INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: DOME FIRE	2. Operational Period: Date From: 10/4/2026 Time From: 0700 Date To: 10/5/2026 Time To: 0700																				
3. Objective(s): <u>Management Objectives</u> - Prioritize firefighter and public safety through risk analysis and hazard mitigation. - Minimize acres burned utilizing direct extinguishment tactics. - Utilize resources where they can be most successful and ensure tactics have a high probability of success. - Protect and minimize impacts to local communities, wilderness values, and cultural/natural resources. - Provide timely and accurate public information.																					
<u>Control Objectives</u> - Keep the fire north of Wawona Dome. - Keep the fire south of Glacier Point Road. - Keep the fire east of Alder Creek. - Keep the fire west of Buena Vista Ridge.																					
<u>General Situational Awareness</u> - Responsibility equals accountability, accountability equals ownership, and a sense of ownership is the most powerful thing a team or organization can have.																					
5. Site Safety Plan Required? Yes ☐ No ☒

Incident Weather Forecast

FORECAST NO: 17
PREDICTION FOR SHIFT DATE: 10/04/2026
FORECAST ISSUED: 1700 10/03/2026

NAME OF FIRE: Dome
UNIT: CA-YNP
SIGNED: *Brett T. Lutz*
Incident Meteorologist: Brett Lutz
Contact: (916) 860-9192 blutz@blm.gov

WEATHER DISCUSSION:

Fairly strong high pressure for this time of the year will weaken slightly thru early this next week as a weak low pressure trough brushes by to the north. This will result in some high clouds Sunday and cumulus build-ups Monday over the Sierras, mainly north and east of Yosemite. The inversion is likely to mix out 1100-1200 local time Sunday, though some smoke is likely to linger over & near the Yosemite Valley. Temperatures will warm into the mid-70s with Min RHs near 20%. Winds will follow a diurnal, terrain driven cycle Sunday and mixing heights are expected to rise thru Monday. Winds are likely to become more westerly Monday thru Wednesday as high pressure rebuilds from the southwest.

WEATHER FORECAST FOR TODAY (SUNDAY):

WEATHER: Mostly sunny with scattered high, mostly thin clouds. Inversion lifting 1100-1200 local time, but some smoke is likely to linger over near the Yosemite Valley.

CHANCE OF WETTING RAIN (≥ 0.10): 0% **CHANCE OF LIGHTNING:** 0%

20 FT WINDS: Morning drainage winds, mainly from the NE 2-6 mph. Winds becoming west-southwest 4-8 mph with gusts 10-18 mph through the afternoon. (24hr trend: Up to 1-3 mph)

MAX TEMPERATURE: 73-79 degrees. (24hr trend: Down 1 degree)

MIN HUMIDITY: 18-23%. (24hr trend: Up 5%)

MIXING HEIGHT (AGL): 6,500 feet. **TRANSPORT WIND:** West-southwest 10-15 mph.

TONIGHT (SUNDAY NIGHT):

WEATHER: Mostly clear. Inversion developing around 2000 local time. Northeast to east drainage winds.

CHANCE OF WETTING RAIN (≥ 0.10): 0% **CHANCE OF LIGHTNING:** 0%

20 FT WINDS: Northeast to east winds 3-6 mph with 6-12 mph.

MIN TEMPERATURE: Upper 40s to near 60, highest mid-slopes. **MAX HUMIDITY:** 40-60%.

MONDAY:

WEATHER: Mostly sunny. Cumulus build-ups to the N & E over the Sierra Crest. Inversion lifting ~1100.

CHANCE OF WETTING RAIN (≥ 0.10): 0% **CHANCE OF LIGHTNING:** 0%

20 FT WINDS: Morning northeast winds around 2-6 mph becoming west 3-6 mph with gusts 6-12 mph. (24hr trend: Down 2-6 mph)

MAX TEMPERATURE: 72-78 degrees. (24hr trend: Down 1 degree)

MIN HUMIDITY: 18-23%. (24hr trend: No change)

MIXING HEIGHT (AGL): 7,500 feet. **TRANSPORT WINDS:** West 10-15 mph.

Please submit weather obs if possible. You can email/text to blutz@blm.gov / 916-860-9192.

Observations from Thursday 10/3/26 thru 1630 Local Time:

Ostrander Lake (8333ft): Min/Max T: 58/67F, Max/Min RH: 33/23%, Max Wind W 8mph

WWolf (8083ft): Min/Max T 45/77F, Max/Min RH: 45/17%, Max Wind SW 3 G9mph

Hennes Ridge (6122ft): Min/Max T: 63/77F, Max/Min RH: 32/21%, Max Wind: NNW 2 G6mph

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 17

TYPE OF FIRE: Wildfire

FIRE NAME: DOME

OPERATIONAL PERIOD: October 04, 2026

DATE ISSUED: October 03, 2026

TIME ISSUED: 1700 PDT

UNIT: CA-YNP-000100
U.S WFS High Sierra Unit

SIGNED: /s/ Alex Giery FBAN
/s/ Dan Lerma FBAN(t)

WEATHER SUMMARY

*****Warm trend continues with lower relative humidity*****
(See attached Spot Weather Forecast)

TOPOGRAPHY: Elevations: 6800'-8300' Slopes: (0°- 35°degrees)

FIRE BEHAVIOR INPUTS

<i>Fuel Type</i>	<i>Rate of Spread</i>	<i>Flame Length</i>	<i>Spotting Dist.</i>	<i>Fire Danger Indices</i>	
...If your work area includes -	(CH/HR = FPM)	Feet	Miles	ERC	BI
Grass-Shrub	10-20 ch/h	2'- 5'	>.1 mi	47 (80th)	25 (57th)
Timber	5-10 ch/h	6'- 8'	.4 mi	53.5 (97th)	33.3 (97th)
Slash-Blowdown	10-30 ch/h	7'- 12'	.4 mi		

FIRE BEHAVIOR NARRATIVE

GENERAL

Fire history and red fir/lodgepole fuel types combine to create heavy surface fuel loading, significant resistance to control, long burndown duration, roll-out, ash pits, and falling material. These fuel types produce significant spotting with the dead and dying trees, both producers and receptors of spot fires. Spotting is the most consistent driver of spread. Without wind and slope alignment, fire behavior will largely be conducive to direct attack based on flame lengths, though jackpots of heavy fuel may prevent direct action due to heat produced and long residence time for burn down. When wind and slope align, fire behavior will increase to moderate rates of spread and exceed direct attack capabilities.

Yosemite High Elevation
Pocket Card

MAX PIG 70 PERCENT

SPOT May grow to 15 acres in one hour in the grass-shrub.

May grow to 5 acres in one hour in the timber.

May grow to 30 acres in one hour in the slash-blowdown.

SPECIFIC

Branch V: The western portion of the Branch will continue to see backing and flanking fire behavior along control lines. Rollout and snags may challenge the line. Interior heat sources may continue to smolder, watch for ash pits and fire weakened trees. On the eastern portion of the Branch expect the wind direction to align new slopes. Continuous fuels on slopes may exhibit head fire conditions.

Branch X: Along Alder Creek the fire will continue to back against control lines. Rollout and falling snags may challenge control lines. On the eastern portion of the Branch the fire activity will continue with a marked increase after inversion lifting. This spread will continue east on Horizon Ridge and toward Ostrander Lake as well as the drainage to the east of Horizon Ridge near Pohono Meadow. Expect the change in wind direction to align new slopes. Down wind spotting may occur with spotting as far as a mile observed. Continuous fuels on slopes may exhibit head fire conditions.

AIR OPERATIONS

Inversion: Smoke may linger in canyons and complex terrain. Visibility may be reduced.

Transport Winds: 6500' mixing height with a W wind 10-15 mph.

SAFETY

Heavy dead and down fuels will have long burn down times, holding heat for several days. This heat will dry adjacent fuels making spot fires and active fire spread more likely.

Dome Fire - Safety Message

INCIDENT# CA-YNP-000100

DATE: 10/04-05/2026

TIME: 0700-0700 24 Hour Shift

Mental Well-Being

- Prioritize sleep and eat a healthy diet.
- Take care of family and friends. When possible, call home and check on those who are taking care of life while we are on assignments.
- Check in with assigned resources. Look for anything that is atypical. Ask questions and engage in healthy activities.
- Focus on positivity and consider self-care to minimize mental stress.

Be sure all elements of your safety plan are in place prior to Engagement!!

Accountability

- Know where your crew members are at all times.
- Work in pairs when feasible.
- Notify your supervisor of any location changes.
- Ensure your radio is cloned, you know how to use it, and have a plan when radio reception is challenging.
- Check IN with the Division Supervisor on site if passing through.
- Check OUT with your supervisor at the end of shift.
- Know how to communicate with resources that are spiking out and how to get ahold of personnel at all hours.

Aviation Watch Outs

Everyone should be asking questions about every mention and be able to answer the following:

- Is the flight necessary?
- Are hazards identified and known?
- Should the operation or flight be stopped due to a change in conditions?
- Is there a better way or pressure to complete the mission?
- Can you justify your actions?
- Do you have an escape route?
- Are you deviating from the assigned operation or flight?

Prepared by:
CIIMT 4 Safety Group

INCIDENT RISK ANALYSIS
ICS (215A) DAY/NIGHT SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	COMPLEX AVIATION OPERATIONS	- Follow “Aviation Watch-Out Situations” (IRPG p.62). - Do not plan on air resources for tactical support or medical transportation. - Refer to IRPG p.74 for directing bucket drops. - Ensure positive communication with air resources. - Do not stand under water drops and watch for tree hazards after a drop. - Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines and reference materials. - Ensure coordination and communication are in place and understood by all the resources involved in a mission. - Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.
ALL	HAZARD / DANGER TREES	- Follow Hazard Tree Safety Guidelines (IRPG pg.20.) - Limit the number of personnel around snags and their exposure time. - Fallers must be qualified for the trees being felled. - Be alert around hazard trees during wind events, even green trees. - The hazard zone extends a minimum of 2½ tree lengths. - Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	SLIPS, TRIPS, & FALLS	- Slow down and watch your footing. - Walk on designated paths when available. - Reduce walking pace when approaching corners, intersections, or surface changes. - Take short steps or shuffle for stability.
ALL	FIRE BEHAVIOR	- Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift. - Maintain adequate escape routes and safety zones. Set trigger points. - Maintain Situational Awareness.
ALL	INDIRECT LINE CONSTRUCTION	- Establish and maintain LCES. - Utilize favorable locations when constructing control features, i.e., lighter fuels, natural or existing barriers, and ridgelines. - Watch out for unburned fuel between you and the fire.
ALL	SMOKE	- Periodically rotate crews out of smoky conditions on the fire line when possible. - Locate rehab areas above inversion if possible. - Monitor crew's health. Get medical care for early signs of respiratory illness. - Provide rest breaks; have crews get as much sleep as possible; hydrate!
ALL	LINE SPIKE	- Always maintain LCES. - Ensure medical resources are on the line, accessible, or an alternative plan is in place. - Can the incident support resources logistically, including communications? - Ensure RON site poses no fire threat; helicopters can longline or land at or nearby. - Arrange to have qualified individuals accept long lines or internal cargo supplies.
ALL	FATIGUE AND COMPLACENCY	- Be alert, monitor all resources for fatigue, and take breaks as necessary. - Maintain a 2:1 work-to-rest ratio. - Repeated assignments in the same area can lead to complacency, making personnel more vulnerable to accidents. - Take steps to maintain situational awareness for the duration of the incident. - Take tactical pauses as practical and feasible.
ALL	STEEP TERRAIN & ROLLING DEBRIS	- Maintain 8'-10' spacing when working & walking. - Do not work above any personnel. - Evaluate the necessity of sending personnel into areas with limited access.
ALL	WILDLIFE	- High concentration of wildlife in the area. - Numerous bees have been seen in the area. Anticipate them in dirt. - Never approach wild animals even if they seem calm. - Do not leave food out, including unsecured trash cans. - Back away slowly if an animal approaches.
ALL	PACK MULE OPERATIONS	- Maintain a safe working distance around pack mules; approach animals from the front/side, avoid blind spots, and do not stand directly behind or underneath a loaded animal. - Evaluate steep, rocky, loose, or unstable terrain before moving stock. Identify safe routes, crossing points, and turnaround locations suitable for both animals and handlers. - Consider smoke, heat, fire behavior, falling trees, rolling material, aircraft operations, and sudden changes in weather that may startle or endanger animals. Establish escape routes and contingency locations.

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4

EXPECTATIONS

Welcome to this Incident.
Thank You for your Cooperation & Support!

CONDUCT AND BEHAVIOR

This team is committed to “**ZERO TOLERANCE**” of careless, illegal, inappropriate and unsafe actions.

Alcohol and/or illegal drugs are **NOT allowed** within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing, and able to perform the duties for which they are qualified.

Sexual Harassment

Inappropriate actions or comments will not be tolerated. Everyone is expected to act in a professional manner. It is your responsibility to stop inappropriate actions or comments immediately upon becoming aware of such. Sexual Harassment must be reported to the Human Resource Specialist or Incident Commander. When outside of your designated sleeping area, you are required to wear at least a shirt, appropriate shorts, and shoes or sandals. If you need clarification of these expectations contact the Human Resource Specialist or IC. What we PERMIT we PROMOTE!!!!

SAFETY

The commitment to and accountability for safety is a joint responsibility of firefighters, managers and administrators. Individuals must personally be committed and responsible for their own performance and accountability. Everyone assigned to this incident can expect an assignment that follows all safety rules & regulations. Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

EMPHASIS AREAS

Accountability

Resource accountability is an ongoing process that requires a team effort on both the Team and the resource. Once checked in you must review the IAP for your correct assignment and any other pertinent information such as name, resource ID and LWD. Any missing or wrong information needs to be reported to your supervisor or the Resource Section. Additionally, any changes to personnel, information must be shared with the Resource Section. Finally, it is our responsibility to ensure you get home safe and that all documentation for your time on the incident is finalized. Every resource must go through a proper Demobilization. See the Demob unit to start the process.

Training

All trainees and trainers are expected to follow the procedures outlined in the California Interagency Incident Management Team 4 “Training Expectations” – acquired from Training Specialist.

Evaluations

All supervisory personnel assigned will complete an ICS 225 Incident Personnel Performance Rating form for their assigned resources according to agency policy or contractual agreement.

Injuries/Claims

Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

Work Rest Cycles

The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16. If circumstances require you to exceed 16 hours, this needs to be coordinated in advance with your supervisor and the Justification/Mitigation form completed to support the excessive hours prior to submitting for approval by the IC. It is your responsibility to comply with this direction and provide the appropriate documentation to your Supervisor and Finance.

Position Qualifications

Personnel shall only be assigned to positions for which they are qualified. Proof of qualifications shall be approved prior to being assigned to any fire line position. Non-fireline positions may be filled based on the word of the employee pending home unit confirmation, which must be requested immediately. Contract dozer operators, tactical water tender operators and contract fallers must provide proof that they have received the annual fire refresher training.

Engagement/Disengagement

The 10 Standard Orders & 18 Watchout Situations will be followed at all times and mitigated as needed. Staying aware of your situation is critical. This includes Geographic Area and incident briefings. Follow the Risk Management Process outlined in the Incident Response Pocket Guide.

Debriefing

All Branch Directors/Division/Group Supervisors will report to their Supervisor and Situation Unit at the end of the operational period for debriefing with emphasis on the accomplishment of objectives. All unit logs (ICS 214) will be turned in after the debriefing to Documentation reflecting accomplishment and/or special incidents that occurred during the operational period.

Crew Time Reports/Shift Tickets

It is your responsibility to ensure all time is properly accounted for and recorded each shift. The records are to be reviewed and signed by the next level supervisor. A finance “Rules of Engagement” document will be provided in the IAP explaining further requirements.

Guidelines for Firefighter Photography, Video, Social Media Use, and Media Engagement

Firefighters are expected to follow established rules for photography, video, social media, and media interviews. See the IRPG, pg. 103 for guidance - Fire information is everyone's job. Team 4 encourages respectful, accurate, and professional communication that:

- Protects the incident's reputation
- Prevents misinformation
- Complies with policy and law

Social Media:

Think before you post. Content from the line or base can reflect on the incident. Unauthorized or unprofessional posts may result in disciplinary action. **If the fire is under investigation**, do not share photos, video, or details. Doing so may compromise legal proceedings.

Media Interviews:

Only authorized personnel may speak to the media. If approached:

- Be polite
- Don't speculate
- Refer reporters to the **Public Information Officer (PIO)**

For questions or further guidance on media, contact your Public Information Officer.

THANK YOU FOR YOUR COOPERATION AND GOOD WORK!!

OTHER / NOTES:

FINANCE

2026.dome.finance@firenet.gov

Please submit your documents ELECTRONICALLY. However, we will accept hard copies.

ALL RESOURCES – When emailing, include your RO# in the subject line and on all documents. Provide a contact phone number with your email.

Daily submit the following:

- CTRs
- Shift Tickets

Ensure all CTR/Shift Tickets are signed and dated.

For FINAL CTR/ST submission, make a note in your email that attachments are final time projections.

At **check-in** submit the following:

- Resource Order
- Manifest/Roster
- Cooperator agreement or contract (w/ correct resource highlighted)
- AD Casual Hire Form
- Vehicle Inspection Form

Claims: For replacement of non-cache items, the requested resource will take a completed OF-213 and OF-289 to Finance for review. Requests for replacement of government-issued essential property brought from the home unit must be accompanied by a current copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until you are released to begin this process. Repairing or replacement of tires and chainsaws must be handled through the OF-289 process. For tires, be sure to include a picture of the numbers on the sidewall. Any property loss or damage claim submitted must be attributable to work on the incident, not normal wear and tear or normal road hazards.

DOME FIRE

Demobilization Message

Step number one is to stop by the DEMOB to begin the process.

Air Travel Request form can be found in the Linktree; it is a fillable form and can be sent to the email below. Air travel request forms are due **Seventy-Two (72)** Hours prior to your DEMOB Day.

2026.dome.demob@firenet.gov

On your DEMOB Day please see the DEMOB at your assigned time to get you started with your ICS-221, ensure all time documents are turned into finance in advance, anything checked out has been returned, and questions you have please don't hesitate to contact the DEMOB unit leader.

We will be working to establish a Demobilization process from both Badger Camp and ICP.

DOME FIRE — RESOURCE ADVISOR MESSAGE

YOU'RE WORKING IN YOSEMITE!

Sensitive Resource Flagging is blue/black + white. Look for messaging on the white flagging.

MAKE CAMP BORING TO BEARS

- Store food, trash, Gatorade, coolers, and scented items in bear-proof containers or keep within arm's reach.
- Speeding kills bears: please stay within the speed limit, especially in the Glacier Point and Sentinel Dome straight areas due to high bear activity and bears crossing roads.
- See a Bear? Report bear observations to the Save-A-Bear hotline at 209-372-0322.

MEADOWS = SENSITIVE HABITAT

Yosemite toads, Pacific fishers, and California spotted owls live here too.

- Watch your step in meadows, Yosemite toads live there and are easy to miss.

OBSIDIAN IS NOT JUST A ROCK

- Seven Tribes have called this place home for time immemorial.
- If you find obsidian, or other artifacts, leave it where it is. Contact a REAF.

WILDERNESS: USE MIST AND TALK WITH REAFS

- The Dome Fire is in designated Wilderness. Enjoy your public lands!

Tribal Liaison Message

7 Tribes have called Yosemite home since time immemorial

Their tribal history, culture, and service runs deep through these lands. Lands that we all have come to love and appreciate. Be good stewards and relatives to all the things of the land. The 7 Nations give thanks to all the warriors in every aspect of this operation and send prayers to the ones who gave it all.

The 7 Affiliated Tribal Nations:

Bishop Paiute Tribe - Bishop, CA

Bridgeport Indian Colony, Bridgeport, CA

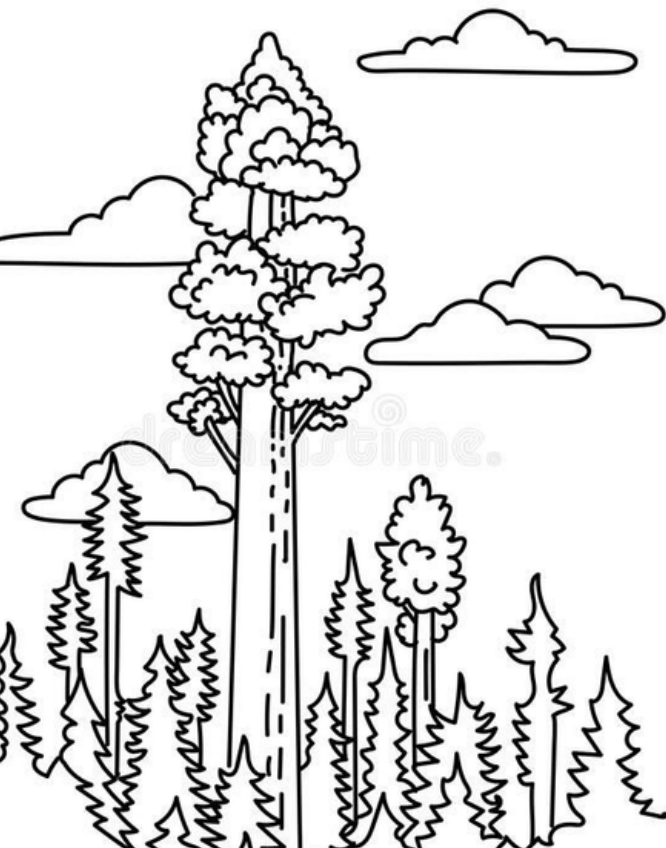

Mono Lake Kootzaduka'a Tribe of California and Nevada, Lee Vining, CA

North Fork Rancheria of Mono Indians of California, Northfork, CA

Picayune Rancheria of the Chukchansi Indians, Oakhurst, CA

Southern Sierra Miwuk Nation, Mariposa, CA

Tuolumne Band of Me-Wuk Indians, Tuolumne, CA

If there are any questions please reach out to tribal liaison:

Rosa-Lee Jimenez

Human Resource Message – CIIMT 4

Hello! The HRSP with CIIMT 4 Dome Fire, Tasha Lucas, will arrive on or about October 3, 2026. If you need to speak to someone in person, please contact Adam Alvarez, who is in the Liaison shop.

Our role is to assist in facilitating a positive work environment, mitigate workplace issues/concerns, and ensure an appropriate work environment is maintained. Our role serves as a channel through which individuals assigned to this fire can raise questions, discuss concerns, and get answers about any aspect of your work environment, be it practices, policies, operating procedures, facilities, or work conditions. Have a safe shift.

National Federation of Federal Employees (NFFE)

Dome Incident Peer Support

CONFIDENTIAL Peer Support, Counseling Appointments, and Resiliency Resources are available to all personnel.

Examples of stress can vary from person to person.

We offer many options to help deal with:

- grief
- everyday stress
- traumatic experiences
- professional crisis
- personal/family crisis
- other behavioral health impacts

Available at the Base Camp and 24/7 by phone or text:

916-440-3723

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic								
Medical Incident Report								
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.								
Use the following items to communicate situation to communications/dispatch.								
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>								
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>								
Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2o – 3o burns more than 4 palm sizes, heat stroke, disoriented.</i> ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2o – 3o burns not more than 1-3 palm sizes.</i> ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>							
Nature of Injury or Illness & Mechanism of Injury							Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>	
Transport Request							Air Ambulance / Short Haul/Hoist Ground Ambulance / Other	
Patient Location							Descriptive Location & Lat. / Long. (WGS84)	
Incident Name							Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>	
On-Scene Incident Commander							Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>	
Patient Care							Name of Care Provider <i>(Ex: EMT Smith)</i>	
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)								
Patient Assessment: See IRPG page 106								
Treatment:								
4. TRANSPORT PLAN:								
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)						Patient's ETA to Evacuation Location:		
Helispot / Extraction Site Size and Hazards:								
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:								
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>								
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable								
Function	Channel Name/Number		Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	Mode	Comments
COMMAND	CMD 1	1	170.1375	(T4) 136.5	165.5750	(T4) 136.5	A	NIFC SPECIAL MT BULLION
AIR-TO-GRND	A/G SEC	14	165.5000	0.0	165.5000	0.0	A	SLING LOAD OPS
TACTICAL	CALCORD	15	156.0750	(T6) 156.7	156.0750	(T6) 156.7	A	MEDICALS USING AIR
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.								
8. ADDITIONAL INFORMATION: Updates/Changes, etc.								
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
