INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: TIMBER	2. Operational Period: Date From: 10/10/2026 Time From: 0700 Date To: 10/10/2026 Time To: 2000																				
3. Objective(s):																					
<u>Management Objectives:</u> - Manage risk to the public and incident personnel by ensuring hazards are identified, assessed, and mitigated to the degree possible - To the extent possible, protect values at risk including communities, critical infrastructure, watersheds, wilderness, critical wildlife habitat, and natural and cultural resources - Maintain and strengthen relationships with local communities, cooperators, and the public by providing timely and accurate information - The IMT will support initial attack responses as possible for new fire ignitions - Maintain a supportive, positive, and harassment-free work environment in which people are treated with respect and dignity. Uphold a "No Tolerance" atmosphere for illegal drug use and alcohol - Effectively manage incident costs through the selection and implementation of strategies and tactics that have a high probability of success in meeting objectives																					
<u>Timber Control Objectives</u> - Keep the fire north of Rodeo Flats to prevent progression into the Ventana Wilderness - Keep the fire south of Carmel Valley Rd. to prevent impacts to State Direct Protection Area lands - Keep the fire east of Highway 1 to protect coastal corridor critical infrastructure - Keep the fire west of Arroyo Seco to protect infrastructure in communities and agriculture lands																					
<u>General Situational Awareness</u>

Timber Weather Forecast

FORECAST NO: 43
PREDICTION FOR: 0700-2000
SHIFT DATE: 10/10/26
FORECAST ISSUED: 10/09/26 @1800

NAME OF FIRE: Timber
UNIT: Los Padres NF
SIGNED: Ryan Walbrun
Incident Meteorologist

WEATHER DISCUSSION: The cooling trend will continue today with a deep marine layer covering much of the fire area with low clouds this morning after a night of excellent humidity recovery. There may be some areas of drizzle this morning with clouds slowly clearing back to the coast. High temperatures will be much cooler today with afternoon highs only in the 60s. RH values will only lower to around 35%. General winds will be from the Southwest with afternoon gusts 15-20 mph. Cool with good humidity recovery tonight into Sunday morning. Winds turning more southerly on Sunday with continued cool temperatures and then a chance of some light rain Sunday night into early Monday.

SATURDAY'S WEATHER FORECAST:

WEATHER: Mostly cloudy with morning drizzle then partly cloudy.

TEMPERATURES: Max: 58-68...as much as 8-12 degrees cooler than yesterday.
Min: 46-56...as much as 5-10 degrees cooler than yesterday.

HUMIDITY: Min: 35-45%
Max: 60-90% recovery over most of the fire by Sunday am.

20 FT WINDS:

RIDGETOP - Northwest 5-10 MPH Gust 15-20 MPH late in the day

SLOPE/VALLEY - 0700-1000: Variable/upslope 2-5 MPH Gust 6-8 MPH
1000-2000: Upvalley 6-9 MPH Gust 15-20 MPH
2000-0700: Northwest 4- 8 mph.

MARINE INVERSION: 2500-3000 feet ASL (deepening Saturday Night)

Sunday through Monday: A cooling trend back to around 65 for daytime highs. Lows around 50. Much better RH recovery with daytime values 35-45% and nighttime recovery around 80%. Southwest and breezy onshore winds each day sustained 6-12 mph with gusts 15-20 mph. A slight chance of light rain Sunday night into Monday with 0.10-.20 possible

Local weather observations available:

6. Work Assignments:										
Complete tactical suppression repair across assigned areas to mitigate erosion risks, rehabilitate displaced soil/vegetation, restore natural drainage patterns, and prevent post-fire watershed degradation before autumn rains.										
All operations must strictly follow CALFIRE / USFS Suppression Repair Plan standards and READ (Resource Advisor) field guidance.										
Continue fire suppression and repair with REAFs on North Coast Road between DP8 and DP25.										
7. Special Instructions:										
Maintain appropriate spacing and reduced speeds along the Highway 1 corridor to ensure safe operations in areas open to public traffic.										
Continue collaboration with READs & FSRS to ensure effective and appropriate use of resources and continuity with the approved repair plan.										
Coordinate with Cal Fire regarding suppression repair efforts on private land.										
Ensure communication with Caltrans representative when moving heavy equipment across Rocky Creek Bridge.										
8. Communications

6. Work Assignments:
 Complete tactical suppression repair across assigned areas to mitigate erosion risks, rehabilitate displaced soil/vegetation, restore natural drainage patterns, and prevent post-fire watershed degradation before autumn rains.
 All operations must strictly follow CALFIRE / USFS Suppression Repair Plan standards and READ (Resource Advisor) field guidance.
 Continue fire suppression and repair with REAFs on North Coast Road between DP8 and DP25.

7. Special Instructions:
 Maintain appropriate spacing and reduced speeds along the Highway 1 corridor to ensure safe operations in areas open to public traffic.
 Continue collaboration with READs & FSRS to ensure effective and appropriate use of resources and continuity with the approved repair plan.
 Coordinate with Cal Fire regarding suppression repair efforts on private land.
 Ensure communication with Caltrans representative when moving heavy equipment across Rocky Creek Bridge.

SAFETY MESSAGE:

Firefighters are highly motivated and have a “can do” attitude.
We thrive in difficult environments and see problems as challenges to solve.

- *This is a cool statement but how prepared are you for today's Mission?*
- *Do you have the skill set?*
- *Do you have the experience?*
- *Do you have the proper PPE?*

Adjusting Vulnerability and Exposure

- Use safety equipment
- Improve skills and training
- Carefully plan the route

Choosing safer terrain and conditions helps minimize exposure to hazards.

- Have backup plans and supplies

Carrying extra food, water, gear provides a safety net if issues arise.

- Know when to turn around

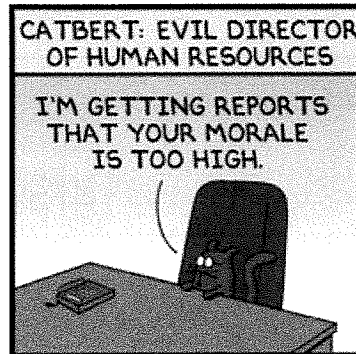

Recognizing one's limits and being willing to retreat reduces risks.

Human Resources Message Timber Fire

Morale Boosters

Morale in wildland firefighting thrives when leaders actively support both the mission and the people, ensuring that the crew feels valued, respected, and connected despite the harsh realities of the job. Practical morale-boosting actions include:

- **Acknowledging effort and achievements** publicly and privately, even in small wins.
- **Ensuring fair work/rest balance** where possible, and protecting rest periods to reduce fatigue.
- **Providing mental health resources** and encouraging open communication about stress and coping strategies.
- **Incorporating light relief**—such as music, humor, or short breaks—to counteract the monotony and strain of long shifts.

Summary of Fire Suppression Damage Repair Plan Guidelines

Coordinate suppression repair and inspections with incident Resource Advisor's (READs), who will provide guidance in accordance with the Timber Fire Suppression Damage Repair Plans

Objectives – The main objectives of fire suppression repair are:

- Minimize the potential for soil erosion and sedimentation in stream channels and restore pre-fire drainage.
- Reduce the visual impacts of fire line as well as other suppression operations.
- Repair roads, trails, drainage structures and other infrastructure damaged by fire suppression activities to a functioning state.
- Repair fireline and suppression areas within long-term fuelbreaks.
- Protect natural and cultural resources, including designated wilderness, from additional potential damage.

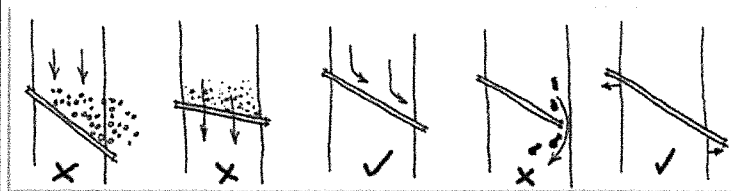

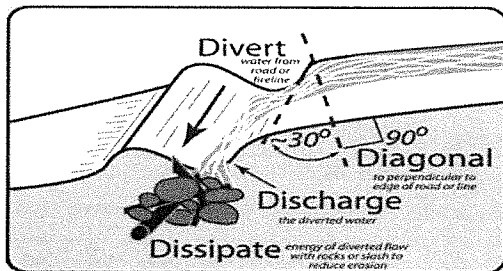

Critical Guidelines

- **Sensitive Sites** are marked with Orange and White striped flagging. Avoid impacting these areas.
- **Back-haul** all trash and flagging no longer needed for operations.
- **On Firelines**, **waterbars** should be installed as described below, fire line covered with slash (unless within a long-term fuelbreak – identified in field maps; chip or masticate instead), and entrances blocked.

Fire line Gradient (% slope)	Distance Between Waterbars (feet)	Think 5-D System	
0 to 9	200-300	Distance	Reduce the distance water can run in a straight line
10 to 14	150	Diagonal	Don't bully the flow, lead it away
15 to 20	90	Divert	Move the water off the fireline
21 to 40	50	Discharge	A good water bar is not a dam – must have open outlet.
Over 40	25	Dissipate	Water should spread out from outlet like a shower not a fire hose.

- These are guidelines and are not intended to restrict the implementation of more or less water bars if the need or lack of need is justified.

Depth and Width: Waterbars need to be cut into surface, do not simply push up soil. They should be deep enough to redirect the water from expected rain to area.

Helispots, Safety Zones, and Staging Areas: Repair to standards similar to fire line repair. Spread out berms, push piles, and cleared vegetative material and slash for soil cover. Waterbars where appropriate.

Water Drafting Sites and Watercourses: Water sources developed as a water draft site are to be restored to a condition resembling pre fire use. Remove any dams, dikes, or other impoundments that were created for fire suppression activities. Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing.

See Repair Plan for guidance on Wilderness, trails, handline, roadsides, developed recreation areas, fences/gates.

DEMOBILIZATION PROCESS

Timber

For Flight Requests 903-931-2918

If you need a flight arranged for you, please come by the Demob trailer and complete flight request form. Please submit your information at least 72 hours in advance of your flight to ensure your request is processed in a timely manner.

- **Please do not leave the incident until the following steps have been completed!**
- **On your demob date, drop by the Demob Unit to pick up your Demobilization Checkout Sheet (ICS-221). Before returning any accountable equipment or supplies, and obtaining vehicle inspection done (if required) before starting the process.**
- **Ensure that all CTRs and/or shift tickets have been submitted to Finance.**

IF YOU NEED TO DEMOB PRIOR TO THE END OF YOUR 14-DAY ASSIGNMENT:
72 hours prior to the demobilization date, please ensure that: Your incident supervisor has submitted a Demob Request, in coordination with the Demob unit.

Time/Finance - Review and finalize your time and obtain your OF-288 Time report or OF-286 invoice.

Demob - Once you have completed the above steps, return your checkout form to the Demob Unit so you can be released in IROC.

Notice of Right to Representation

As a bargaining unit employee represented by a labor organization, you have the right to request representation from your certified labor organization at any investigative examination/interview where you reasonably believe the examination might result in disciplinary action being taken against you. You may make this request at any time prior to or during the interview. If you request union representation, your agency may opt to: (1) suspend questioning and grant your request then resume the interview; (2) discontinue the interview; or (3) offer you the choice to proceed with the interview without a Union representative or to forego the interview.

Clarification about the Above Notice

If a management representative wants to question you (a bargaining unit employee) about an allegation that you were involved in some occurrence that could result in a proposal to discipline you, Union believes it is in your interest to have a Union representative present when you are questioned. ***You have to invoke that right by asking for representation. Management is not obligated to inform you of this right, and they are not obligated to automatically arrange for a Union representative to be present.*** In the event that you request representation, and a Union representative has not been dispatched to the incident, contact will be made with the Union representative listed above, and arrangements will be made for that representative or his designee to come out on site, or to meet with you by telephone.

TIMBER FIRE FINANCE SECTION

Please submit your documents ELECTRONICALLY.

If you are completing CTRs/Shift Tickets on paper, you can take a picture, save it as a **PDF** and then email it. **DO NOT SEND JPEGs**

ALL RESOURCES – When emailing, please include your RO# in the subject line. Provide a contact phone number with your email.

<u>Timber Contract Resources</u> Send To: 2026.timber.finance@firenet.gov Subject: Include Key Words i.e. – Equipment, Shift Ticket RO - ##	<u>Timber Overhead and Crews</u> Send To: 2026.timber.finance@firenet.gov Subject: Include Key Words i.e. – Time, CTR RO ##
<u>Documents to Email to FINANCE</u> @ Check-In – Crew Manifest/Roster, Cooperative Agreement or Contract, AD Casual Hire, Resource Order, Pre-Inspections	

- * **Hazard pay is required to be justified in the remarks, such as: “Fighting fire on an uncontrolled fire line.”**

Contractor Resources – if you have been here 14 days or more and would like an interim payment, send a request to the finance email

Contract Crews – Crew Boss time starts at briefing. Contract crew member times start ½ hour later. Meal breaks need to be shown and time stops at arrival back at ICP, base or spike camp.

Fire Replacement – For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to Finance (COMP) for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a current copy of a signed JHA or RA (IBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the INA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please **do not wait until demob** to begin this process.

Line IWI Process

In the event of a **yellow** or **red** injury/medical, an **IWI IC** will **take charge**, contact group supervisor, and **radio Timber Communications** on command to request emergency response.

Group supervisor will **contact fireline medical resources** to respond to the scene.

Complete 8-Line MIR to ensure treatment and evacuation needs are sufficient and relay to Dispatch. **DO NOT DELAY CALLING FOR HELP.**

For **green** medicals, **notify line supervisor** and pass along info to MEDLs. **Radio Communications** to report any IWI which requires outside resources. **Do not hesitate to escalate.**

ICP/Camp IWI Process

Report to medical support yurt at Haystack, (Frontline)at Pfeiffer. If no one is available, use team phone list to report or **call 911** if appropriate.

For resources in hotels, **call 911** and notify Safety/MEDL.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Evacuation Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. (WGS84)		
Incident Name			Geographic Name + Medical <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG PAGE 108					
Treatment:					
4. EVACUATION PLAN: Evacuation Location (if different): <i>(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)</i> Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: <i>Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: <u>Considerations:</u> If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
