cinders, wood chips, rust or glass. The eye is damaged easily.

The most common type of eye injury is a corneal abrasion — a scratch in the cornea, the transparent layer that lies over your pupil (the center of your eye) and iris (the colored part). If the foreign body sticks to the undersurface of the eyelid, the scratch occurs when the object rubs against the cornea as you blink, and the scratch will be in a vertical line. Alternatively, the foreign particle may be stuck to the clear cornea.

Small foreign bodies on the white of the eye often do not cause much discomfort.

Symptoms

Symptoms can include itching, irritation or redness of the eye. If you have a corneal abrasion, you may have eye pain, light sensitivity and blurry vision.

Expected Duration

Some foreign objects can be removed easily and do not damage the eye. Others are more difficult to remove and can injure the eye.

With proper treatment, symptoms of a mild corneal abrasion almost always improve or disappear completely within 24 to 48 hours. For more severe abrasions, symptoms often last longer.

Prevention

Use protective eyewear at work if appropriate, such as during construction work and when playing sports. At work, protective eyewear can reduce the risk of a corneal abrasion by up to 90% because these abrasions often happen when a foreign object gets in the eye. If you play a sport, use goggles to protect your eyes from sand, dirt and other objects. If you need glasses to see clearly, you can have goggles made with prescription lenses.

If you wear contact lenses, wash your hands thoroughly before you handle the lenses, and keep your lenses clean.

Treatment

Never rub your eye to try to get the object out because this can create a corneal abrasion or deeper injury.

If the object is cannot be removed easily or if it is embedded in the eye, cover the eye with gauze and see a doctor immediately.

If you wear contact lenses, wash your hands and remove the lenses. It is possible that a small rip in the lens is causing the irritation, rather than a foreign object.

If the object is small, such as an eyelash or speck of dirt, you may be able to see it by opening the eye as wide as possible. Have someone look at your eye or, if you are by yourself, look in a mirror. Hold down your lower lid and look up, then lift your upper lid and look down. If you can see the object, you can remove it with the edge of a facial tissue, a moistened cotton swab, or flushing.

Incident: Draw Fire	Date: 07/29/2025	Operational Period: day shift
-------------------------------	----------------------------	---

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

MAJOR HAZARDS AND RISKS

- | | |
|---|--|
| <ul style="list-style-type: none"> • Dehydration—Drink lots of water • Short to medium range spotting Ensure LCES in place • Heavy fuel loads • Potential increased fire behavior • Snags!!! Rolling Rocks!!! • Chance of Thunderstorms/Lightning | <ul style="list-style-type: none"> • Driving-- Lights on, seatbelts, drive defensively, use chock blocks. Watch for wildlife on roads and coming from fire area. • Rocky, rough terrain-falls/slips • Fatigue • Recreational Traffic |
|---|--|

FIRE SAFETY BEGINS WITH U

HOW'S YOUR PASSION FOR SAFETY?

Our emphasis on doing this dangerous job safely needs to be fine-tuned with an attitude check. We know what safety is, we know what things to watch out for, but our ability to concentrate on this aspect of our wildfire suppression responsibility often is impaired by situations, physical difficulties, and inconveniences that have a profound effect on our frame of mind and our ability to focus attention on safe processes. Incident Attitude needs to be positive so that it does not impair our ability to think clearly and act decisively.

Quote of the day

“One thing vampire children are taught is never run with a wooden stake “ **Jack Handey**

INCIDENT RADIO COMMUNICATIONS PLAN I-205				1. INCIDENT NAME			2. DATE/TIME PREPARED			3. OPERATIONAL PERIOD DATE/TIME

MEDICAL PLAN (ICS 206 WF)

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE

"MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical"(Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider(Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
