

Cherry Peak Fire

INCIDENT ACTION PLAN

8/26/2026

Operational Period 0600-2100

Lolo National Forest, Region 1

P1SX9J26 (0116)

SABHRS: 906492

MT-LNF-260379

INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared
	Cherry Peak	8/25/2026	1600
4. Operational Period			
August 26, 2026		DAY SHIFT 0600 - 2100	
5. Leader's Intent			
Success is defined as prioritizing responder and public safety while minimizing impacts/threats to identified values at risk. All incident actions must reflect a commitment to aviation, responder, and public safety. Use the risk management process outlined in the IRPG, adhere to the 10 Standard Firefighting Orders, and mitigate the 18 Situations That Shout Watch Out and LCES. If a tactical hazard cannot be mitigated to an acceptable level of risk, do not proceed until mitigation is in place.			
6. Incident Objectives			
1. On the Cherry Peak Fire, execute a full suppression strategy utilizing direct and indirect tactics to minimize impacts to values at risk and firefighter exposure. 2. Prevent or minimize fire impacts to these prioritized values: private residences and property in the Cherry Creek drainage, Private and Federal timber sales, and the Eddy Mountain Lookout. 3. Provide Initial Attack within the TFR (Temporary Flight Restriction). 4. Consider operational strategies and tactics that minimize smoke impacts to communities and private landowners.

Safety Message

OPERATIONAL TEMPO

The speed and intensity of our actions relative to the speed and intensity of unfolding events in the operational environment. Within the context, fire leaders plan, prepare, and execute operations proactively, rather than continuously being forced to react to the environment.

Successfully maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It is also about knowing when operations should slow down and why.

We are most vulnerable to accidents and errors when the operational tempo is changing, especially when it changes quickly. Maintaining good situational awareness despite change in operational tempo represents a considerable challenge.

The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary planning and resource adjustments.

“Every day, you may make progress. Every step may be fruitful.”

Winston Churchill

Fire Weather Forecast

August 26, 2026

DISCUSSION

Partly cloudy conditions in the morning will become mostly cloudy in the afternoon, with isolated showers and thunderstorms developing between 1300-1800. Gusty and erratic winds are expected around 30-35 mph during that time. No wetting rains are expected with the activity, though occasional lightning is expected. Thursday, the ridge begins to weaken resulting in an increase in southwest winds of 7-12 mph, with gusts around 25 mph.

WEDNESDAY

Sky/Weather: Partly cloudy. Slight chance of showers and thunderstorms in the afternoon.

CWR (> 0.10 Inch): Less than 10 percent.

Chance Lightning: 15 percent.

Maximum Temperature: 77-82.

Minimum Humidity: 17-22 percent.

Wind (20 ft): South 8-12 mph, with gusts 15-20 mph in the afternoon. Strong gusts expected in and around convection.

Mixing Height: 2500 ft agl increasing to 10500 ft agl.

Mixing Winds: South 10 mph.

Precipitation Amount: 0.00 inches.

WEDNESDAY NIGHT

Sky/Weather: Partly cloudy. Chance of rain in the evening.

CWR (> 0.10 Inch): Less than 10 percent.

Chance Lightning: Up to 10 percent.

Minimum Temperature: 57-62.

Maximum Humidity: 38-43 percent.

Wind (20 ft): Southwest around 5 mph.

Mixing Height: 7000 ft agl decreasing to 500 ft agl.

Mixing Winds: West 5 mph.

Precipitation Amount: 0.00 inches.

THURSDAY

Sky/Weather: Partly cloudy.

CWR (> 0.10 Inch): 0 percent.

Chance Lightning: 10 percent.

Maximum Temperature: 71-76.

Minimum Humidity: 28-33 percent.

Wind (20 ft): Variable 2-5 mph becoming southwest 7-12 mph with gusts 20-25 mph in the afternoon.

Mixing Height: 2000 ft agl increasing to 8500 ft agl.

Mixing Winds: Southwest 15 mph.

Precipitation Amount: 0.00 inches.

DIVISION ASSIGNMENT LIST			Branch		Division/Group				
Incident Name					Alpha/Zulu				
Cherry Peak			Operational Period						
			Date 08/26/2026		Time 0600-2100				
Operations Personnel									
Safety Officer				Line Operations		Daniel Stevens 406-370-7018			
Branch				Planning Operations					
Division / Group Supervisor		Cole Benson 406-552-2193		Strategic Operations					
Work Assignments									
Strategic Action 1:									
Task: Fortify all containment lines. Continue mopping up and securing the perimeter.									
Purpose: To hold fire in its current footprint and limit any fire growth to the South/West.									
End State: Fire perimeter is secure. Risk exposure to line personnel mitigated and minimized to the greatest extent possible.

Finance Message

All resources will submit **Digital** CTRs & Shift Tickets. Time documents should be emailed daily to the finance inbox listed below.

Incident Finance email: 2026.cherrypeak.finance@firenet.gov

Helpful Hints for Success!

- Hazard Pay – "H = Hazard Pay" is not a sufficient justification for hazard pay. Please elaborate in the remarks. (Ex. Hazard pay for working on an uncontrolled fireline.)

Shift Ticket/CTR Checklist:

- Signatures – Ensure your CTR is signed by your Incident Supervisor prior to digital submission.
- Resource Order # – Please make sure you list your resource order number in the upper right-hand box of your CTR.

Whitebark Pine – A Living Legacy

- Whitebark pine is a five-needle white pine. It's a slow-growing, long-lived tree with a life span of up to **500 years** and **sometimes more than 1,000 years**. The oldest known white bark pine is located nearby in Idaho and identified to be 1,294 years old!
- Found in upper and subalpine ecosystems, whitebark pine is a foundation species, and it's in trouble. Whitebark pine is currently listed as a threatened species under the Endangered Species Act.
- As a foundation species, they help create suitable habitat for other species. They are valued for protecting watersheds and act as snow fences to hold moisture later in the spring, gradually releasing water into stream systems. Their deep roots stabilize rocky and poorly developed soils.
- This tree is in danger of functional extinction due to the introduced white pine blister rust, bark beetle attack, and encroachment of shade-tolerant conifers.

"And see this ring right here, Jimmy? ... That's another time when the old fellow miraculously survived some big forest fire."

These trees can easily be damaged when we fight fire because they often grow in the same location we build fireline and helispots. It is very important that we do what we can to protect the remaining whitebark pine in these areas. Help by identifying them and not cutting this species. Ask your local REAF about it!

Whitebark pine have 5 needles per fascicle, clustered at branch ends. Whitebark pines can be confused with lodgepole pine, which have similar bark, but only 2 needles per fascicle.

Medical Incident Report – 8 Line

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment:

See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
