Incident Objectives (ICS 202-WF)

1. INCIDENT NAME	Keystone	2. DATE PREPARED	7/26/2026	3. FIRE SIZE	3042 ac
-------------------------	----------	-------------------------	-----------	---------------------	---------

4. OPERATIONAL PERIOD	Date From:	7/27/2026	Date To:	7/27/2026
	Time From:	0600	Time To:	2200

5. OPERATIONAL OBJECTIVES FOR THE INCIDENT

- **Prioritize Safety:** Ensure firefighter and public safety by implementing tactical operations that align with the values at risk, offer a high likelihood of success, and deploy the appropriate mix and quantity of resources to achieve mission objectives effectively.
- **Strategic Suppression:** Guide fire behavior toward natural or constructed barriers, or into areas with more favorable fuel conditions, to minimize threats to private property, communities, infrastructure, watersheds, and other critical assets.
- **Cost-Conscious Management:** Apply cost containment principles to manage incident expenses, ensuring that financial decisions reflect the scale and significance of the values at risk.
- **Collaborative Engagement:** Strengthen partnerships across agencies, governments, and firefighting entities through transparent practices, consistent communication, and shared decision-making.

6. WEATHER FORECAST

Little change as high pressure remains overhead and moisture recycles day to day. The chance for convection will continue for the next several days though chances are better to the south of the fire. Even so, chances remain of 20 to 30% exist for the next several days. Concerns remain heavy rainfall, small hail, and gusty outflow winds of 30 to 40 mph.

Spot Forecast for Keystone Fire

National Weather Service Grand Junction CO

101 PM MDT Sun Jul 26 2026

Forecast is based on forecast start time of 1300 MDT on July 26.

DISCUSSION

Little change as high pressure remains overhead and moisture recycles day to day. The chance for convection will continue for the next several days though chances are better to the south of the fire. Even so, chances remain of 20 to 30% exist for the next several days. Concerns remain heavy rainfall, small hail, and gusty outflow winds of 30 to 40 mph.

MONDAY

Sky/weather.....Mostly sunny (25-35 percent).

CWR.....0 percent.

Max temperature.....91-96.

Min humidity.....16-21 percent.

Wind (20 ft).....West winds 5 to 10 mph. Gusty and erratic winds expected near thunderstorms in the afternoon.

Smoke dispersal.....Poor (23000 knot-ft) increasing to good in the afternoon.

Mixing height.....5800 ft AGL increasing to 11200 ft AGL in the afternoon.

Transport winds.....South 10 mph shifting to the west in the afternoon.

Chance of thunder...10 percent.

TUESDAY

Partly cloudy. Chance of showers and thunderstorms. Lows in the mid 60s. Highs in the lower 90s. East winds 5 mph.

WEDNESDAY

Mostly cloudy. Chance of showers and thunderstorms. Lows in the mid 60s. Highs in the lower 90s. Southeast winds 5 mph.

THURSDAY

Partly cloudy. Slight chance of showers and thunderstorms. Lows in the lower 60s. Highs in the lower 90s. South winds 5 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5

TYPE OF FIRE: Wildfire

FIRE NAME: Keystone Fire

OPERATIONAL PERIOD: 0600-2000 Day Shift

DATE ISSUED: 07-26-26

TIME ISSUED: 1600

UNIT: CO-WRD-000957

SIGNED: Larry Long FBAN

INPUTS

WEATHER SUMMARY:-

Partly sunny **Temps:** 89-99 degrees **Relative Humidity's:** 12-17%

Eye-level Winds: S 5-10 mph, shifting to the southwest in the afternoon 5-10 mph. Showers and thunderstorms after 1200.

OUTPUTS

GENERAL:

Expect the fire behavior potential today to be minimal with the low winds and low RH. Expect thunderstorms after noon. Torching and spotting are possible as the fire moves through the pinyon/juniper fuel type.

Probability of ignition is 100% with spotting distances of .1 mile possible.

1 hour fuel moisture: 2%

1000-hour fuels are ~7-9 % and live fuel moistures are at around 80%, ERCs are above the 90th percentile.

SPECIFIC:

All Divisions: The wind will be out of the south and then the southwest this morning. Head fire max rates of spread are estimated to be 16-31 chains/hour and flames lengths up to 4-6 feet in the grass and brush. Fuel conditions are extremely dry, and any torching will/may result in a spot fire.

AIR OPERATIONS:

Gusty and erratic winds could develop with the possibility of t-storms and instability in the afternoon.

SAFETY

Keep lookouts posted to watch for t-storm buildup and long-range spotting. Always maintain LCES!

Local Thresholds – **WATCHOUT:** Combinations of any of these factors can greatly increase fire behavior:

Elevations	20' Winds +15 mph	RH <20%	Temp +80°	1000hr Fuel <7%
~6500'	SW 5-10 mph	12-17%	89-99°	7-9%

Demob Tips

*****Note: If you have cell phone coverage and have nothing to return, you will not physically need to come to ICP.*****

After being notified by your supervisor of your tentative release date AND TIME:

Step 1. **Return** all supplies, radios, etc. that were checked out. If you have no items to return, you can complete Finance and Demob virtually. **Make sure to see Logs to get your apparatus inspected before departure if required.**

Step 2. Submit time for all personnel and equipment to Finance via **QR code on front of IAP** or email to: 2026.keystone.finance@firenet.gov.

Step 3. Complete **Demob Checkout Sheet** using QR code. If unable to use, see Demob. Once Demob receives confirmation from Finance and your demob checkout sheet has been electronically submitted, you will be released in the system.

Type 3 Incident Management Team (IMT) - Turnback Standards

Keystone Fire - MOP UP AND SUPPRESSION REPAIR

Suppression repair is the work required to restore or mitigate impacts caused by firefighting actions and suppression activities, funded by the fire job codes. Repair work will include disturbed areas such as fire lines, safety zones, drop points, camps, and helispots.

These guidelines are not for BAER (Burned Area Emergency Response), which requires a BAER analysis and incident specific funding authorization.

REPAIR ACTIONS

The following action items will guide repair of surface disturbing suppression impacts prior to releasing fire crews and select equipment following containment.

Suppression Repair Needs

The IMT will inventory for and provide a list and location information of suppression actions such as fire line construction, staging, drop points, and camp locations. IMT will be responsible for conducting repair for these items.

IMT will provide a list and map of known infrastructure damaged by the wildland fire (non-suppression damage) such as signs, gates, cattle guards, culverts, etc. IMT will not be responsible for repair of these items.

General Repair Action Guidance

- Washed and weed-free equipment will be used for all repair activities.
- Long linear openings created by wildland fire suppression should be closed and repaired in accordance with READ guidance.
- Remove all trash, debris, temporary road signing, and flagging associated with suppression efforts.

Achieve 95% Containment prior to turning incident over to local Type 4 IC/IC trainee.

Mop-up Guidance Within Main Containment Lines

Mop up should be implemented to the degree and location necessary to make the likelihood of the fire escaping the containment perimeter highly unlikely through the rest of the fire season. Mop up is not based on a set distance in from the fire perimeter.

Mop up is based on predictable potential threats to the containment lines based on experience, terrain, fuel types, the current and anticipated future fuel conditions, resource advisor (READ) consultation and use of infrared mapping and technology.

Mop-up Guidance Outside Main Containment Lines

Existing spots outside of the main containment lines should be 100 percent contained before turnback of the Keystone Fire.

GROUND DISTURBANCE

Helispots

Scatter cut limbs, deadfall and other nearby debris (weathered side up) across the entire area.

Camps and Parking Areas

The IMT and the READs will evaluate and determine rehabilitation actions for camps, helispots, staging areas and parking areas.

FIRE LINES

Hand Lines/Other Trails

- Scatter piles evenly to minimize evidence of line construction.
- Short discontinuous scratch in the PJ will not require rehabilitation, however saw line determined too wide and lengthy should be assessed and will require slash to be scattered along the line to minimize visual impacts.

Incident:
Keystone Fire

Date:
7/27/2026

Operational Period:
0600-2200

SAFETY MESSAGE

Stop - Think - and Talk - before Acting

Major Hazards and Risks:

- **THUNDERSTORMS** - Use IRPG "Thunderstorm Safety".
30/30 Rule- if you see lightning and hear thunderclaps within 30 seconds...take cover for 30 minutes. Get off ridge/find a low spot away from trees/hair tingle-crouch low/do not group up.
- **COMPLACENCY** – Complacency is when your SA isn't where it should be. We are asked to successfully perform in a complicated dynamic environment, while carrying sharp tools on steep slopes for long hours. The expectation is to ensure that yourself and those you manage make it off the hill in one piece. Over time, this task becomes daunting due to our human limitations.
- **DRIVING** – There are numerous driving hazards out there; public on the roads; very dusty & washboard roads and dozer line; deer, elk, or cattle crossing the road; and the fire area is known to have bears, bobcats, and rattlesnakes.
- **DEYDRATION & HEAT STRESS** - Constantly monitor your water and electrolyte intake to avoid dehydration. You have to drink a combination of both water and Gatorade. Limit your caffeine intake. Dehydration and long work hours, coupled with high temperatures all impact fatigue.

***KEEP YOUR HEAD IN THE GAME.
YOUR ASSIGNMENT IS NOT OVER TILL YOU MAKE IT
HOME SAFETY. FINISH STRONG!!!***

Safety Officers: David Vitwar & James Schmidt

Medical Incident Report – 8 Line

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha, Stand-by for Emergency Traffic."

2. **INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. ☐ YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. ☐ GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. **INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment:
See IRPG page 106

Treatment:

4. **TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. **ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. **COMMUNICATIONS:** Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. **CONTINGENCY:** Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. **ADDITIONAL INFORMATION:** Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

ACTIVITY LOG (ICS 214)
