INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: DOMESTIC FIRE	2. Operational Period: Date From: 10/16/2026 Time From: 0800 Date To: 10/20/2026 Time To: 1900																				
3. Objective(s): <u>Management Objectives</u> - Prioritize firefighter and public safety through risk analysis and hazard mitigation. - Minimize acres burned utilizing direct extinguishment tactics. - Utilize resources where they can be most successful and ensure tactics have a high probability of success. - Protect and minimize impacts to local communities, wilderness values, and cultural/natural resources. - Provide timely and accurate public information. - Complete suppression repair as outlined in the Suppression Repair Plan.																					
<u>Control Objectives</u> - Keep fire within the established containment.																					
<u>General Situational Awareness</u>																					
5. Site Safety Plan Required? Yes ☐ No ☒

Dome Fire Weather Forecast

10/16 – 10/20

DISCUSSION

...RED FLAG WARNING IN EFFECT UNTIL 10 PM PDT FRIDAY...

Clear, dry conditions will continue through the end of the week. Summer-like humidity values are expected due to strong easterly winds that will continue through Friday. Low minimum RH values between 15 and 20 percent with poor to moderate overnight recoveries will create elevated to critical fire weather conditions, allowing new fire development to spread rapidly and prolong the burning period well into the overnight hours. Winds will gradually subside through the weekend, becoming more diurnal. Humidities will gradually improve and temperatures cool after the weekend as a more robust system tracks into the region.

FRIDAY

Sky/weather	Sunny (0-5 percent).
Max temperature	67-69F.
Min humidity	16-20 percent.
Eye level winds	East 8-13 mph, shifting to the west 3-8 mph in the afternoon.
Wind (20 ft)	East 10-15 mph, shifting to the west 5-10 mph in the afternoon.
Mixing height	4900 ft AGL.
Transport winds	East 17-27 mph, shifting to the west 12-17 mph in the afternoon.

FRIDAY NIGHT

Sky/weather	Mostly clear (0-10 percent).
Min temperature	45-51F.
Max humidity	33-37 percent.
Eye level winds	Northeast 3-8 mph, shifting southeast 2-4 mph overnight.
Wind (20 ft)	Northeast 5-10 mph, shifting southeast 3-6 mph overnight.
Mixing height	300 ft AGL.
Transport winds	East 12-17 mph.

SATURDAY

Sky/weather	Sunny (0-5 percent).
Max temperature	62-64F.
Min humidity	21-25 percent.
Eye level winds	Northeast 3-8 mph, shifting to the west 2-4 mph overnight.
Wind (20 ft)	Northeast 5-10 mph, shifting to the west 5-10 mph in the afternoon.
Mixing height	7800 ft AGL.
Transport winds	Northeast 14-19 mph, shifting to the west 11-16 mph in the afternoon.

FORECAST DAYS 3 THROUGH 5

SUNDAY

Clear. Lows in the lower 40s. Highs in the low 60s. Northeast winds 5-10 mph, shifting to the west 5-10 mph in the afternoon.

MONDAY

Mostly clear. Lows in the lower 40s. Highs in the mid-50s. Southeast winds 5-10 mph, shifting to the southwest 10-20 mph in the afternoon.

TUESDAY

Colder. Mostly cloudy. 10-30 percent chance of precipitation. Snow level between 7,500-8,000 feet. Lows in the mid-30s. Highs in the lower 40s. Southeast winds around 5-15 mph, shifting to the south 5-15 mph in the afternoon.

3 DAY FIRE BEHAVIOR OUTLOOK

FORECAST NUMBER: 28- Final	TYPE OF FIRE: Wildfire
FIRE NAME: DOME	OPERATIONAL PERIOD: Oct 15 - Oct 17
DATE ISSUED: October 14, 2026	TIME ISSUED: 1700 PDT
UNIT: CA-YNP-000100 U.S WFS High Sierra Unit	SIGNED: /s/ Alex Giery FBAN /s/ Dan Lerma FBAN(t)
TOPOGRAPHY: Elevations: 6800'-8300' Slopes: (0°- 35°degrees)	

FIRE BEHAVIOR INPUTS

The values below represent head fire during peak conditions of forecast period

Fuel Type	Rate of Spread	Flame Length	Spotting Dist.	Fire Danger Indices	
...If your work area includes -	(CH/HR = FPM)	Feet	Miles	ERC	BI
Grass-Shrub	15-30 ch/h	3- 5'	.1 mi	44-45	22-30
Timber	10-15 ch/h	6'- 8'	.3 mi	53 (97th)	33 (97th)
Slash-Blowdown	25-35 ch/h	8'- 10'	.3 mi		

FIRE BEHAVIOR NARRATIVE

GENERAL

Over the coming days conditions will return to a mostly warm and dry pattern. Fuels that were saturated will begin to dry for the duration of this outlook. Short term moisture has not significantly changed the seasonally dry heavy fuel moisture. Heavy dead and down fuels burning inside the fire perimeter may not be fully extinguished. Therefore, they should be monitored as potential sources of spread as weather becomes warmer and drier. Trees that experienced fire up high, or at the base remain a concern along with hidden ash pits and stump holes sheltered from precipitation.

Yosemite High Elevation
Pocket Card

PIG Max probability of ignition is 40-50 percent.

SPOT May grow to 20 acres or more in one hour in the grass-shrub.

May grow to 5 acres or more in one hour in the timber.

May grow to 25 acres or more in one hour in the slash-blowdown.

SPECIFIC:

Interior Fuels: Interior islands may still have areas of smoldering fuels. Monitoring for spot fires should be maintained. Monitor PIG daily. Interior flare-ups and isolated single tree torching is a possibility.

Suppression Repair: Use caution when working around fire weakened trees and on hillsides where rolling material may have been dislodged. Watch for ash pits and stump holes as these will continue to hold heat for an extensive amount of time.

Initial Attack: New ignitions in heavier seasonally stressed fuels will have lower spread potential but still have a high resistance to control as heavy dead and down will burn actively absent a large increase in timely seasonal moisture.

Reassessment Criteria: Increase in fire activity above forecast outputs or marked change in forecasted weather.

Long term outlook: Beyond this forecast wetter weather with accompanying precipitation is possible which further reduce instance of heavy fuels smoldering and further aid in suppression.

AIR OPERATIONS:

Generally favorable conditions across region. Daily overnight inversions may form and hamper visibility in the morning hours. Changing weather pattern over weekend should be monitored for changes related to aviation operations.

SAFETY:

Post Lookouts – Maintain Communications – Identify Escape Routes – Have Safety Zones

Dome Fire - Safety Message

INCIDENT# CA-YNP-000100

DATE: 10/16-20/2026

TIME: 0800-1900 12 Hour Shift

Situational Awareness

- Maintain lookouts and communications to ensure critical information is shared.
- Speak up when something doesn't look right. Everyone has a responsibility to identify hazards and communicate risks.
- Distracted driving is a major factor in vehicle collisions. Stay aware of what is going ahead, behind, and both sides of your vehicle.
- Be aware of changing weather conditions. Obtain current weather forecasts and recognize indicators of change.

Medical Emergencies

Review your **ICS 206 WF** medical plan at the beginning of each shift.

Understand the **8-Line Medical Protocol** and practice with all crew members.

Maintain the appropriate quantity of medical resources to support line personnel.

Always have a primary and secondary medical extrication plan.

Suppression Repair

- Evaluate areas for hazard trees and locate and avoid stump holes.
- Snags continue to be a hazard; look up when working in the proximity of trees.
- Ash pits, trees, and brush can have extensive root systems.
- Follow suppression repair plan. Do not expose yourself to unnecessary risk.
- Slips, trips, and falls. Watch your footing; probe the ground if necessary.
- Steep terrain and rolling debris. Maintain 10-20 feet of spacing.
- Monitor fatigue; shorten shifts when appropriate.
- Wildlife is abundant in the area. Do not keep food, drink, or scented items in the tent or open truck beds.

Air & Ground Resources

- Air Resources conduct thorough mission assessments before starting work.
- Follow "Aviation Watch-Out Situations" (IRPG p.62). Complete the Go/No-Go checklist.
- Do not plan on air resources for tactical or medical support.
- Road conditions vary frequently due to the weather. Rain, snow, and icy conditions are possible. Stopping distances can double or triple in these conditions.
- Distracted civilian drivers near the operational area. Practice situational awareness.
- Slow down; watch out for people and wildlife near the roadway.

Prepared by:

CIIMT 4 Safety Group

INCIDENT RISK ANALYSIS
ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	AVIATION OPERATIONS	- Follow "Aviation Watch-Out Situations" (IRPG p.62). - Do not plan on air resources for tactical support or medical transportation. - Refer to IRPG p.74 for directing bucket drops. - Ensure positive communication with air resources. - Do not stand under water drops and watch for tree hazards after a drop. - Conduct thorough mission assessments before starting work. Follow the guidelines in the NSHO and other aviation guidelines and reference materials. - Ensure coordination and communication are in place and understood by all the resources involved in a mission. - Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.
ALL	HAZARD/DANGER TREES	- Follow Hazard Tree Safety Guidelines (IRPG pg.20.) - Limit the number of personnel around snags and their exposure time. - Fallers must be qualified for the trees being felled. - Be alert around hazard trees during wind events, even green trees. - The hazard zone extends a minimum of 2½ tree lengths. - Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	WEATHER	- Be aware of changing weather conditions. - Watch out for increasing winds. With high winds comes an increased risk of trees falling. Post lookouts when appropriate. - Communicate any observed changes in weather and fire behavior.
ALL	WORKING IN FLUCTUATING TEMPERATURES	- Minimize intake of caffeine products. - Ensure that you're drinking a good amount of water. - Take time to properly stretch your muscles prior to asking them to perform. - Start out slowly and work your way up to a normal pace. - Dress in layers so you can remove your clothing as the shift & you warm up.
ALL	COLD STRESS	- Keep extra clothing handy if you get wet and need to change. - Drink warm, sweetened fluids. - Avoid touching cold metal or wet surfaces with bare skin. - Use proper engineering controls, safe work practices, and protective equipment.
ALL	DRIVING/CIVILIAN TRAFFIC	- When driving keep speed at or below the posted speed limit and your headlights on. - During shift change keep your speed at or below the posted speed limit. - Watch for and anticipate civilian traffic, Glacier Point Road is now open. - Always fasten your seat belt before the vehicle is set into motion. - Slow down, slow down, slow down.
ALL	SUPPRESSION REPAIR	- Evaluate areas for hazard trees and locate stump holes for avoidance. - Monitor fatigue; shorten shifts to increase rest where appropriate. - Review and follow "Look Up, Look Down, Look Around" procedures. - Evaluate mop-up distances against what is safe and necessary.
ALL	FATIGUE AND COMPLACENCY	- Be alert, monitor all resources for fatigue, take breaks, and hydrate as necessary. - Maintain a 2:1 work-to-rest ratio. - Repeated assignments in the same area can lead to complacency, making personnel more vulnerable to accidents. - Take steps to maintain situational awareness for the duration of the incident. - Take tactical pauses as practical and feasible.
ALL	TRANSITIONS	- Ensure you and all your resources are familiar with any communication changes that may have occurred during the team transition. - Make sure all resources understand the updated chain of command and leadership structure. - Obtain appropriate maps for work areas. - Inquire about any new hazards that may be present in new work areas. - Determine estimated travel times to new areas and keep accountability of resources to and from ICP.
ALL	WILDLIFE	- High concentration of wildlife in the area. - Use bear-resistant garbage cans. Do not keep food, drink, or scented toiletries in the tent. - Numerous bees have been seen in the area. Anticipate them in dirt. - Never approach wild animals even if they seem calm. - Back away slowly if an animal approaches.
ALL	CAMP CRUD	- See the Medical Unit at the onset of symptoms. - Take vitamins, drink lots of water and juice. - Follow good hygiene practices – wash hands frequently; before eating and after restroom use. - Get as much rest as possible, stay hydrated and eat healthy foods.

DOMESTIC FIRE — RESOURCE ADVISOR MESSAGE

YOU'RE WORKING IN YOSEMITE!

Sensitive Resource Flagging is blue/black + white. Look for messaging on the white flagging.

MAKE CAMP BORING TO BEARS

- Store food, trash, Gatorade, coolers, and scented items in bear-proof containers or keep within arm's reach.
- Speeding kills bears: please stay within the speed limit, especially in the Glacier Point and Sentinel Dome straight areas due to high bear activity and bears crossing roads.
- See a Bear? Report bear observations to the Save-A-Bear hotline at 209-372-0322.

MEADOWS = SENSITIVE HABITAT

Yosemite toads, Pacific fishers, and California spotted owls live here too.

- Watch your step in meadows, Yosemite toads live there and are easy to miss.

OBSIDIAN IS NOT JUST A ROCK

- Seven Tribes have called this place home for time immemorial.
- If you find obsidian, or other artifacts, leave it where it is. Contact a REAF.

WILDERNESS: USE MIST AND TALK WITH REAFS

- The Dome Fire is in designated Wilderness. Enjoy your public lands!

FINANCE

2026.dome.finance@firenet.gov

Please submit your documents ELECTRONICALLY. However, we will accept hard copies.

ALL RESOURCES – When emailing, **include your RO# in the subject line** and on all documents. Provide a contact phone number with your email.

Daily submit the following:

- CTRs
- Shift Tickets

Ensure all CTR/Shift Tickets are signed and dated.

For FINAL CTR/ST submission, make a note in your email that attachments are final time projections.

At **check-in** submit the following:

- Resource Order
- Manifest/Roster
- Cooperator agreement or contract (w/ correct resource highlighted)
- AD Casual Hire Form
- Vehicle Inspection Form

Claims: For replacement of non-cache items, the requested resource will take a completed OF-213 and OF-289 to Finance for review. Requests for replacement of government-issued essential property brought from the home unit must be accompanied by a current copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided, a determination for replacement will be made by the FSC/INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until you are released to begin this process.

TRIBAL LIAISON MESSAGE

Reciprocity in Action: Being a Responsible Guest on Ancestral Territory

As firefighters, you are often guests on the ancestral homelands of Tribal Nations who have stewarded these landscapes since time immemorial. Being a responsible guest means working with humility, honoring cultural values, and showing respect for sacred sites, traditional foods, gathering areas, and living cultural practices. When in the field, please remain aware of culturally sensitive locations, follow guidance from Tribal representatives, and approach the land with care and intention. Your respect and mindfulness help strengthen trust, support cultural resilience, and uphold our shared responsibility to protect both people and place.

Always remember that you are visiting Tribal ancestral homelands, everywhere you go in the United States. Show respect for the land itself, avoiding littering and respect natural resources.

Did You Know?

Between 1851 and 1852, California Tribal leaders negotiated 18 treaties with the United States that promised land, resources, and protection for their communities.

Although these agreements represented good-faith efforts by Tribal Nations to secure their homelands and futures, the U.S. Senate refused to ratify them, keeping them hidden from the public for over 50 years. This denial left Tribes landless and without the promised support, shaping generations of inequity.

Today, understanding the unratified treaties is essential to recognizing Tribal sovereignty, honoring California Native history, and supporting ongoing efforts toward justice and restoration.

Friendly Reminder

Being a guest on Tribal homelands means treating all cultural resources with respect and care. **Please do not move or remove artifacts, features, or any items you encounter**, as they are part of a living cultural landscape that holds deep significance for Tribal communities.

Notify a Resource Advisor so it can be appropriately documented and protected.

**If there are any questions
please reach out to the
Tribal Liaison:**

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE

"MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2o – 3o burns more than 4 palm sizes, heat stroke, disoriented. ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2o – 3o burns not more than 1-3 palm sizes. ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)

Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number		Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	Mode	Comments
COMMAND	YNP FIR1	1	172.7750	0.0	166.3625	(T2) 123.0	A	FIRE REPEAT SIGNAL
AIR-TO-GRND	A/G SEC	14	165.5000	0.0	165.5000	0.0	A	INCIDENT AIR TO GROUND
TACTICAL	CALCORD	15	156.0750	(T6) 156.7	156.0750	(T6) 156.7	A	MEDICALS USING AIR

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
