

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Moose Incident ID-SCF-022105	IR Interpreter(s): Max Wahlberg	Local Dispatch Phone: Central Idaho Dispatch (208-756-5157)	Interpreted Size: 37,264 acres Growth last period: 1,525 acres
Flight Time: 2219 MDT Flight Date: 7/25/2022	Interpreter(s) location: Bend, OR Interpreter(s) Phone: 503-319-9582	GACC IR Liaison: Nate Yorgason GACC IR Liaison Phone: 435-590-1107	National Coordinator: Tom Mellin National Coord. Phone: 505-301-8167
Ordered By: ID-SCF	A Number: A-67	Aircraft/Scanner System: N149Z / Phoenix	Pilots/Techs: Pilots: Boyce, Johnson Techs: Mann, Guzman
IRIN Comments on imagery: Just two runs tonight, both east west. Some latticing in off nadir topography, including in fire area. Could have used additional overlap between lines.		Weather at time of flight: Clear	Flight Objective: Map heat
Date and Time Imagery Received by Interpreter: 7/25/2022 @ 2250 MDT		Type of media for final product: PDF Map, gdb, kmz.	
Date and Time Products Delivered to Incident: 7/26/2022 @ 0200 MDT		Digital files sent to: NIFS, NIFC FTP.	
Comments / notes on tonight's mission and this interpretation: Tonight's mapping used the incident's wildfire daily perimeter pulled from NIFS at 2245 as a base for mapping. <i>Note: a large (>20 acre) polygon of intense heat was mapped one mile south of the main fire perimeter along the Bird Creek Trail east of Napoleon Ridge Road.</i> Div A: No growth detected in Div A, and only a handful of isolated heat sources were mapped along the division's perimeter. Div F: No growth, no intense heat and no scattered heat in Div F tonight. Div K/M: Perimeter expansion was once again mapped to the east between Bobcat Gulch and Napoleon Gulch. One large polygon of intense heat was mapped one mile south of the fire's main perimeter along with numerous isolated heat sources. This heat is located on both the north and south sides of the Bird Creek Trail one mile north of DP-50. Div O: Some growth was mapped along the fire's southern perimeter along with small pockets of intense heat in areas of expansion. Div T: Intense heat was mapped east of Stormy peak with multiple spot fires west and south of the peak. The perimeter's western most point has now reached within 1/10 mile of H-5.
