INCIDENT OBJECTIVES (ICS 202)

Incident Name: Rock Canyon	Operational Period: Date From: 8/11/26 Date To: 8/11/26 Time From: 0600 Time To: 2000												
Management Objectives: 1) Provide for firefighter and public safety over all other incident objectives and requirements. All operational strategies and tactics should consider associated risk to firefighter/public safety and utilize the options that have the highest probability for success combined with the lowest amount of exposure. 2) Protect values at risk, including private homes, infrastructure, and critical wildlife/grazing lands, and important watersheds. 3) Utilize public information officers to communicate clearly and timely with elected officials, stakeholders, local communities, and members of the public on current fire situation.													
Control Objectives: • Ensure LCES is in place prior to engagement. • Utilize aircraft to prevent fire spread and secure the line. • Construct line using natural barriers whenever possible. • Look for indirect firing opportunities. • Conduct burnout operations if conditions allow.													
General Situational Awareness ○ Watch for local traffic on narrow roads through the communities. ○ Maintain situational awareness on steep rocky slopes with rolling rocks. ○ Watch for rattlesnakes and wasps. ○ Ensure proper hydration with frequent breaks and regular fluid intake.													
Site Safety Plan Required? Yes ☐ No ☐ Approved Site Safety Plans located at:

Spot Forecast for Rocky Canyon...NUIFC

National Weather Service Salt Lake City UT

554 PM MDT Mon Aug 10 2026

.DISCUSSION...Northwest winds will continue to impact the wildfire, strongest on exposed ridgelines through 2000-2100. Showers and thunderstorms far to the west may produce an outflow boundary that shifts winds to the southwest around 2000 with gusts up to 30 mph.

For the planning portion of the forecast...

South to southwest winds, strongest on exposed ridgelines will shift to the northwest after 1000-1100. Winds will remain strongest on exposed ridgelines. Outflow winds may impact the wildfire after 1500, bringing stronger gusts up to 30 mph. Humidities will trend slightly higher, however any showers or thunderstorms will be isolated with minimal threat of rain Tuesday. Winds will shift back to the south to southwest around 2000...with the threat of outflow winds from distant showers and thunderstorms continuing through 2200.

.TUESDAY...

Sky/weather.....Partly cloudy (45-55 percent cloud cover).

CWR.....0 percent.

Chance of pcpn.....10 percent.

Chance of lightning.5 percent.

Max temperature.....Around 90.

Min humidity.....23-25 percent. Wind (20 ft).....South to southwest 5-15 mph shifting west to northwest 5-15 mph, except 10-20 mph on exposed ridgelines after 1000-1100. Wind gusts to 30 mph, especially along exposed ridgelines after 1100. Gusty and erratic winds from outflow may push through the fire after 1500.

Mixing height.....11300 ft AGL (80-90th Percentile).

Transport winds.....West 9 to 13 mph.

.TUESDAY NIGHT...

Sky/weather.....Partly cloudy (60-70 percent cloud cover) then becoming mostly cloudy (75-85 percent cloud cover).

CWR.....0 percent.

Chance of pcpn.....10 percent.

Chance of lightning.8 percent.

Min temperature.....56-59.

Max humidity.....73-76 percent.

Wind (20 ft).....West to northwest 5-15 mph, 10-20 mph on exposed ridgelines, shifting to south to southwest after 2000. Gusty and erratic winds from outflow may push through the fire through 2200.

Mixing height.....400 ft AGL.

Transport winds.....West around 12 mph becoming south overnight.

.WEDNESDAY...

Sky/weather.....Mostly cloudy (85-95 percent cloud cover) then becoming partly cloudy (55-65 percent cloud cover). Scattered showers and thunderstorms.

CWR.....15 percent.

Chance of pcpn.....50 percent.

Chance of lightning.30 percent.

Max temperature.....81-84.

Min humidity.....36-39 percent.

Wind (20 ft).....South to southwest 5-15 mph shifting west to northwest 5-15 mph, except 10-20 mph on exposed ridgelines after 1000-1100. Wind gusts to 30 mph, especially along exposed ridgelines after 1100. Gusty and erratic winds from outflow may push through the fire after 1200.

Mixing height.....8300 ft AGL (50-60th Percentile).

Transport winds.....East around 10 mph.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

MAJOR HAZARDS AND RISKS

- | | |
|--|---|
| <ul style="list-style-type: none">• Dehydration—Drink lots of water• Long range spotting? Ensure LCES are in place• Heavy fuel loads• Urban interface hazards• Snag!!! Hazard Trees!!! | <ul style="list-style-type: none">• Driving-- Lights on, seatbelts, drive defensively, use chock blocks. Watch wildlife on roads.• Rocky, rough terrain-falls/slips• Heavy Recreational Traffic |
|--|---|

THINK-----SAFETY-----FIRST
Recognize Potential Hazards Ahead of Time

Stop, Think, Talk Then ACT

Maintain Situational Awareness

Remember that it is your life that is on the line. You have the right to voice your opinion and concerns about personal safety. Don't hesitate to speak up if you feel uncomfortable with the situation or the circumstance in which you are. Firefighting is inherently hazardous. Discuss your concerns with your immediate supervisor or with a Safety Officer. We are in this together and we are all our own Safety Officer!

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

- | |
|--|
| <ul style="list-style-type: none">• Most incidents happen on smaller fires or isolated portions of larger fires.• Fires respond quickly to shifts in wind direction or wind speed.• Flare-ups generally occur in deceptively light fuels.• Fires run uphill surprisingly fast in chimneys, gullies, and on steep slopes.• Helicopters and air tankers can adversely affect fire behavior. The blasts of air from low flying helicopters and air tankers have been known to cause flare-ups and cause weak trees to fall. |
|--|

Safety Officer Dave Marsella

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications: Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ RED/PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> ☐ YELLOW/PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> ☐ GREEN/PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (<i>Ex: Unconscious, Struck by Falling Tree</i>)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (<i>Ex: Trout Meadow Medical</i>)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (<i>Ex: TFLD Jones</i>)
Patient Care		Name of Care Provider (<i>Ex: EMT Smith</i>)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG Page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. /Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
